

### Renal Impairment Prescribing Table – ANTHELMINTICS

Dose adjustments recommended in this table are applicable to the infections detailed on [www.antibioticprescribing.ie](http://www.antibioticprescribing.ie) for the treatment of community infections only. All doses are oral and for adults unless otherwise stated.

**Use either eGFR or calculated CrCl figure to direct to relevant dosing column in tables below.**

Drug	eGFR ( ml/min/1.73m <sup>2</sup> ) or calculated CrCl ( ml/min)		
	30-50	10 - 30	<10
Piperazine/senna sachet	No adjustment required		No dose adjustment but avoid repeated administration
Mebendazole	No adjustment required
