

MY ANXIETY TOOLBOX

Name:

*What is
anxiety?*

*What does
anxiety mean to
you?*

FIGHT OR FLIGHT

Has happened to people since the start of time. Imagine a caveman meeting a huge saber tooth tiger. They would need to run (flight) or battle the tiger (fight) so that they wouldn't be eaten.

BODY REACTIONS

Your heart rate increases to pump more blood to your muscles and brain.

Your lungs take in air faster to supply your body with oxygen.

The pupils in your eyes get larger to see better.

And your digestive and urinary systems slow down for the moment so you can concentrate on more important things.

For some kids, feelings of anxiety or worry can happen **anytime**.

For others, they might occur only at **certain times**, like when they're leaving their home or family to go somewhere.

In some people, this feeling of anxiety occurs **almost all the time** and gets in the way of doing what they want to do.

Anxiety can create a feeling of tightness in your chest, a bellyache, dizziness, or a sense that something horrible is going to happen.

These feelings can be very frightening. Sometimes anxiety can interfere with things you need to do, like learning and sleeping.

Usually, our bodies go into fight or flight only when there is something to fear. However, sometimes this occurs when there doesn't seem to be anything to be frightened about. When you feel scared but there doesn't seem to be a clear reason, that's called **anxiety**.

REMEMBER:

Everyone worries now and then, no matter how strong or brave we are. Sometimes worrying or being afraid can be good for us and helps us stay safe and healthy.

NOTICING OUR BODIES

THINK ABOUT NOTICING FEELINGS IN THE BODY
AND DRAW THEM BELOW

ANXIOUS

EXCITED

FEELING THERMOMETER

How do you feel?

What are you doing?

TIMES I FEEL ANXIOUS

Think about times you might feel anxious, you can use the page below to write or draw about what might cause you to feel worried or stressed

A collage of colorful papers and sticky notes on a teal background. The papers include a white sheet, a large yellow sheet, a light blue sheet, a light purple sheet, a red sheet with a vertical line, and a green sheet with horizontal lines. A small green clip is on the yellow paper, and a small orange clip is on the green paper.

TOOLBOX

We can have lots of different tools to help us manage when we are feeling anxious - we can think about what is going on in our bodies and how we can relax when we notice that we are feeling anxious. The first relaxation tool we will look at is **BREATHING**

TOOL 1 - BREATHING

Relaxed Breathing

When we are anxious or threatened our breathing speeds up in order to get our body ready for danger. Relaxed breathing signals the body that it is safe to relax. Relaxed breathing is slower and deeper than normal breathing, and it happens lower in the body (the belly rather than the chest).

How to do relaxed breathing

- To practice make sure you are sitting or lying comfortably.
- Close your eyes if you are comfortable doing so.
- Try to breathe through your nose rather than your mouth.
- Deliberately slow your breathing down. Breathe in to a count of 4, pause for a moment, then breathe out to a count of four.
- Make sure that your breaths are smooth, steady, and continuous - not jerky.
- Pay particular attention to your out-breath - make sure it is smooth and steady.

Am I doing it right? What should I be paying attention to?

- Relaxed breathing should be low down in the abdomen (belly), and not high in the chest. You can check this by putting one hand on your stomach and one on your chest. Try to keep the top hand still; your breathing should only move the bottom hand.
- Focus your attention on your breath - some people find it helpful to count in their head to begin with ("In ... two ... three ... four ... pause... Out ... two ... three ... four ... pause ...").

How long and how often?

- Try breathing in a relaxed way for at least a few minutes at a time - it might take a few minutes for you to notice an effect. If you are comfortable, aim for 5-10 minutes.
- Try to practice regularly - perhaps three times a day.

Tips and Tricks

- Find a slow breathing rhythm that is comfortable for you. Counting to 4 isn't an absolute rule. Try 3 or 5. The important thing is that the breathing is slow and steady.
- Some people find the sensation of relaxing to be unusual or uncomfortable at first but this normally passes with practice. Do go with it and keep practising. When we are anxious or threatened our breathing speeds up in order to get our body ready for danger. Relaxed breathing signals the body that it is safe to relax. Relaxed breathing is slower and deeper than normal breathing, and it happens lower in the body (the belly rather than the chest).

STAIRWAY TO BRAVERY

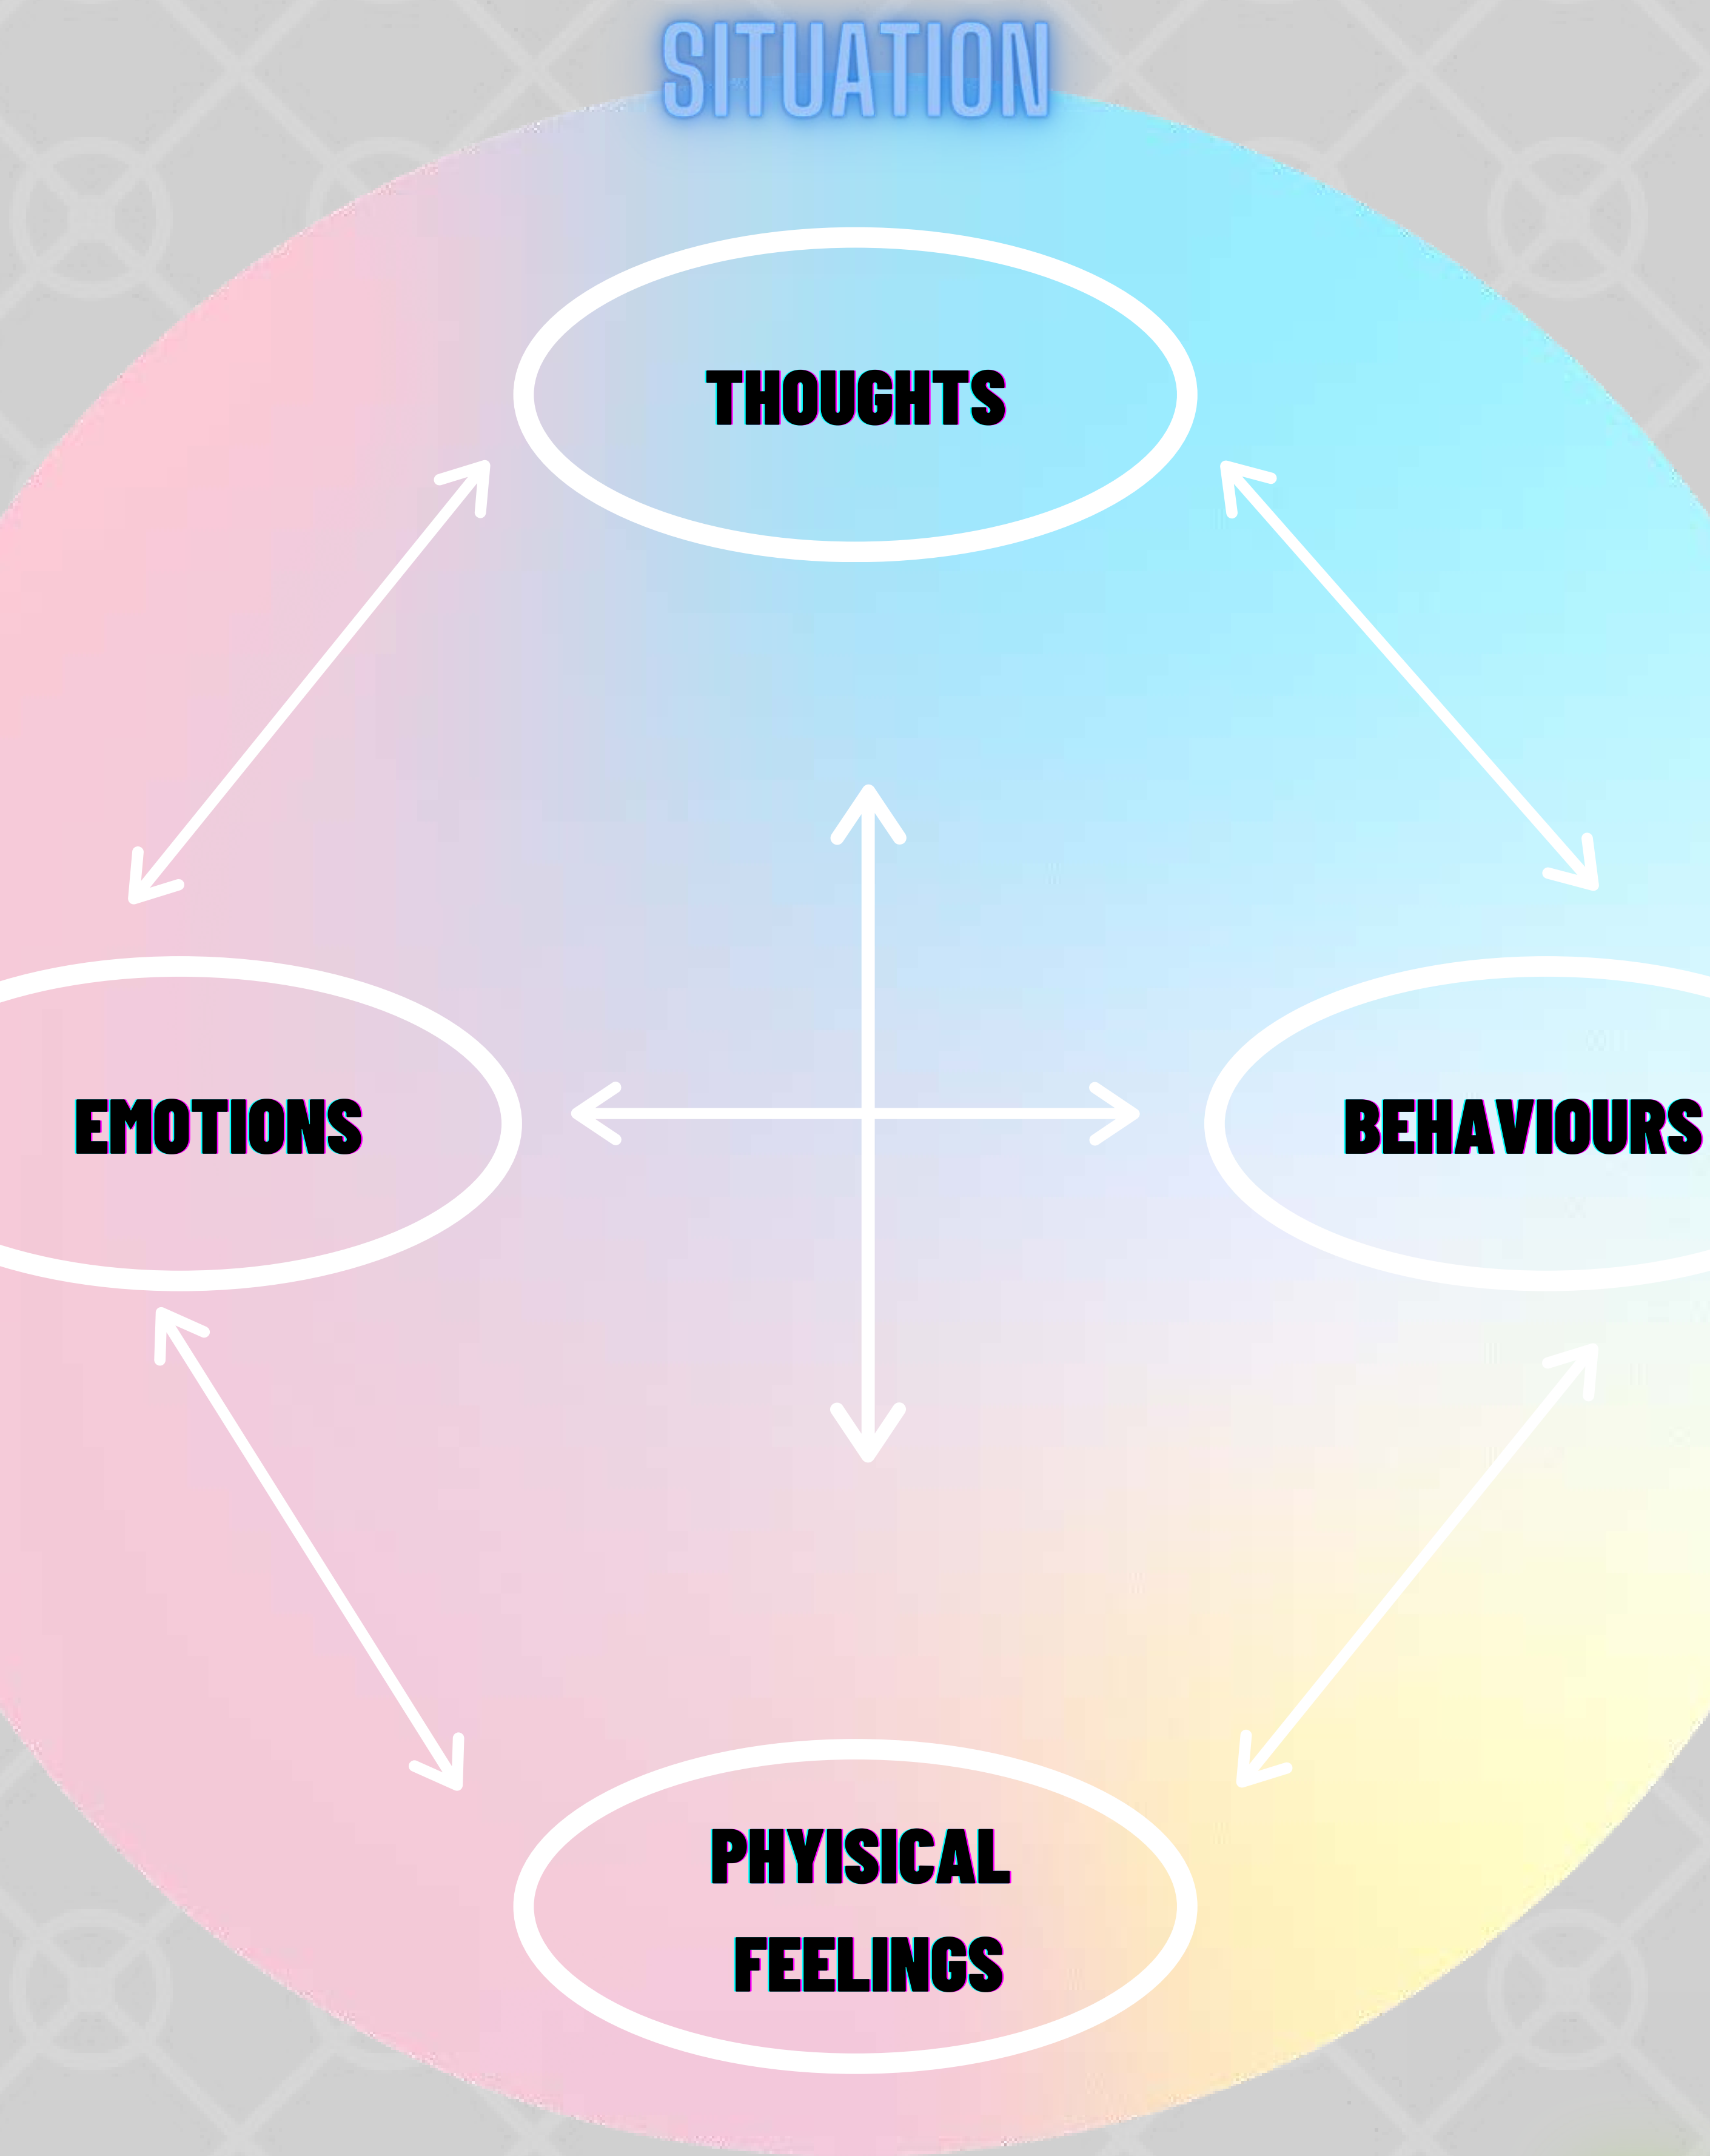

LETS BREAKDOWN OUR GOAL INTO SMALLER STEPS

GOAL

HOT CROSS BUN

THE HOT CROSS BUN SHOWS FOR ANY SITUATION, WHAT WE THINK FEEL AND DO ARE ALL CONNECTED TO OUR EMOTIONS

HOT CROSS BUN

TEST TODAY

THOUGHTS -
"What if I fail?"

EMOTIONS -
Anxiety

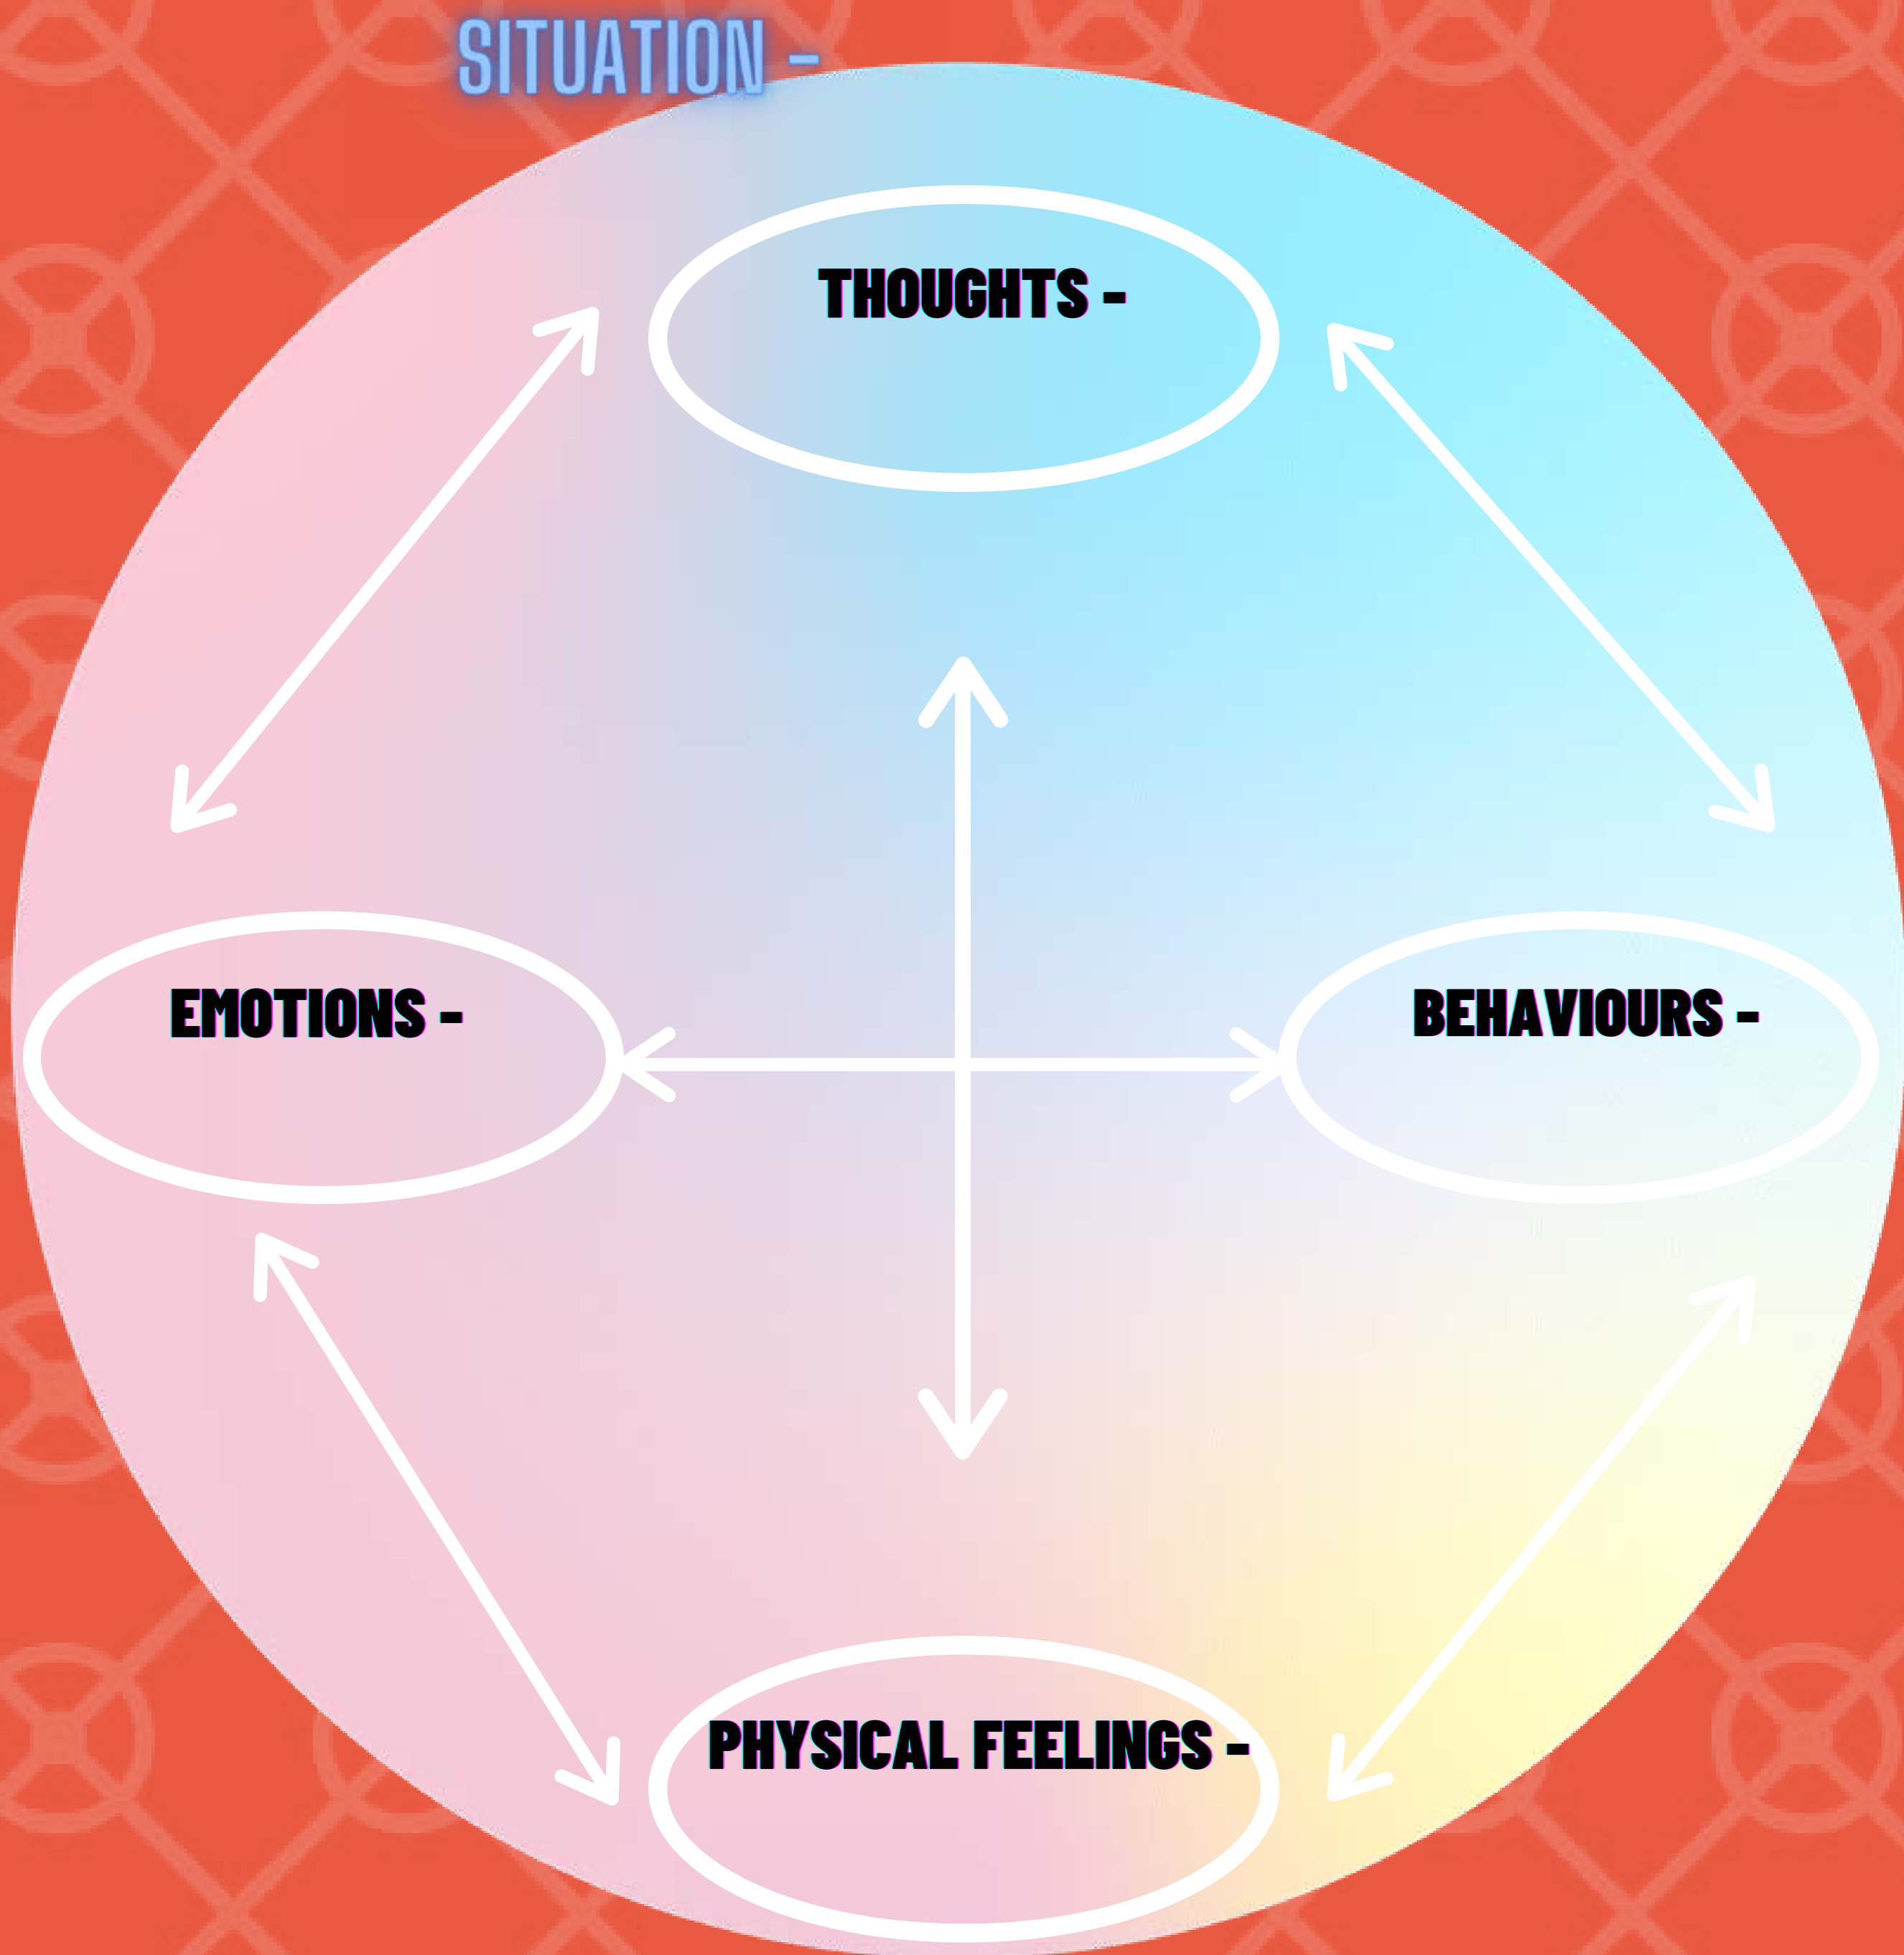

BEHAVIOURS -
Don't eat breakfast

PHYSICAL FEELINGS -
Sore stomach

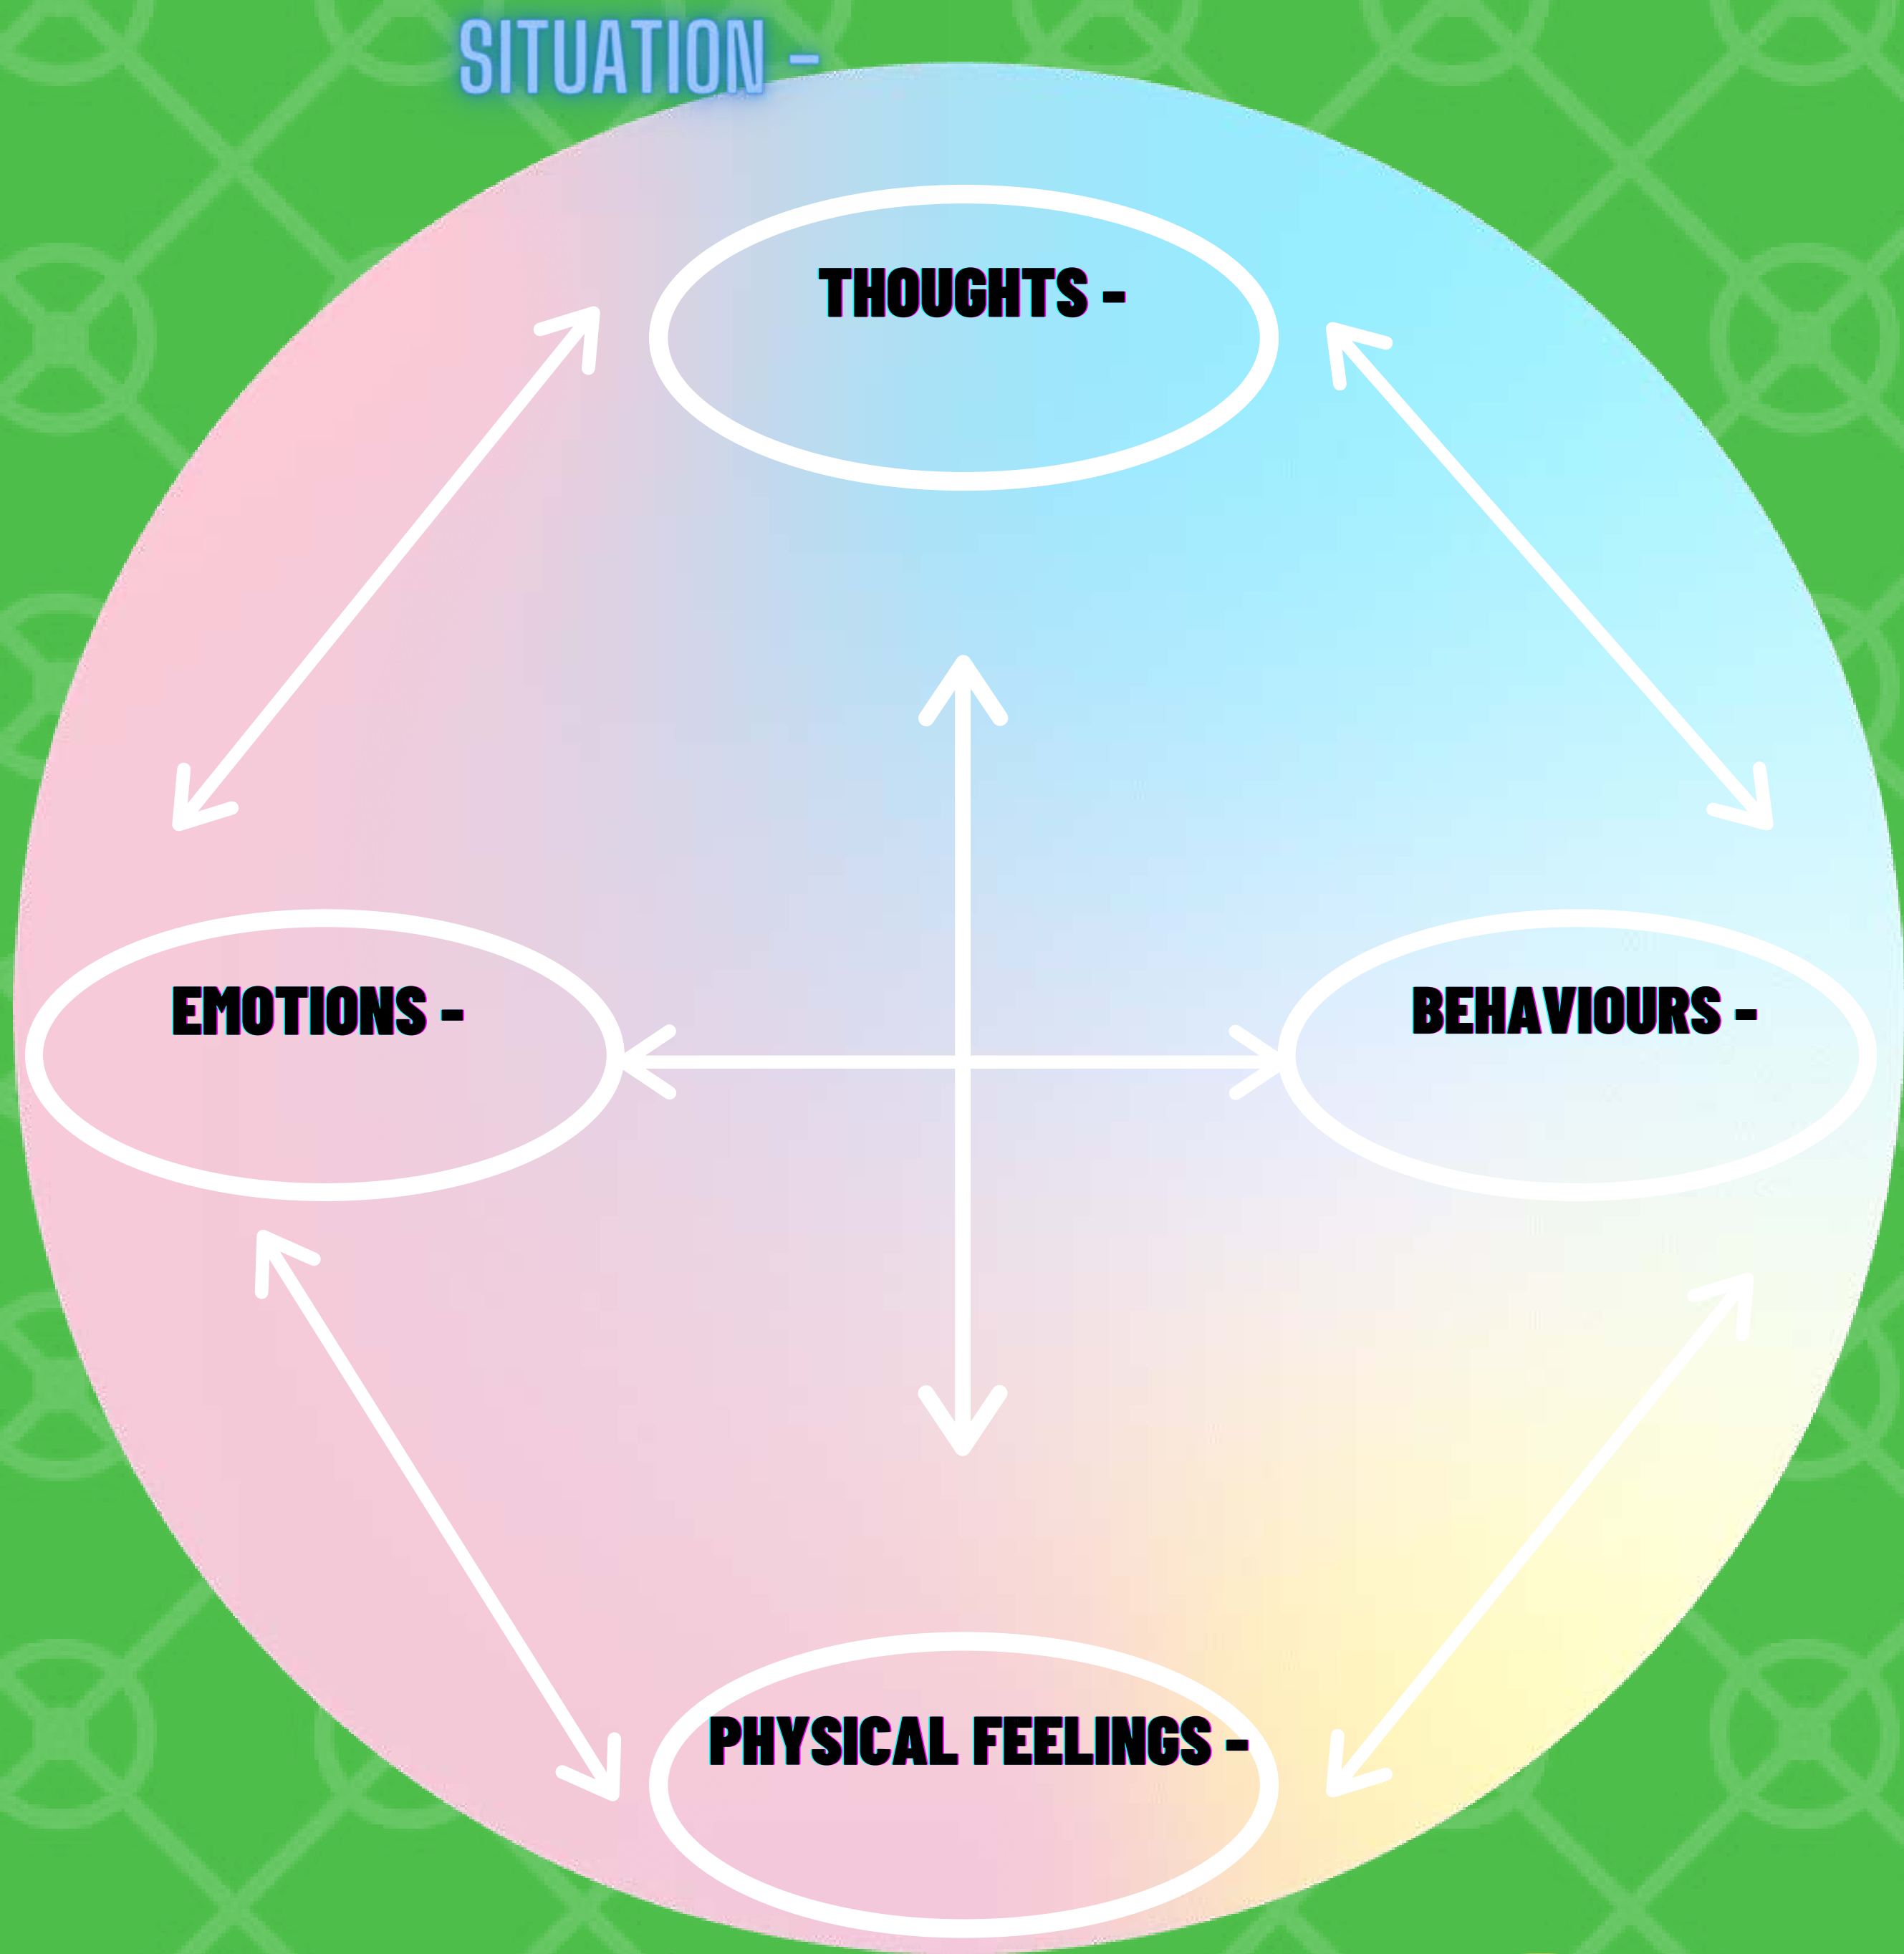

HOT CROSS BUN

TRY TO FILL IN YOUR OWN HOT CROSS BUN

POSITIVE HOT CROSS BUN

WE CAN USE THE HOT CROSS BUN TO THINK OF POSITIVE THINGS WE CAN DO TO HELP WHEN WE ARE FEELING ANXIOUS - WE CALL THESE COPING STRATEGIES

THINGS YOU CAN DO WHEN YOU FEEL ANXIOUS

- FOCUS YOUR BRAIN ON ANOTHER ACTIVITY (read a book, play a game, do a puzzle, watch tv)

- PARTICIPATE IN PHYSICAL ACTIVITY OR SPORT

- USE DEEP BREATHING EXERCISES

- IMAGINE YOURSELF IN A SPECIAL PLACE

- THINK POSITIVELY USING AFFIRMATIONS

- FIND SOMETHING FUNNY THAT WILL MAKE YOU LAUGH*

- WRITE YOUR WORRIES IN A JOURNAL

TOOLBOX

We are going to look at another tool that helps RELAXATION - it's called a PROGRESSIVE MUSCLE RELAXATION and helps by tensing and relaxing our muscle, which releases endorphins into our bloodstream and these chemicals make us feel happier and more relaxed.

TOOL 2 - PROGRESSIVE MUSCLE RELAXATION

During the fight-or-flight response, the tension in our muscles increases. This can lead to a feeling of stiffness, or even back and neck pain. Progressive muscle relaxation teaches us to become more aware of this tension so we can better identify and address stress.

Find a private and quiet location. You should sit or lie down somewhere comfortable.

The idea of this technique is to intentionally tense each muscle, and then to release the tension. Let's practice with your feet.

a. Tense the muscles in your toes by curling them into your foot. Notice how it feels when your foot is tense. Hold the tension for 5 seconds.

b. Release the tension from your toes. Let them relax. Notice how your fingers feel differently after you release the tension.

c. Tense the muscles all throughout your calf.

Hold it for 5 seconds. Notice how the feeling of tension in your leg feels.

d. Release the tension from your calf, and notice how the feeling of relaxation differs.

Follow this pattern of tensing and releasing tension all throughout your body. After you finish with your feet and legs, move up through your torso, arms, hands, neck, and head

TALKING BACK TO MY WORRY

CAN YOU THINK OF THINGS TO SAY BACK TO YOUR WORRY THOUGHTS WHEN THEY POP UP?

TOOLBOX

We are going to look at another tool that helps RELAXATION - it's called a IMAGINATION and helps by imagining being in a safe space and helps us feel more relaxed

TOOL 3 - IMAGINATION

Treehouse Relaxation Script

1. Get your body comfortable and gently close your eyes.
2. Slowly take three deep breaths, in through your nose and out through your mouth.
3. Spend a moment or two, relaxing your feet and legs. Letting go of any tightness and letting them become heavy and relaxed. Imagine a wave of blue light traveling up from the earth into your feet and legs, relaxing everything it touches.
4. Now relax your tummy, chest, and shoulders. Imagine this wave of blue light sweeping through and relaxing this area for you.
5. Pay attention to your arms and fingers, allow the blue light to move through. Feel how relaxed you are.
6. Finally bring the blue light to your head and allow it to flow out of the top of your head and into the air around you. Beautifully done!
7. Imagine you are standing in front of a massive tree. This tree has deep, deep roots and branches that reach out in every direction.
8. This tree is home to your very own treehouse. This is a treehouse of your own design. Picture how you would like your treehouse to look.
9. (Pause between each idea) You can add swings, windows, trapdoors, plants, animals, your favorite things, your favorite colors, just allow yourself to design the treehouse anyway you like.
10. Can you see it? Good. Now allow yourself to travel inside the treehouse. (Pause) Are you inside? Good.
11. Inside the treehouse, imagine anything that makes you feel good to think about. Place pillows, waterfalls, plants, trees, birds, pictures of mountains, anything that you would like that you feel good when you think about it. Go ahead and design the inside of your treehouse now.
12. Know that when you go inside your treehouse you feel really really relaxed. This is a place to let go of all your thoughts, all your worries.
13. Take a deep breath and allow yourself to feel very peaceful and relaxed inside your treehouse.
14. This is a place that you can go any time you would like to feel more peaceful and calm. Know that your treehouse is available to you any time you would like. You can visit here whenever you would like.
15. Now take a deep breath and imagine yourself walking down out of your treehouse. Gently bring your attention back to the room.
16. Rub your hands together to make them warm. Gently place them over your eyes.
17. You can open your eyes whenever you are ready.
