

Read the scenario and complete the activities below.

Scenario: Jason has been referred to the outpatient clinic by his GP where you first saw him on 18th May 2008. The family have just moved to the district and his new GP is concerned as Jason was born at approximately 26 weeks gestation and is currently tube fed. The GP has included the measurements below:

Expected Date of Delivery (EDD) 10/09/2006

Date	Weight	Length	Head	
(Birth) 08/06/2006	0.84		25.5	
13/09/2006	2.7	49.5	34	Discharged
19/11/2006	4.4	58.2	37.5	Admitted with RSV
25/11/2006	4.25			Discharged
30/07/2007	6.2	71.3	43.2	Tube feeding commenced
18/05/2008	9.9	82.5	44.9	Current outpatient visit

Prepare his chart using the instructions on the front of the chart and the calendar on the flap.

Plot all the weight, head and length measurements above onto Jason's chart.

Answer the questions below:

1. What was his exact gestational age at birth? _____ weeks _____ days
2. At discharge what was his postmenstrual age? _____ weeks _____ days
3. What was his corrected age when admitted with RSV? _____ weeks
4. What is his corrected age when seen in clinic on 18/5/08 ? _____ months _____ weeks
5. How has he grown since birth?
