Introduction

This document outlines how to use the Monkeypox Immunisation System to process PrEP Dose 2 vaccinations for clients that has self-referred for PrEP Dose 1 but has been identified as vaccinated abroad for Dose 1.

1. Update Appointment Reason

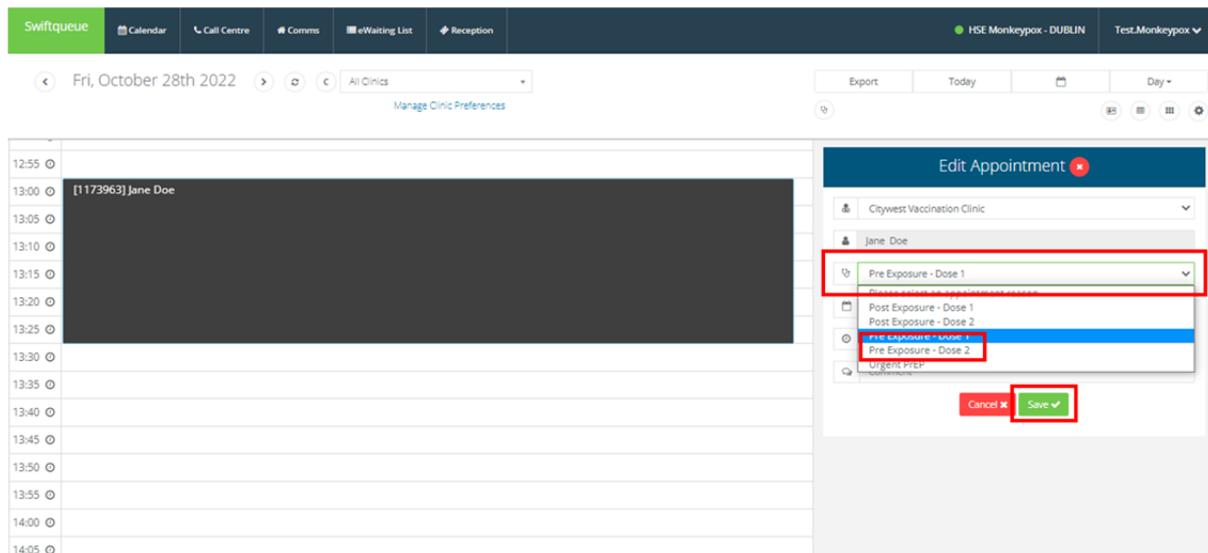

Update the Appointment Reason from Pre Exposure Dose 1 to Pre Exposure Dose 2

1. Select the Client's appointment
2. Click on the hyperlink that displays the Date and Time of the Appointment

The screenshot displays the HSE Monkeypox Immunisation System interface. At the top, there is a navigation bar with 'Swiftqueue' on the left and 'HSE Monkeypox - DUBLIN' and 'Test.Monkeypox' on the right. Below the navigation bar, there is a date selector showing 'Fri, October 28th 2022' and a dropdown menu for 'All Clinics'. The main area is divided into two sections: a calendar on the left and an 'Appointment Details' panel on the right. The calendar shows a time slot from 13:00 to 13:10 with the name '[1173963] Jane Doe'. The 'Appointment Details' panel shows the appointment date and time as 'Friday 28th October 2022 at 13:00', which is highlighted with a red box. Other details include 'Patient Attendance: 94%', 'Pre Exposure - Dose 1', and 'MRN: 1173963'. At the bottom of the panel, there is a yellow box with the text 'Available forms to fill' and a button labeled 'Open Consent & Eligibility Form (Dose 1/Pre Exposure Prophylaxis) fo'.

Monkeypox Immunisation System Training – PrEP Dose 1 Abroad v.1

3. Click on the Pre Exposure Dose 1 dropdown
4. Select Pre Exposure Dose 2
5. Click Save

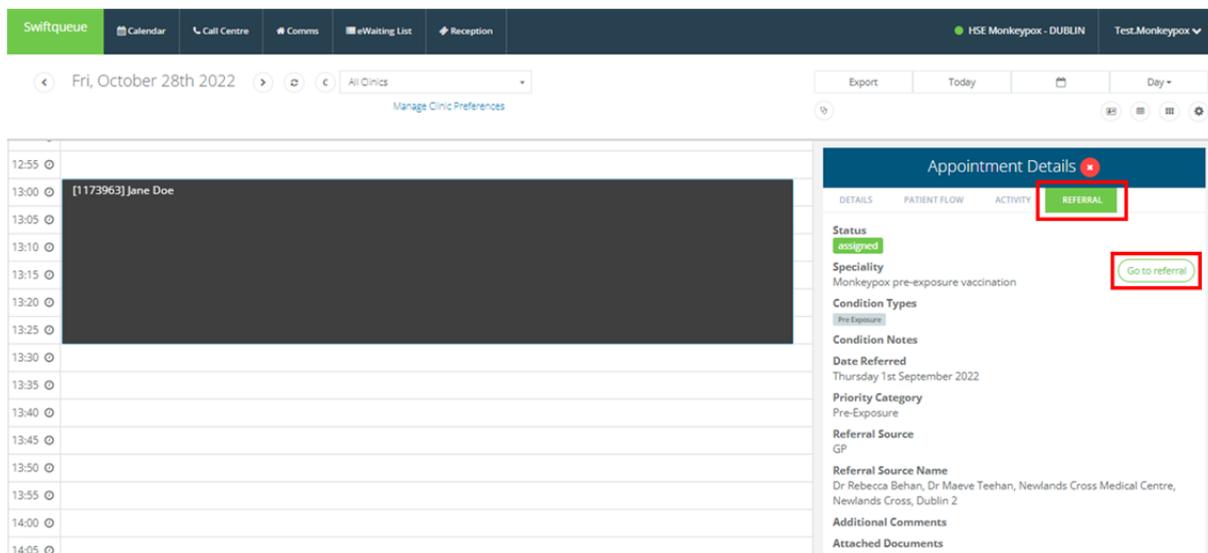

The screenshot shows the Swiftqueue interface with a calendar view for Friday, October 28th, 2022. An appointment for Jane Doe is scheduled at 13:00. The 'Edit Appointment' modal is open, showing the appointment details and a dropdown menu for 'Pre Exposure - Dose 1'. The dropdown menu is open, and 'Pre Exposure - Dose 2' is selected. The 'Save' button is highlighted.

2. Record Clinical Note

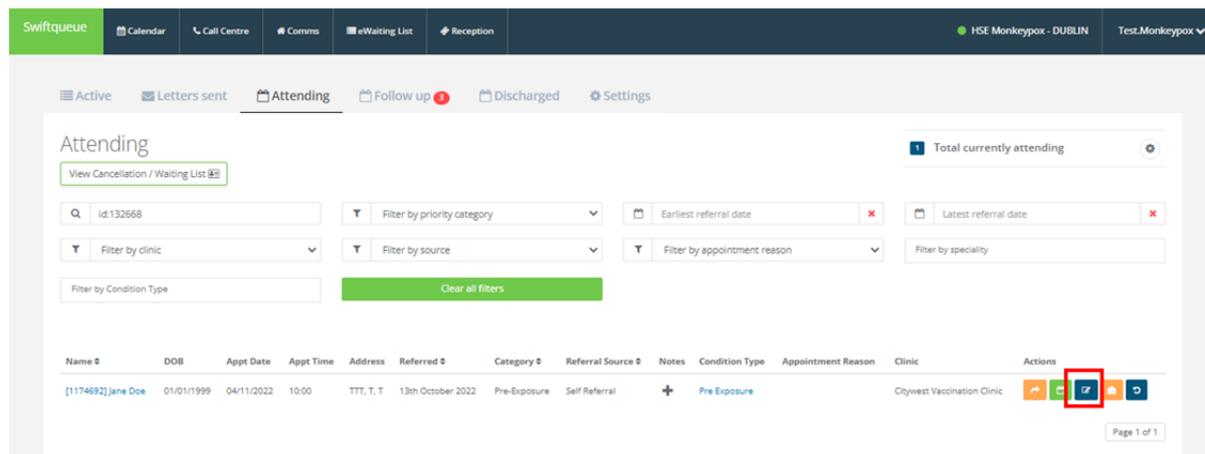

Record a clinical note to indicate that the client has been vaccinated abroad for Dose 1

1. Select your client
2. Click on the Referral Tab
3. Select Go to Referral

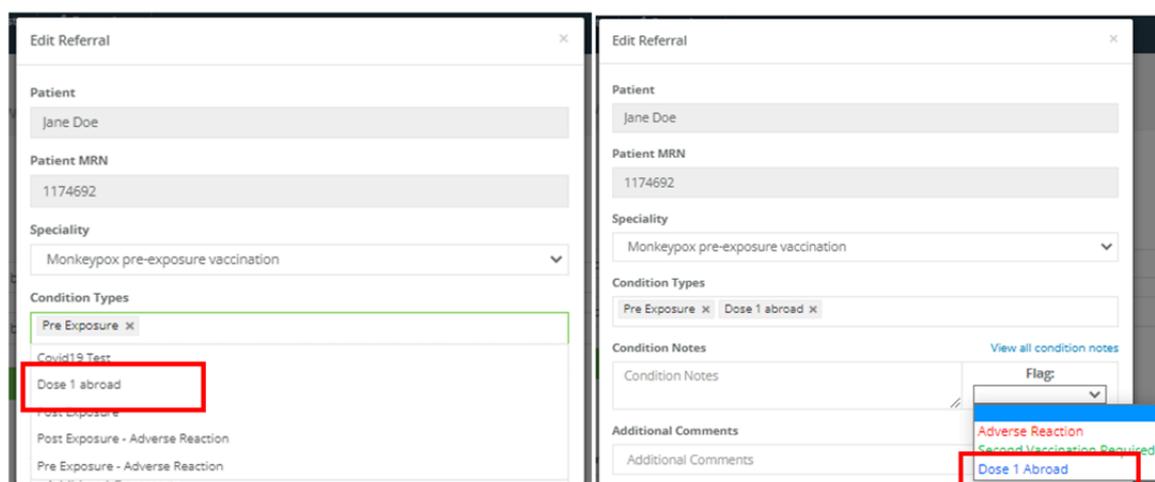

The screenshot shows the Swiftqueue interface with the appointment details for Jane Doe. The 'Referral' tab is selected, and the 'Go to referral' button is highlighted.

4. Click on the Edit Referral Icon

5. a) Click on the text box underneath Condition Type
- b) Select Dose 1 Abroad
- c) Select Dose 1 Abroad as the flag

6. Record the following information in the Add Condition Note textbox:
 - Vaccine Name
 - Vaccine Batch Number
 - Number of doses received (and dates of vaccination of each dose)
 - Site of Vaccination
 - Route of Vaccination (ID/SC)
 - Location vaccine was received (i.e. Sexual health clinic Camden, London)
 - What proof of vaccination (if any) was provided
 - Any issues after their first vaccination

7. Click Save

8. The patient details will be displayed with the 'Dose 1 Abroad' flag as follows

| Name | DOB | Appt Date | Appt Time | Address | Referred | Category | Referral Source | Notes | Condition Type | Appointment Reason | Clinic | Actions |
|--------------------|------------|------------|-----------|---|--------------------|--------------|-----------------|-------|----------------|--------------------|-----------------------------|---------|
| [1173963] Jane Doe | 10/10/1990 | 28/10/2022 | 13:00 | SOUTH KILDARE NETWORK DISABILITY TEAM, CILL DARÁ PRIMARY HEALTHCARE CAMPUS, CURRAGH ROAD, KILDARE, CO. KILDARE, R51 | 1st September 2022 | Pre-Exposure | GP | | Pre Exposure | | Citywest Vaccination Clinic | |
