

HPV Catch-up vaccination programme

Name: _____

Vaccination Date: ____ / ____ / _____

Time of vaccination: ____ : ____

This young person was given the following vaccine today

HPV _____ ☐ LEFT ARM ☐ RIGHT ARM

Reactions that can sometimes happen include:

- soreness, swelling and redness where the injection was given (this usually passes after a day or two)
- dizziness
- headache

Occasionally people may feel sick or have a mild fever after vaccination. On rare occasions some people may have an itchy rash or hives.

You can give paracetamol or ibuprofen to relieve aches and pains or to lower the fever. If you are concerned please seek medical advice.

The school vaccination team can be contacted during office hours from Monday to Friday at:

If you require medical advice after these hours please contact your GP.

You will get a record of the vaccine you received today. **Please keep this safe.**

3 doses of HPV vaccine are needed for people who are immunocompromised (have a significantly weak immune system). If this young person needs 3 doses please contact the school vaccination team to request an appointment.
