

To members of the Cardiac Arrest Team

In the event that you are called to a cardiac emergency in the Radiotherapy Centre please note the following:

The Radiotherapy Centre is located in the Cancer Centre adjacent to the Oncology Centre

To gain access to the Radiotherapy Centre from the main hospital you must go through the Oncology Centre. There are interlocking doors at the entrance to and exit from the Oncology Centre

It is advisable that you become familiar with the route and the doors in advance of an emergency to enable you to respond to an emergency call.

If you have any queries please do not hesitate in contacting the Radiotherapy Centre on 5901
