

Renal Impairment Prescribing Table – ANTIFUNGALS

Dose adjustments recommended in this table are applicable to the infections detailed on www.antibioticprescribing.ie for the treatment of community infections only. All doses are oral and for adults unless otherwise stated.

Use either eGFR or calculated CrCl figure to direct to relevant dosing column in tables below.

Drug	Stage 3A	Stage 3B	Stage 4	Stage 5
	eGFR (ml/min/1.73m ²) or calculated CrCl (ml/min)			
	30 - 50		10 - 30	
Fluconazole	Reference sources advise a 50% dose reduction in renal impairment however the dosing regimens listed are already low dose regimens and therefore further dose reduction is not considered necessary.			
<ul style="list-style-type: none"> ◆ 150mg stat ◆ 150mg day 1, 4 and 7 then weekly for 6 months ◆ 300mg weekly for 2 weeks ◆ 50mg every 24 hours 	No adjustment required			
Itraconazole	No adjustment required			Seek specialist advice
Terbinafine	Avoid
