

Candida, genital thrush

	Treatment	Conditions
Vulvovaginal candidiasis	Econazole (gyno-prevaryl) pessary 150mg stat PV	Oral and topical treatments have equal efficacy
	Fluconazole 150mg PO stat	Oral treatment is more expensive and Fluconazole (and all oral azoles) should be avoided in pregnancy
Recurrent vulvovaginal candidiasis	Fluconazole 150mg days 1, 4 and 7 then weekly x 6 months	
Candida balanitis	Clotrimazole 1% cream twice daily topically x 5-7 days	Oral treatment rarely indicated
