IMPORTANT NEWS

Re: Influenza Vaccination Campaign 2016/2017

Dear Colleague,

This letter contains important information about the 2016/2017 influenza vaccination campaign.

The World Health Organization has recommended that the seasonal influenza vaccines for the 2016/2017 season (Northern Hemisphere winter) contain:

- an A/California/7/2009 (H1N1)pdm09-like virus;
- an A/Hong Kong/4801/2014 (H3N2)-like virus;
- a B/Brisbane/60/2008-like virus

For 2016/2017

- There are no additional recommendations from the National Immunisation Advisory Committee as outlined in the 2016 Influenza chapter of the Immunisation Guidelines for Ireland
- Only one seasonal influenza vaccine will be in use – **Inactivated Influenza vaccine (Split Virion) BP** manufactured by **Sanofi Pasteur** which comes in packs of 10 pre filled syringes.
- There will be fortnightly deliveries to pharmacies from September to November to facilitate supply of influenza vaccine.
- Patient held vaccination record cards will be sent with your vaccine delivery which should be completed and given to your patients after vaccination.
- New posters for display and a supply of leaflets for your patients will be sent to you shortly.

Seasonal influenza vaccine is provided free for all those aged 65 years and over, those in at-risk groups including pregnant women and healthcare workers (as outlined in the attachment). Those that do not have a medical card or GP visit card will be liable for a fee set by you. Claims for the vaccination of medical card or GP visit card holders in the groups as per the attachment can be made through the PCRS.

The seasonal influenza vaccine supplied by the **HSE National Cold Chain Service (NCCS)** is specifically for those in the at risk groups. Vaccine for individuals outside of these groups can be obtained through the private market.

Further information about the influenza vaccination campaign including a frequently asked questions section about the enclosed recommendations is available on the National Immunisation website www.immunisation.ie and will be sent to you with the information materials.

If you wish to order more information materials please visit www.healthpromotion.ie and order materials from there. Please set up an account if you do not have one already to order larger quantities of leaflets and posters.

Additional details can be found in the 2016 Influenza chapter of the Immunisation Guidelines for Ireland which will be available by early September at <http://www.hse.ie/eng/health/immunisation/hcpinfo/guidelines/immunisationguidelines.html>

Actions required by you:

1. If you are not registered with PCRS for participation in the HSE seasonal influenza campaign and wish to take part in 2016/2017 please contact PCRS. Once registered PCRS will notify the NCCS who will contact you about ordering vaccine supply.
Please note it takes up to 5 working days to set up a new account with NCCS.
2. If you are registered with PCRS
 - use **the online vaccine ordering system** from the NCCS to place your order for Seasonal Influenza vaccine (*Inactivated Influenza vaccine (Split Virion) BP*) for this year's campaign.
 - use the returns service provided by the NCCS for any remaining seasonal influenza vaccine.

Maximising uptake among at-risk groups and front-line health care workers is critical in the prevention of morbidity and mortality and your support in this regard is highly appreciated. In particular please encourage pregnant patients to be vaccinated to protect them and their infants.

If you require any further information or have any queries please do not hesitate to contact me.

Yours sincerely,

Dr Kevin Kelleher
Assistant National Director, Health and Wellbeing, Public Health and Child Health
Medical Council Registration Number: 19719

HSE SEASONAL INFLUENZA VACCINATION PROGRAMME 2016/2017
At Risk Groups eligible to be vaccinated by pharmacists
at the premises of a retail pharmacy business

- ◆ Persons aged 65 and over
- ◆ Those aged 18 years and older
 - With a long-term health condition such as
 - Chronic heart disease including acute coronary syndrome
 - Chronic liver disease
 - Chronic neurological disease including multiple sclerosis, hereditary and degenerative disorders of the central nervous system
 - Chronic renal failure
