

COVID-19 Vaccine Consent and Medical Eligibility form for Nuvaxovid XBB.1.5® (COVID-19 Vaccine Novavax)

Please answer the following medical eligibility questions with a yes or no answer. Consent for this vaccine is completed on COVAX.

1. **Do they have a contraindication to mRNA vaccines including any Pfizer/BioNTech (Comirnaty®) or any Moderna (Spikevax®) or have made an informed choice not to get an mRNA vaccine?** Yes No

If yes, GO TO THE QUESTION. If no, they cannot get this vaccine. mRNA vaccines remain the preferred choice for the primary and booster vaccines. Please advise them to book an appointment for an mRNA vaccine if they have no contraindications.
2. **Have they ever had a serious allergic reaction (anaphylaxis) that needed medical treatment:** Yes No
i. **After a previous dose of Nuvaxovid (Novavax) vaccine OR**
ii. **to any of the vaccine ingredients, including polysorbate 80?**
If yes, they cannot get this vaccine. They should get a different type of vaccine in a specialist centre. Advise them to talk to their GP. They may need specialist advice. If no, GO TO NEXT QUESTION.
3. **Have they ever had a serious allergic reaction (anaphylaxis):** Yes No
i. **after taking multiple different medications, with no reason known for the reaction (this may mean they are allergic to polysorbate 80)? OR**
ii. **from a vaccine, injection of antibody preparation or a medicine likely to contain polysorbate 80 (please note polysorbate 80 is also found in COVID-19 vaccine Vaxzevria (AstraZeneca®) and COVID-19 Vaccine Janssen®) ? OR**
iii. **for unexplained reasons? This may mean they are allergic to polysorbate 80.**
If yes, they cannot get this vaccine. They need talk to their GP or doctor to check if they are suitable for another type of COVID-19 vaccine. They may need specialist advice. If no, GO TO NEXT QUESTION.
4. **Have they had Myocarditis (inflammation of the heart muscle) or Pericarditis (inflammation of the lining around the heart) after having a previous dose of COVID-19 vaccine?** Yes No

If yes, they need to answer further question 4a. If no, GO TO QUESTION 5
- 4a. **Since they had myocarditis or pericarditis after a previous dose of COVID-19 vaccine a specialist doctor must approve for them to get this vaccine. Has their COVID-19 vaccination been approved by a specialist doctor?** Yes No

If yes, GO TO NEXT QUESTION. If no, they cannot get this vaccine. They need to talk to their specialty doctor to check if they are suitable for this or another type of COVID-19 vaccine.
5. **Have they had the Mpox or smallpox vaccine (Imvanex or Jynneos) in the last 4 weeks?** Yes No

If yes, they cannot get this vaccine today. As a precaution, they need to wait for 4 weeks after getting a monkeypox or smallpox vaccine. If no, GO TO NEXT QUESTION.
6. **Do they have a bleeding disorder or are they on anticoagulation therapy?** Yes No

If yes, they can still get a vaccine if they have a bleeding disorder or take anticoagulation medicines. The vaccinator needs to ask them about their bleeding disorder before deciding to administer the vaccine. If no GO TO NEXT QUESTION. If the vaccinator has approved the vaccine GO TO THE NEXT QUESTION.
7. **Have they ever had Mastocytosis (rare condition caused by an excess number of mast cells gathering in the body's tissues)?** Yes No

If yes, they can still get the vaccine, BUT, they should be observed for 30 minutes after they are vaccinated. If no or yes, GO TO NEXT QUESTION.
8. **If receiving the first dose of a COVID-19 vaccine, have they been diagnosed with COVID-19 within the last four weeks?** Yes No

If yes and receiving a first dose of a COVID-19 vaccine, they should delay getting a vaccine until they have recovered from COVID-19 and it has been at least 4 weeks since they tested positive or developed symptoms.
9. **Are they pregnant?** Yes No

If yes, they can get this vaccine today but please ensure that they have had a discussion about the risks and benefits of this COVID-19 vaccine for them with a health care professional (e.g. doctor, midwife or vaccinator) prior to getting vaccinated. Also, complete questions 11a,11b,11c and 11d if receiving a booster dose.

Next question is only for additional or booster doses. If attending for the first dose of the primary course you are now eligible for vaccination depending on the answers.

Please answer the following questions with a yes or no answer.

For Boosters or additional doses(second or third doses) please complete questions 1-9 and the relevant extra questions below.

Complete this section if they are getting additional doses (a 2nd or 3rd dose) because they have a weak immune

- 9. If they are receiving a second dose of a primary course because they have a weak immune system, has it been at least 4 weeks since their first dose of vaccine?** Yes No

 If yes, GO TO QUESTION 9a.
 If no, they should wait at least 4 weeks since their last dose.
- 9a. Have they been diagnosed with COVID-19 infection since their last dose of COVID-19 vaccine?** Yes No

 If yes, they should wait at least 4 weeks from when they tested positive or developed symptoms.
 If no, GO TO NEXT SECTION.
- 9b. If they are receiving a third dose of a primary course because they have a weak immune system, has it been at least 8 weeks since their last dose of COVID-19 vaccine?** Yes No

 If yes, GO TO QUESTION 9c.
 If no, they should wait at least 8 weeks since their last dose.
- 9c. If they are receiving a third dose of a primary course because they have a weak immune system, have they had COVID-19 infection since their last COVID-19 vaccine dose?** Yes No

 If yes speak to the vaccinator. If yes the vaccinator provides advice on eligibility here as per NIAC guidance.
 If no, they are eligible.

Please answer the following questions with a yes or no answer

For Booster Doses only

- 10. Have they had COVID-19 infection or a COVID-19 vaccine in the last 3 months?** Yes No

 If yes, they should delay getting the vaccine until it has been at least 3 months, since a COVID-19 infection or their last COVID-19 vaccine.
 If no, GO TO NEXT QUESTION
- 11. Are they pregnant?** Yes No

 If yes, complete questions 11a,11b and 11c.
 If no, they are eligible for vaccination today.

Questions 11a, 11band 11c are only for pregnant persons.

- 11a. Have they had a booster dose already in this pregnancy?** Yes No

 If yes, they don't need a booster dose unless they have been diagnosed with a weak immune system. If they have been diagnosed with a weak immune system, speak to their vaccinator. The vaccinator can advise on the current NIAC guidance for vaccination here.
 If no, GO TO QUESTION 11b.
- 11b. Have they had COVID-19 infection or a COVID-19 vaccine in the last 6 months?** Yes No

 If yes, they should wait at least 6 months from their last COVID-19 infection or COVID-19 vaccine dose to get a booster dose.
 If no go to question 11c.
- 11c. Have they had a COVID-19 vaccine in the last 12 months?** Yes No

 If yes, their vaccinator will talk to them about the best timing for their booster dose. If no they are eligible for vaccination today but ideally the vaccine should be given between 20 and 34 weeks of pregnancy. They should talk to their vaccinator.
