

Medicine Protocol for the Administration of Priorix (MMR - Measles, Mumps and Rubella) live vaccine by registered nurses and registered midwives to Refugees and Applicants Seeking Protection in Ireland and in the event of an outbreak

This medicine protocol is a specific written instruction for the administration of Priorix (MMR) vaccine to Refugees and Applicants Seeking Protection in Ireland and in the event of an outbreak (hereafter referred to as vaccine recipients) as advised by public health by registered nurses and registered midwives. This medicine protocol is valid for the 2023/2024 Health Service Executive (HSE) Primary Childhood Immunisation Programme (PCIP), Schools Immunisation Programme (SIP) and National Immunisation Advisory Committee (NIAC) catch up Immunisation Programme and in the event of an outbreak as advised by Public Health.

This medicine protocol enables registered nurses and registered midwives employed in the voluntary and statutory services of the HSE including Mass vaccination clinics, congregated settings, temporary clinics and mobile units who have undertaken the required education and training programmes to administer Priorix (MMR) vaccine with reference to and guidance from Nursing & Midwifery Board of Ireland (NMBI), National Immunisation Advisory Committee (NIAC), National Immunisation Office (NIO), HSE and in accordance with the Summary of Product Characteristics (SmPC) for Priorix (MMR) vaccine as detailed by the Health Products Regulatory Authority (HPRA) at www.hpra.ie

The Nursing and Midwifery Board of Ireland defines medicine protocols as “written directions that allow for the supply and administration of a named medicinal product by a nurse or midwife in identified clinical situations. A medicine protocol involves the authorisation of the nurse/midwife to supply and administer a medicine to groups of patients in a defined situation meeting specific criteria and who may not be individually identified before presentation for treatment. An individually named prescription is not required for the supply and administration of medication when a medication protocol is in effect” (An Bord Altranais, 2007).

Medicine Protocol for the Administration of Priorix (MMR - Measles, Mumps and Rubella) live vaccine by registered nurses and registered midwives to Refugees and Applicants Seeking Protection in Ireland and in the event of an outbreak

Document reference number	NIO Dec 2023
1.0 Critical Elements	
Name of Organisation where medicine protocol applies	Health Service Providers/Mass vaccination clinics across the voluntary and statutory services of the HSE. This Medicine Protocol applies to: <ul style="list-style-type: none">• registered nurses and registered midwives employed in the voluntary and statutory services of the HSE including Mass vaccination clinics, congregated settings, temporary clinics and mobile units
Date the medicine protocol comes into effect	December 2023
Date for review of medicine protocol	December 2024
Document prepared by	National Immunisation Office (NIO) in collaboration with the Office of the Nursing and Midwifery Services Director (ONMSD) HSE
Names and Signatures of the employing authority who is authorising the implementation of the medicine protocol <i>“On behalf of the authority employing professionals authorised to administer under this medicine protocol, I have read this medicine protocol and authorise its implementation”</i>	<p>Name: Dr. Eamonn O’Moore Director of National Health Protection</p> <p>Signature: </p> <p>Name: Dr Colm Henry, Chief Clinical Officer, HSE</p> <p>Signature: </p> <p>Name: Dr Geraldine Shaw, Nursing and Midwifery Services Director, HSE</p> <p>Signature: </p>

Medicine Protocol for the Administration of Priorix (MMR - Measles, Mumps and Rubella) live vaccine by registered nurses and registered midwives to Refugees and Applicants Seeking Protection in Ireland and in the event of an outbreak

2.0 Clinical Criteria	
Clinical condition for use of the medicine protocol	The clinical condition for which this medicine protocol has been developed is for the active immunisation against and prevention of measles, mumps and rubella (MMR) infection.
Circumstances in which the medicine protocol applies	The primary childhood immunisation schedule at 12 months of age and for any subsequent presentation for vaccine or booster e.g. measles outbreak, late entrants, catch-up campaigns or adult vaccination to Refugees and Applicants Seeking Protection in Ireland (hereafter referred to as vaccine recipients) and in the event of an outbreak.
Inclusion criteria for vaccine recipients receiving Priorix (MMR) vaccine under this medicine protocol	<p>1. All children at 12 months of age should receive a Priorix (MMR) vaccine under the primary childhood immunisation schedule, with a second dose at 4-5 years of age (usually given in junior infants)</p> <p>2. Children and adults presenting late for vaccine or with undocumented vaccination records for MMR.</p> <p>3. Measles outbreak – during an outbreak Priorix (MMR) vaccine may be given as young as 6 months of age. A dose given < 12 months of age does not replace the dose recommended at 12 months of age.</p> <p>In the event of outbreak, follow public health advice.</p> <p>Note: Priorix (MMR) vaccine can be given to those who have a history of measles, mumps or rubella infection</p> <p>For catch up vaccination</p> <p>Children (≥age 4 and older) and adults without prior MMR vaccination should be given Priorix (MMR) vaccine as soon as possible and a second dose 4 weeks later.</p> <p>Children from 12 months to 4 yrs without evidence of MMR vaccination should receive one dose of MMR vaccine and continue with routine age appropriate MMR vaccination.</p> <p>Precautions</p> <ul style="list-style-type: none"> • Acute severe febrile illness, defer until recovery • Injection with another live vaccine within the previous 4 weeks • Recent administration of blood or blood products. These may contain significant levels of virus-specific antibodies, which could prevent vaccine virus replication. Priorix (MMR) vaccine should be deferred for at least 6 months after packed red-cell, whole-blood transfusion and Human Normal Immunoglobulin (HNIG) (see NIAC Chapter 2, Table 2.5). If the Priorix (MMR) vaccine is administered within these timeframes, a further 1 or 2 doses as required should be given • Priorix (MMR) vaccine should not be administered on the same day as yellow fever vaccine. If rapid protection is required the vaccines may be given at any interval and an additional dose of Priorix (MMR) vaccine given at least 4 weeks later • Those who developed thrombocytopenia within 6 weeks of their first dose of Priorix (MMR) vaccine should undergo serological testing to decide whether a

Medicine Protocol for the Administration of Priorix (MMR - Measles, Mumps and Rubella) live vaccine by registered nurses and registered midwives to Refugees and Applicants Seeking Protection in Ireland and in the event of an outbreak

	<p>second dose is necessary. The second dose is recommended if the patient is not fully immune to the 3 component viruses.</p> <p>Note: COVID-19 vaccines (except for COVID-19 vaccine given to children aged 6 months 4 years where a 14-day interval is recommended) and other vaccines may be administered at the same time or at any interval.</p>
Exclusion criteria for vaccine recipients receiving Priorix (MMR) vaccine under this medicine protocol	<ul style="list-style-type: none">• A known history of anaphylactic or hypersensitivity reaction to Priorix (MMR) vaccine or to any of its constituents including neomycin• Significant immunocompromise (see NIAC Chapter 3)• Pregnancy (there is no requirement to carry out a pregnancy test prior to vaccination). Note: pregnancy should be avoided for 1 month after Priorix (MMR) vaccine• Children under 12 months of age born to mothers who received infliximab throughout their pregnancy• Children who are being breastfed by mothers taking infliximab.
Actions to be taken for those who are excluded from this medicine protocol	<p>All recipients meeting exclusion criteria must be referred to the medical practitioner for an individual medical assessment.</p> <ul style="list-style-type: none">• Document action in clinical notes• Where Priorix (MMR) vaccine is prescribed following medical assessment, the nurse or midwife may administer Priorix (MMR) vaccine within their scope of practice. <p>Note: In determining their scope of practice, nurses and midwives must make judgements about their competence to carry out a role or activity (NMBI, 2015).</p>
Description of circumstances and referral arrangements when further advice or consultation is required	<p>Discuss the vaccine recipient with the Medical Practitioner in the event of:</p> <ul style="list-style-type: none">• Previous adverse reaction• Other clinical concerns

<p>Link to Medicine Details of product information and other data including instructions for supply and administration is available from the HPRA at www.hpra.ie</p>	<p>Link to Summary of Product Characteristics: http://www.hpra.ie/img/uploaded/vaccines/SPC_PA1077036001.pdf</p> <p>Link to Patient Information Leaflet: http://www.hpra.ie/img/uploaded/vaccines/PIL_PA1077036001.pdf</p>
<p>Procedure for the reporting and documentation of errors and near misses involving the medication</p>	<p>In the case of medicine errors that directly involve the vaccine recipient, i.e. wrong medicine/patient/dose/route being administered or another medicine error, the registered nurse or registered midwife must remain with the vaccine recipient and closely monitor them for any adverse reactions.</p> <p>Vital signs should be recorded and the vaccine recipient should be reviewed by the registered nurse/midwife and/ or medical practitioner.</p> <p>The incident must be reported to the relevant line manager as soon as possible. The incident and all actions taken must be promptly recorded in the recipient's documentation/notes and the relevant National Incident Management Report Form completed: https://www.hse.ie/eng/about/who/nqpsd/gps-incident-management/nims/nirf-01-v12-person-interactive.pdf</p> <p>For children, the child's parent and/or legal guardian must be informed of the incident. Any suspected adverse reactions associated with medicine errors should be reported to the HPRA as outlined below.</p> <p>Any errors and near misses not involving medication e.g. needle stick injuries, the incident and all actions taken must be promptly recorded on the relevant National Incident Management Report form and forwarded to the relevant line manager as per local policy. Refer to 'EMI Tool Kit' (https://www.hpsc.ie/a-z/EMIToolkit/).</p>
<p>Procedure for reporting Adverse Drug Reactions to the HPRA</p>	<p>The relevant nursing or midwifery staff should report to the HPRA any suspected adverse reactions, in accordance with criteria outlined by the HPRA. This reporting may be carried out online at https://www.hpra.ie or through use of the yellow card system which is available in the downloadable format from the HPRA website, or on request from the HPRA.</p>
<p>Resources and equipment required for administration of Priorix (MMR - Measles, Mumps and Rubella)</p>	<ul style="list-style-type: none"> • Priorix (MMR) vaccine • Fridge/cool box with minimum/maximum temperature recording device to monitor the cold chain temperature (between +2°C and +8°C) • Disposable kidney dishes/coloured trays • Gauze swabs/Plasters • Sharps bins, and bags for disposal of healthcare risk and non-risk waste material • Alcohol hand sanitizer • Face masks (as per local guidelines) • Access to telephone • Resuscitation equipment and drugs in accordance with the NIAC (2023) <i>Anaphylaxis: Immediate Management in the Community</i> available at: https://rcpi.access.preservica.com/uncategorized/IO_a36f9e4b-4c80-432d-8264-546089359925/ • Access to medical support

	<ul style="list-style-type: none"> • Safe storage areas for medicines and equipment • Current medicine protocol for Priorix (MMR) vaccine.
Audit process to identify appropriate use of the medicine protocol or unexpected outcomes	All documentation will be held for review and audit purposes as per local policy

4.0 Information for vaccine recipient/parent/legal guardian	
Advice to be given to the vaccine recipient/parent/legal guardian before treatment	<p>Reiterate the information provided in the HSE patient information leaflet for the vaccine in the appropriate language and translator support if required.</p> <p>For children, Patient Information Leaflet/Fact Sheet must be supplied with the consent form to each parent/legal guardian prior to administration of the vaccine as above.</p> <p>After Treatment</p> <p>The vaccine recipient must be advised to remain seated in the post vaccination observation area for 15 minutes to allow monitoring of any immediate reaction including possible anaphylactic reaction and must be advised to report any side effects to the registered nurse or registered midwife who is present.</p> <p>Note: Adverse reactions are considerably less common (less than 1%) after the 2nd dose of Priorix (MMR) vaccine.</p>
Advice to be given to the vaccine recipient/parent/legal guardian after treatment	
Details of any necessary follow-up, action and referral arrangements	In the event of an adverse reaction the registered nurse or midwife must ensure that all procedures are adhered to as outlined in Section 3.

5.0 Staff authorised to use this medicine protocol	
Professional qualifications, training and competence required prior to using this medicine protocol	<p>Registered nurse or registered midwife must have completed all of the following:</p> <ol style="list-style-type: none"> 1) Be a Registered Nurse or Registered Midwife, on the active register maintained by the NMBI 2) <i>Immunisation Foundation Programme</i> accessible on www.HSELand.ie 3) Education programme for nurses and midwives on <i>Primary Childhood Immunisation Programme</i> and any updates for nurses and midwives accessible on www.HSELand.ie 4) Education programme for nurses and midwives on <i>Schools Immunisation Programme</i> and any updates for nurses and midwives accessible on www.HSELand.ie 5) NIO education programme on <i>Catch up vaccination for Refugees and Applicants Seeking Protection in Ireland</i> accessible on www.HSELand.ie 6) An approved <i>Basic Life Support for Health Care Providers Course</i> within the last two years (i.e. Irish Heart Foundation (IHF))

Medicine Protocol for the Administration of Priorix (MMR - Measles, Mumps and Rubella) live vaccine by registered nurses and registered midwives to Refugees and Applicants Seeking Protection in Ireland and in the event of an outbreak

7) Initial *National Anaphylaxis Education Programme for Health Care Professionals* accessible on www.HSELand.ie followed by a two hour classroom based skills workshop. Recertification is required every two years by completing the on-line *National Anaphylaxis Education Programme for Health Care Professionals* accessible on www.HSELand.ie

8) The registered nurse/midwife must complete the Competency Self-Assessment Form to vaccinate* Refugees and Applicants Seeking Protection in Ireland *Health Service Executive (HSE) Primary Childhood Immunisation Programme (PCIP), Schools Immunisation Programmes (SIP) and the National Immunisation Advisory Committee (NIAC) Catch Up Immunisation Programme available at www.immunisation.ie
