

MALARIA REQUEST FORM: This form should accompany a general request form.

- 1 Prior to requesting a malaria screen, it is important to establish that patient has been in a malaria-risk area.
- 2 Please fill out this form and inform the haematology laboratory at 044-9394333
- 3. Sample requirement: 1 EDTA sample (one sample can be used for FBC & Malaria screen.)
The sample should arrive in the Haematology Laboratory within two hours of venepuncture.
The sample is best taken during fever, but can be taken at any time.

Patients Name:

MRN :
