IMPORTANT NEWS

Re: Influenza Vaccination Campaign 2013/2014

Dear Colleague,

This letter contains important information about the 2013/2014 influenza vaccination campaign.

The World Health Organization has recommended that the seasonal influenza vaccines for the 2013/2014 season (Northern Hemisphere winter) contain:

- ◆ An A/California/7/2009 (H1N1)pdm09-like virus;
- ◆ An A(H3N2) virus antigenically like the cell-propagated prototype virus A/Victoria/361/2011;
- ◆ A B/Massachusetts/2/2012-like virus.

There are no changes for the 2013/2014 HSE seasonal influenza vaccination campaign:

- ◆ The groups that community pharmacists will be eligible to vaccinate are
 - all those aged 18- 64 years in the at risk groups (as outlined overleaf)
 - all those aged 65 years and older
- ◆ Only one seasonal influenza vaccine will be in use - **Inactivated Influenza Vaccine (Split Virion) BP** manufactured by **Sanofi Pasteur MSD** which comes in packs of 10 pre filled syringes.
- ◆ There will be two additional deliveries to pharmacies to facilitate supply of influenza vaccine.
- ◆ Patient held vaccination record cards will be sent with your vaccine delivery which should be completed and given to your patients after vaccination.
- ◆ New posters for display and a supply of leaflets for your patients will be sent to you shortly.

Seasonal influenza vaccine is provided free for all those aged 65 years and over, those in at-risk groups and healthcare staff (as outlined in the attachment). Those that do not have a medical card or GP visit card will be liable for a fee set by you. Claims for the vaccination of medical card or GP visit card holders in the groups as per the attachment can be made through the PCRS.

The seasonal influenza vaccine supplied by the HSE National Cold Chain Service is specifically for those in the at risk groups. Vaccine for individuals outside of these groups can be obtained through the private market.

Further information about the influenza vaccination campaign including a frequently asked questions section about the enclosed recommendations is available on the National Immunisation website www.immunisation.ie and will be sent to you with the information materials.

Additional details can be found in the 2013 Influenza chapter of the Immunisation Guidelines for Ireland which will be available by early September at <http://www.immunisation.ie/en/HealthcareProfessionals/ImmunisationGuidelines/>

Actions required by you:

1. If you are not registered with PCRS for participation in the HSE seasonal influenza campaign and wish to take part in 2013/2014 please contact PCRS. Once registered PCRS will notify the HSE National Cold Chain Service who will contact you about ordering vaccine supply.
2. If you are registered with PCRS
 - place your order for Seasonal Influenza vaccine (Inactivated Influenza Vaccine (Split Virion) BP) for this year's campaign with the HSE National Cold Chain Service.
 - use the returns service provided by the HSE National Cold Chain Service for any remaining seasonal influenza vaccine.

Maximising uptake among at-risk groups and front-line health care workers is critical in the prevention of morbidity and mortality and your support in this regard is highly appreciated.

If you require any further information or have any queries please do not hesitate to contact me.

Yours sincerely,

Dr Kevin Kelleher
Assistant National Director of Health and Well-Being - Health Protection, Health Promotion & Child Health
Medical Council Registration Number: 19719

HSE SEASONAL INFLUENZA VACCINATION PROGRAMME 2013/2014
At Risk Groups eligible to be vaccinated by pharmacists
at the premises of a retail pharmacy business
