

Nutrition and Dietetic Department

Our Location:

The Nutrition and Dietetic Department is located on the ground floor (Level A) of the Administration Building, at the rear of the hospital.

The Out Patient clinic room is located in the Clinical Specialty Area.

Our Services:

Dietitians are registered with CORU Health Regulator. We assess, diagnose and treat dietary and nutritional related illness. Dietitians apply scientific research on nutrition, health and disease into practical guidance for people and form part of the multidisciplinary team in providing patients with medical nutrition.

Inpatients –Adults and Children

Dietitians receive referrals from the medical team, nursing and multi-disciplinary team and provide nutritional therapy to patients who are referred with Malnutrition, Oncology, Gastrointestinal diseases, Renal impairment, Liver Disease, Coeliac Disease, Dysphagia, Cardiac ailments and Patients with Diabetes etc. We are also involved in providing educational sessions to patients attending Cardiac Rehabilitation Programmes in the hospital and the DAFNE Diabetes programme.

We provide a service to children who are referred with complex medical disorders, e.g. Food Allergy Renal Disease, Metabolic Disorders, , Insulin Dependent Diabetes, Oncology, Faltering growth, Cerebral Palsy etc. We also provide a nutritional service to premature babies in the Special Care Baby Unit and follow up care post discharge in the OPD clinic

Outpatients Clinics:

Paediatrics, Diabetes and Adult Gastro-Intestinal and Nutritional Support Clinics.
