

ST JOSEPH WARD

The team is multidisciplinary and includes consultants, Non-Consultant Hospital Doctors (NCHDs), CNM2, CNM1, staff nurses, allied health professionals, healthcare assistants, household and chaplaincy.

Our purpose is to deliver high quality, evidence-based and person centred care to the patients. The service provides general and acute medical care to the elderly with some elderly rehabilitation-particularly in the area of balance, movement and mobility, bone health and falls prevention. The ward has a well-functioning garden to support people with dementia to enjoy the therapeutic benefits of the outdoors. We provide multidisciplinary team approach and treat all our patients and families with dignity and respect. We encourage and teach nursing students in an open, friendly and professional manner. We acknowledge the contribution of each member of staff and encourage all staff in their continuing professional development. We are committed to respond positively to all feedback and regard these as an opportunity to improve our service.
