

# **HSE Emergency Management**

# Area 1 Crisis Management Team

# **Major Emergency Plan**

(Covering Geographical Areas of Counties Donegal, Sligo, Leitrim, Cavan & Monaghan)

# June 2024

Version	Version 10 – June 2024
Approval Date	June 2024
Review Date	June 2025
Document Approved by	Area 1 Emergency Planning Group
Area Crisis Management Team (CMT) Action Card	Please note: Area 1 CMT MEP Action Card Version 7 corresponds with this plan

## **Version Control:**

Revision Number	Version 8 – May 2022	Summary of edits	Feedback and updates from Departments of Public Health, Psychology, Environmental Health and Emergency Management	
	Version 9 – July 2023	Summary of edits	Feedback and updates from Departments of Public Health, Psychology, Environmental Health	
	Version 10 June 2024	Summary of edits	Feedback and updates from Emergency Management, Public Health, National Ambulance Service and AEPG members.	

## **Explanatory Notes:**

- The HSE is currently in the process of transitioning to RHA model as per Slainte Care however, at the time of publication, the HSE is organised into Acute Operations (Hospital Groups) and Community Operations (Community Healthcare Organisations). The Area 1 Crisis Management Team (CMT) is a strategic group that consists of senior managers representing *all HSE functions and services*. The Area 1 CMT is aligned with the geographical area of Community Healthcare CDLMS (that is, Counties Donegal, Sligo, Leitrim, Cavan & Monaghan). For the purposes of this A1CMT Major Emergency Plan, the 'Area' refers to these counties.
- At the time of review of Version 10 of this plan (June 2024), The tactical and strategic recommendations of the PWC Independent Post Cyber Incident Review published (Dec 2021) are actively being implemented while this plan and risk assessment was being updated.

It is acknowledged that the threat of a cyber-attack continues to be a national risk that would have a significant impact on HSE functions and services in the area. It is anticipated that a section detailing the interface with the Office of Chief Information Officer and a risk assessment for cyber-attacks will be added to the next version, in accordance with national HSE adjustments and guidance.

## TABLE OF CONTENTS

COMMON PAGE	8
Using the following Confidential, Dedicated Numbers:	8
Section 1 Inroduction to the Plan	10
1.1 Foreword	10
1.2 The Framework for Major Emergency Management 2006	11

Ballyshannon / Tallaght	999/112	01 4633 410

<sup>&</sup>lt;sup>1</sup> A Framework for Major Emergency Management, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

Notify NEOC of the Declaration of the Major Emergency using the following message format:

After the Declaration is made, the notifying officer should then use the mnemonic METHANE to structure and deliver an information message (as follows)

Μ	Major Emergency Declared
Е	Exact Location of the emergency
Т	<b>T</b> ype of Emergency (Transport, Chemical, etc.)
Н	Hazards, present and potential
Α	Access/egress routes
Ν	Number and types of Casualties
	Number and types of Casualities

Where the initial declaration of the Major Emergency is made by the HSE, the NEOC Controller on duty, as part of pre-set actions, will notify the other two PRAs of the declaration and provide information as available. Contact may be made via the following numbers:

If these numbers are not answered use 999/112 as alternative

#### **SECTION 1 INRODUCTION TO THE PLAN**

#### 1.1 Foreword

Major Emergency Management (MEM) is a priority issue for all HSE services/functions in counties Donegal, Sligo, Leitrim, Cavan & Monaghan. MEM is fundamentally about ensuring that the necessary planning, prepardness, capacity, training and coordination are in place at all levels of the health service to enable the services to meet the challenges posed by such events. Given that it is not possible to foresee all possible adverse events, an all hazards approach is taken, which is capable of adaptation in the light of prevailing circumstances.

The Area 1 CMT Major Emergency Plan (covering counties Donegal, Sligo, Leitrim, Cavan & Monaghan) has developed in accordance with the requirements set out in Section 4.4.1 of the National Framework for Major Emergency Management (2006)<sup>2</sup>, and sets out mechanisms for coordination at all levels of Major Emergency Management – on site, at local level and at regional level.

This plan is supported by a series of sub-plans covering, sites, services and departments. It is designed to integrate with corresponding plans from the other Principal Response Agencies (PRAs) of Local Authority and An Garda Síochana as well as with the emergency plans for specific sites classified as upper tier sites under the Seveso (Control of Major Accidents Hazards) Regulations<sup>3</sup>.

Major Emergency Management arrangements build on current strengths, and make full use of the core competencies and organistional strengths of the health services as the basis for the response. The aim is to fit in with existing organisational and government structures, subject to appropriate co-ordination mechanisms being added.

This plan aims to provide the service at all levels with an appropriate framework, skill base and the tools necessary to respond to any emergency situation that may arise.

It is the responsibility of all employees to familiarise themselves with their roles and functions as described in this Area 1 CMT Major Emergency Plan and the more specific sub-plans that relate to their services.

Using a systems approach to Major Emergency Management that involves a continuous cycle of activity, we will ensure that the HSE and our PRA partners are in a position to provide protection and care of the public at times of vulnerability, through clear leadership, an early and coordinated response, accountability and safe working, while maintaining the provision of essential services.

Signed:

Dermot Monaghan Chief Officer, Community Healthcare Organisation CDLMS & Chair of Area 1 Crisis Management Team

## 1.2 The Framework for Major Emergency Management 2006

The Framework for Major Emergency Management 2006<sup>4</sup> outlines the structures and processes followed by the Principal Response Agencies in managing a response to a Major Emergency. The MEM Framework arises from a decision of Government. It is available on the HSE Intranet

## http://hsenet.hse.ie/Emergency\_Management/Generic\_Plans\_for\_Major\_Emergencies/

or <u>http://www.mem.ie</u> together with other supporting guidelines, protocols and templates.

## 1.3 Objectives of Area 1 CMT Major Emergency Plan

The objectives of this plan are:

- To provide a system outlining the strategic delivery of a coordinated response when a Major Emergency has been declared as set out in Section 2.1.1 in the geographical area of Community Healthcare Organisation CDLMS for all HSE services/functions.
- To ensure that the HSE has clear leadership in times of crisis and when responding to a Major Emergency.
- To ensure an early and appropriate response with efficient operations co-coordinated with the other PRAs when responding to a Major Emergency.
- To provide for the protection and care of the public at times of vulnerability when a Major Emergency has been declared.
- To ensure the maintenance of HSE essential services during a Major Emergency Response.
- To deliver a realistic and rational approach with transparent accountability when responding to a Major Emergency.
- To put in place a process by which the recovery phase is addressed by the Area 1 CMT as early in a major emergency as possible.

## 1.4 Scope of this Major Emergency Plan

This plan provides for a co-coordinated response to major emergencies beyond the normal capabilities of the principal emergency services in the geographical area of Community Healthcare CDLMS. These may arise from major transport accidents, fires, acts of terrorism, severe weather and outbreaks of disease, spillage or release of hazardous substances.

The types of emergency that arise from fuel shortages, disruption of services or industrial disputes are of another nature and are not catered for in this plan.

This plan consists of two distinct parts:

 The Plan proper which uses the common standard procedures as per framework for Major Emergency Management 2006<sup>5</sup> throughout the geographical area of Community Healthcare CDLMS.

<sup>&</sup>lt;sup>4</sup> A Framework for Major Emergency Management, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

• The Appendices which are elements of the plan proper but are easier to treat as separate items e.g. Directory of Contacts, Garda Casualty Bureau, Media Plan, Risk Assessments, Maps and/or illustrations etc...

The variations possible in the event of a Major Emergency are so numerous that no plan can provide detailed responses for all possible events, which may arise. This plan therefore is to be regarded as an all hazard approach, capable of adaptation in the light of prevailing circumstances. It is not intended, nor should it be interpreted, as a restriction on common sense or initiative when dealing with situations as they arise. It has been developed to identify the process to be taken by the HSE, led by the Area 1 CMT in responding to a Major Emergency.

## 1.5 Relationship to other plans

This plan has been prepared in accordance with Section 4.1<sup>5</sup> of the Framework so that it is consistent with the plans of other HSE Regions, other Principal Response Agencies, appropriate National Emergency Plans and other Site and Event Specific Plans, which may be activated at the same time.

## 1.6 Language, Terminology and Definition of a Major Emergency

This plan complies with Appendix F3<sup>6</sup> of the Framework which provides a Glossary of Terms and Acronyms for use by the Principal Response Agencies and are outlined in Appendix 1 of this document.

Definition of a Major Emergency:

"A Major Emergency is any event which, usually with little or no warning, causes or threatens to cause death or injury, serious disruption of essential services, or damage to property or the environment or infrastructure beyond the normal capabilities of the principal emergency services in the area in which the event occurs and requires the activation of specific additional procedures and the mobilisation of additional resources to ensure an effective, coordinated response." (A Framework For Major Emergency Management 2006)

A Major Emergency can only be declared by an authorised officer of one of the Principal Response Agencies (PRA's)

The designated authorised officers of the PRAs are outlined in Section 7.1.

## 1.7 Distribution

This HSE Area 1 CMT Major Emergency Plan is available for HSE Staff and PRAs on the HSE website:

https://www.hse.ie/eng/services/list/3/emergencymanangement/area-mep/

 <sup>&</sup>lt;sup>5</sup> Section 4.1, A Framework for Major Emergency Management, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf
 <sup>6</sup> Appendix F3, A Framework for Major Emergency Management Appendices, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf

## 1.8 Public Access to the Plan

A copy of this Area 1 CMT Major Emergency Plan with the confidential contact telephone numbers and other personal information removed is available on the HSE Website for members of the public whom may wish to access it:

https://www.hse.ie/eng/services/list/3/emergencymanangement/area-mep/

## SECTION 2 THE PRINCIPAL RESPONSE AGENCY AND ITS FUNCTIONAL AREA

## 2.1 The Agency – The Health Service Executive (HSE)

The HSE is the agency responsible for providing health and personal social services for everyone living in this country. It has undergone significant organisational change and provides its services under the following:

- The Community Healthcare CDLMS (Cavan, Donegal, Leitrim Monaghan, Sligo)
- Acute Hospital Divisions
   Saolta University Health Care Group incorporating Sligo University Hospital
   Letterkenny University Hospital
- **RSCI Hospital Group** *incorporating* Cavan/Monaghan Hospital
- National Ambulance Services
- Public Health Departments
- National Environmental Health Services

Child welfare comes under the remit of Tusla, which has close links with the HSE services.

## 2.1.1 Functions of the HSE

In accordance with Appendix F5<sup>7</sup> of the Framework, the HSE will undertake the following functions in the response to a Major Emergency: -

- Declaration of a Major Emergency where appropriate and notification of the other two relevant Principal Response Agencies (PRAs)
- Activation of predetermined procedures/arrangements in accordance with Major Emergency Mobilisation Procedure
- Acting as lead agency for biological incidents in accordance with Appendix F7<sup>8</sup>
- Provision of medical advice and assistance
- Provision of medical aid to casualties at the site
- Triage of casualties, and assigning them to hospitals for evacuation
- Casualty evacuation and ambulance transport
- Provision of hospital treatment
- Provision of psycho-social support to persons affected by the emergency
- Certification of the dead

 <sup>&</sup>lt;sup>7</sup> Appendix F5, A Framework for Major Emergency Management Appendices, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf
 <sup>8</sup> Appendix F7, A Framework for Major Emergency Management Appendices, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf

- Support for An Garda Síochána's forensic work
- Support for the Coroner's role
- Clinical decontamination and decontamination of contaminated persons on arrival at hospital
- Provision of chemoprophylaxis to anyone exposed to biological agents and follow up surveillance and monitoring of people exposed to hazardous substances
- Advising and assisting An Garda Síochána and Local Authorities on public health issues arising
- Exercising control of any voluntary or other service which it mobilises to the site Monitoring and/or reporting on the impact in its functional area of any emergency/crisis which falls within the ambit of a "National Emergency", and coordinating/undertaking any countermeasures in its functional area which are required/recommended by an appropriate national body
- Any other function, related to its normal functions, which is necessary for the management of the emergency/crisis
- Any function which the On-Site Co-ordinating Group requests it to perform
- Maintaining essential health services during the Major Emergency

These functions will be discharged by a variety of services including (non-exhaustive): The National Ambulance Service (NAS), Acute Hospitals Division, CH CDLMS (CHO 1), Department of Public Health (PH) Services, Communications (Comms) and the CMT.

## The Roles and the HSE Service responsible are summarised in the following table

HSE Roles	Responsible HSE Services
Declaration of a Major Emergency and notifying the other	Authorised Officers in the
two relevant principal response agencies	National Ambulance Service (NAS)

## 2.2 Boundaries and Characteristics of the Area

The geographical remit of this plan comprises of the counties of Donegal, Sligo, Leitrim, Monaghan and Cavan, and includes inhabited off shore Islands. It borders the counties of Derry, Tyrone, Fermanagh and Armagh in Northern Ireland. The five counties comprise a total area of just over 4,400 square miles.

The area has an extensive coastline. Special arrangements for Marine, Island and offshore emergencies are included in Appendix 2 of this document. This also covers the role of Medico Cork in offshore emergencies. Medico Cork is a national resource that provide a radio based support to the Marine and offshore sector.

A more detailed description of the area is set out in Appendix 3 Risk Assessment

#### **SECTION 3 RISK ASSESSMENT FOR THE AREA**

The Risk Assessment of the Area 1 CMT Plan is set out in Appendix 3 of this document. The Inter Agency Risk Assessments for the North West MEM region are available from the Emergency Management Office if required.

Transport risks have been identified within busy seaports at Killybegs and Sligo, and within Airports at Carrickfin, Co. Donegal and Sligo. Our busy road and rail infrastructure also carries significant risk of multi-casualty incidents.

Our long and varied coastline and extensive rivers have been identified as a source of potential tidal and inland waterways flooding. There are no designated Upper-tier Seveso Sites in the area.

#### SECTION 4 HSE RESOURCES FOR MAJOR EMERGENCY RESPONSE

#### 4.1 Internal Resources

In the event of a Major Emergency, the appropriate services from those listed here will be activated.

#### 4.1.1 Area 1 Crisis Management Team (CMT)

Each ACMT is associated with the geographical area of a Community Healthcare Organisation; The ACMT **'is a strategic level management group, within each principal response agency, which is assembled during a major emergency'.** The ACMT consists of *senior managers* representing the various functions/services within the HSE. The ACMT is assembled to *manage a crisis* and deal with issues arising for the HSE both *during* the emergency and subsequent *recovery* phase. The Chief Officer or his/her designate chairs the ACMT.

The Area 1 CMT consists of the senior managers representing all functions and services in the HSE Geographical area of Community Healthcare CDLMS. Each service/function is responsible for advising the West Emergency Management Office of the nominees to the ACMT for their service/function. (Refer to Section 6.2 for complete membership and functions.) The West Emergency Management Office manages the contact details for the Area 1 CMT and issues each member with an Action Card associated with this plan. The A1CMT meets initially by Teleconference and if required at an Area 1 CMT designated facility. The A1CMT is alerted by a text alert system and is called into conference session about 15-20 minutes after the declaration of a major emergency.

The Chief Emergency Management Officer (CEMO) and the Regional Emergency Management Officers (REMO) are members of the Area 1 CMT.

#### 4.1.2 The National Ambulance Service (NAS)

The National Ambulance Service will normally provide the first HSE response to a Major Emergency. The NAS is responsible for the provision of pre-hospital emergency care to persons injured as a result of the Major Emergency. Their activities during a major emergency will include the provision of immediate treatment and the provision of transport to those injured to definitive centres of care.

There are 14 Ambulance stations, spread across the five counties as follows:

#### Donegal, Sligo and Leitrim

• 11 Ambulance Stations/Bases

#### **Cavan and Monaghan**

• 4 Ambulance Stations/Bases

(See Appendix 4 of this plan for Map of National Ambulance Service Stations)

## 4.1.3 National Emergency Operations Centre (NEOC)

The NAS National Emergency Operations Centre (NEOC) as the designated emergency 24/7 365-call centre also plays a key role in the activation of this plan. This is "one" call centre based on two sites Tallaght and Ballyshannon. The manager in NEOC, when notified of a declaration of a major emergency, will activate the Area 1 Crisis Management Team.

## 4.1.4 Acute Hospitals Division

There are two hospital groups operational in the Area 1 CMT operational area with associated receiving Hospitals (24-hour Emergency Department Facilities)

#### Saolta University Health Care Group

• Letterkenny University Hospital,

Letterkenny General Hospital is a 302-bedded General Hospital, which provides a wide range of acute hospital services on an in-patient, day-case and out-patient basis, services include Intensive Care, Coronary Care, General Medicine, Geriatric care, Renal Dialysis, General Surgical and Urology, Obstetrics and Gynaecology, Paediatric care (including a Neo-Natal Unit), Orthopaedics and most recently Consultant-led Oncology and Haematology Services. There is also a 24-hour Emergency Department Facility.

• Sligo University Hospital

Sligo University Hospital is a 359-bedded general Hospital, which provides high-quality healthcare to the people of Sligo, Leitrim, South Donegal and West Cavan. SUH provides Acute Inpatient, Outpatient, and Day Services as well as Regional Specialty Services in Ophthalmology and Ear, Nose and Throat Services. There is also a 24-hour Emergency Department Facility.

#### **RCSI Hospital Group**

• Cavan / Monaghan Hospital

Cavan is a 264 bed general Hospital which currently provides services to the population of both counties and its catchment area extends to counties Meath, Longford and Leitrim. All acute inpatient services are based in Cavan General Hospital. Monaghan Hospital's primary role includes the continuing care for medically discharged patients requiring inpatient stepdown and rehabilitation care. Both Hospital sites provide extensive outpatient, theatre and day services with a Minor Injuries Unit located on the Monaghan Hospital site. There is a 24-hour Emergency Department Facility on the Cavan site

(See Appendix 4 of this plan for locations of receiving hospitals)

## 4.1.5 Community Healthcare Organisation (CHO)

During a Major Emergency, and particularly in the aftermath, Community Healthcare CDLMS will play a vital role in caring for, and supporting, a wide range of individuals, including the families and friends of casualties, uninjured survivors, and those who have been evacuated from their homes.

These functions are provided within CH CDLMS through the following services:

- Primary Care
- Mental Health
- Health & Wellbeing
- Older Persons Services
- Disability Services

Depending on the nature of the Major Emergency, the services of CH CDLMS may be involved in providing extra services to the communities affected by the Major Emergency.

CH CDLMS has its own Major Emergency Plan and Site Specific plans for each of its residential units.

#### 4.1.6 Public Health

The Department of Public Health will play a significant role during the response to any Major Emergency which results in a real or perceived threat to public health, including emergencies involving an infectious condition, such as serious outbreaks, emerging threats and pandemics, the release of a chemical, radioactive, biological or nuclear agent or the contamination of water or food supplies. In CH CDLMS, the Public Health service is provided by the (1) Area F Department of Public Health which covers Counties Donegal, Sligo, Leitrim, (2) Area A Department which covers Cavan & Monaghan.

The Director of Public Health or their nominated representative - a Consultant or Specialist in Public Health Medicine (CPHM) is assigned the Medical Officer of Health role. The Medical Officer of Health (MOH) has responsibility and authority to investigate and control notifiable infectious diseases and outbreaks, under the Health Acts 1947 and 1953; Infectious Disease Regulations 1981 and subsequent amendments to these regulations. This legislation gives the MOH significant authority to take all steps necessary to control the spread any infectious conditions. Under the General Data Protection Regulation (GDPR) 2018, Article 9 2(i), Public Health can access identifiable data relevant to all hazards without consent in the public interest for public health, under MOH legislation.

Other relevant legislation which describes the public health role during emergencies includes the International Health Regulations (2005), Decision no. 1082/2013/EU on cross border threats to health, infectious disease regulations (Aircraft and Shipping); the Health (Duties of Officers) Order, 1949, drinking water, air quality and other environmental legislation to include environmental control.

## 4.1.7 Psycho – Social Support

The HSE will provide psycho-social support in accordance with the guidance document on Psychosocial and Mental Health needs following Major Emergencies A Guidance Document 2014.

## Available at: https://www.hse.ie/eng/services/publications/mentalhealth/emer.pdf

The nominated Principal Psychology Manager for the CH CDLMS geographic area will take the lead for the Psycho-social coordination in both planning and response for major emergency situations and is therefore a member of the Area 1 Emergency Planning Group (for planning purposes) and the Area 1 Crisis Management Team (for coordination of the response).

The aims of providing psychosocial and mental health care in the aftermath of Major Emergencies of all kinds are to:

- Mitigate the psychosocial and mental health effects on people by responding proportionately, flexibly and in a timely way to the phased needs of people who are affected; and
- Ensure a continuum of care, provided in an integrated way that recognises that people's needs may be immediate, as well as short, medium or long term.

## 4.1.8 Environmental Health

The HSE National Environmental Health Service will play a significant role in the response to any Major Emergency, which threatens or results in the contamination of water or food supplies and has significant statutory powers with respect to food safety. The Regional Chief Environmental Health Officer and the Principal Environmental Health Officers in Area 1 are members of the Area 1 Crisis Management team.

It is anticipated that Environmental Health Services would be involved in the following areas / incidents:

- Major Contamination of Drinking Water Supply
- Major Contamination of food
- Major flooding
- Contamination of land and air

## 4.1.9 The Emergency Management Office

The principal roles of the Regional Emergency Management Offices are to assist all HSE services/functions in planning for a Major Emergency and to facilitate and support the Area 1 CMT during a Major Emergency.

The Emergency Management Function is organised as follows:

## 4.1.10 Communications Division

The HSE National Communications Division works with health service teams all over the country. HSE Divisions are each assigned a Client Director from the Communications Division, who works as a programme manager for the communications elements of the division's work. They are your expert Communications Consultant; there to help you get the most from your communications programmes and the support services. The Client Director for Emergency Management contact details are listed within the Directory of Contacts in Appendix 5 of this plan.

Each Hospital Group and Community Healthcare CDLMS has designated Communications staff within their function. These staff will support Area 1 CMT in association with the National Communications Division as appropriate. They may also fulfill the role of Media Liaison Officer as required.

## 4.1.11 Support Functions

Support to the HSE response will be provided by a number of other departments within the Organisation. These are:

- Human Resources
- Finance
- Logistics / Procurement
- Estate Management
- Information Communications Technology (ICT)
- In the event of a Major Emergency, Area 1 CMT will activate the appropriate services.

## 4.2 External Resources

In the event of a Major Emergency, the HSE may request activation of appropriate external resources, as required, from the following agencies:

- Neighbouring HSE Services
- The Irish Red Cross
- The Order of Malta Ambulance Corps
- The St. John Ambulance Brigade
- Coast Guard
- Civil Defence (via and by agreement with the Local Authority)
- The Defence Forces, including Irish Air Corps & Naval Service (by agreement)
- Royal National Lifeboat Institution (RNLI)
- Voluntary and Private Hospitals and other health facilities with which pre-existing arrangements have been made for specific support
- Organisation that may provide community resilience

## 4.3 Regional Interagency Level Response

A Regional Interagency Response may be required when the nature of a Major Emergency is such that:

- The resources available locally do not appear to be sufficient.
- The consequences are likely to impact outside the area.
- The incident is spread across more than one Local Authority area or is close to a boundary of two or more of the Principal Response Agencies.
- The Plan for Regional Level Co-ordination may be activated, in accordance with Section 9 of this plan.

#### SECTION 5 PLANNING & PREPAREDNESS FOR MAJOR EMERGENCY RESPONSE

#### 5.1 This Plan

The Emergency Management function has prepared this plan, which sets out its arrangements to respond to events occurring in or impacting on its functional region, which require the declaration of a Major Emergency. The HSE functions are set out in Section 2.1.1

#### 5.2 Structures

The HSE has established Planning and Preparedness Major Emergency Management groups at national, regional, area and local/service levels, which take a lead in the development, exercise, review and maintenance of an appropriate level of preparedness for Major Emergency Response.

#### 5.2.1 National

At National level, the National Emergency Planning Group (NEPG) has responsibility for Emergency Planning. The purpose of the NEPG is to support and encourage best practice in Emergency Management throughout all HSE areas. The group's Membership includes senior management representatives from all HSE Directorates including the Community Healthcare Organisation (CHO) and the Acute Hospitals Division. It is chaired by the Assistant National Director of Emergency Management. This team meets twice yearly and more frequently if required. When necessary the NEPG may create specialised sub groups to plan for specific emerging threats, this is most likely when there is (or a threat of) a public health emergency with the Department of Health leading the National response. In this instance this group may also take the lead in coordinating the overall HSE response to such an emergency. This delegation will only happen at the direction of the CEO of the HSE.

#### 5.2.2 Area 1 Emergency Planning Group

An Area Emergency Planning Group (AEPG) is coterminous with the geographical area of its Community Healthcare Organisation (CHO). The purpose of the AEPG is to support and encourage best practice in Emergency Management throughout Area 1 and across all HSE services and facilities. The membership of the AEPG consists of representatives of all key HSE functions, Acute Hospitals Division and other key HSE frontline and ancillary services in that geographic area. A Head of Service or Designee as designated by the Chief Officer chairs this Group. The Chair will oversee the coordination and harmonisation of all EM plans in the area. The Group will plan and prepare response and recovery measures for all emergencies within Area 1.

#### 5.2.3 Local, Site and Service

Each Acute Hospital Division has a designated Lead for Emergency Management. Each Receiving Hospital has a designated Lead for Emergency Management and an Emergency Management Planning Group. Likewise, each Community Healthcare Organisation (CHO) has a lead for Emergency Management and an Emergency Management Group.

## 5.3 Service and Business Plans

Major Emergency Management is advanced and monitored across all areas and services of the HSE by means of the annual service and business planning processes. Emergency Management is included in the overall Service Plan of the HSE as well as in the Service and Business Plans of the Hospitals, Community Healthcare Organisation (CHO), NAS, and Department of Public Health, at national, regional, area and local/service levels.

## 5.4 Planning & Preparedness

The A1CMT designates responsibility to the Area Emergency Planning Group for the continued development of planning and preparedness for Major Emergency response through:

- The nomination of individuals and alternates to key roles
- The provision of training for all those involved
- The organisation of a comprehensive programme of exercises including internal and interagency exercises.

## 5.5 Responsibility for Major Emergency Development Process

The responsibility for planning the response to major emergencies lies with the Area Emergency Planning Group. The response to all emergencies will be coordinated by the A1CMT.

## 5.6 Key Roles

The HSE services in A1CMT has nominated competent individuals and alternates to the key roles to enable the agency to function in accordance with the common arrangements set out in this Plan. These roles include;

HSE Key Roles	Possible Appointee
Chair of Area 1 CMT	<ul> <li>CO of Community Healthcare Organisation (CHO) or his/her alternate</li> </ul>
(Site) Controller of Operations	<ul> <li>General Manager NAS or designated alternative</li> <li>Director of Public Health or designated alternative</li> <li>In the case of an Acute Public Health Emergency, the NAS may act as the Controller of Operations, and will be provided with clinical support by a Public Health Doctor.</li> </ul>
Media Liaison Officer	Communications Officer or designated alternative
Information Management Officer (IMOs)	<ul> <li>IMOs for the CMT will be provided by the Office of the CO</li> <li>IMO's for the Incident Site will be provided by NAS or CO – From Trained Group</li> </ul>

Action Manager (AM)	<ul> <li>AM's for the CMT will be provided by the office of the CO</li> <li>AM's for the Site will be provided by the CO</li> </ul>
Support Staff	<ul> <li>Appropriate service(s)</li> </ul>

Interagency Key Roles	Possible Appointee
Chair Regional Co-Ordination Group	<ul> <li>CO or his/her alternate (if HSE lead agency)</li> </ul>
Chair of Local Co-Ordination Group	<ul> <li>CO or his/her alternate (if HSE lead agency)</li> </ul>
On Site Co-Coordinator	<ul> <li>General manager NAS or designated alternative</li> <li>Director Of Public Health or designated alternative</li> </ul>
Information Management Officers (IMOs)	<ul> <li>IMOs for the RCC will be provided by the Office of the CO</li> <li>IMO's for the LCC will be provided by CO <ul> <li>From trained Group</li> </ul> </li> </ul>
Action Managers (AMs)	<ul> <li>AM's for the RCC will be provided by the office of the CO</li> <li>AM's for the LCC will be provided by the CO</li> </ul>

## 5.7 Supports for Key Roles

Support teams may be formed to support and assist individuals in key roles. These teams will be drawn from existing staff in the HSE.

## 5.8 Linking the Major Emergency Plan with Other Emergency Plans

As well as the normal activation procedure, set out in Section 7, this plan may be activated during an emergency which involves the activation of:

- A National Emergency Plan (see Section 10),
- A Severe Weather Plan (see Section 11), or
- A Site or Event Specific Plan (see Section 12)

## 5.9 Staff Development, Training and Exercise Programs

As part of the preparedness process, the HSE West Emergency Management Office has an on-going programme of staff development and training, as well as organising an annual programme of exercises.

#### 5.9.1 Training

All HSE staff, who have a role to play in a Major Emergency response, are provided with training. A database of all trained personnel is held at the Emergency Management office. This training includes both internal and inter-agency seminars and training courses such as On-Site Coordination, Local Coordination and Information Management. Training will be facilitated virtually as much as possible.

#### 5.9.2 Exercises

The HSE West Emergency Management Office has an on-going programme of exercises, both internal and inter-agency, which include:

- Exercises within individual services, such as Hospitals and Community Healthcare CDLMS
- Inter-agency exercises, organised by the relevant Interagency Regional Working Groups
- Exercises at Airports
- Exercises at Upper-tier Seveso Sites (there are currently no designated Upper-tier Seveso Sites in area)

## 5.10 Major Emergency Preparedness Appraisal

In accordance with the requirements in Section 4.7<sup>10</sup> of the Framework, the Emergency Management Office will carry out and document an annual appraisal of its preparedness for Major Emergencies each year.

<sup>&</sup>lt;sup>10</sup> Section 4.7, *A Framework for Major Emergency Management*, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

## SECTION 6 THE COMMAND, CONTROL AND CO-ORDINATION SYSTEM

## 6.1 HSE CMT(s) Structures

During a Major Emergency Response, the HSE will exercise command and control over its own resources, primarily by means of a CMT and existing management structures.

### 6.1.1 Area 1 CMT

The Area 1 CMT is a strategic level management group drawn from the senior HSE managers from all HSE services/functions in this area, who will meet at the pre-determined location. The functions of the Area 1 CMT are to:

- Manage, control and co-ordinate the overall HSE response to the situation.
- Provide support to the HSE's Controller of Operations on site and mobilise resources from within the Area 1 functions/services or externally as required.
- Liaise with HSE national CMT (if activated), and relevant Government Departments on strategic issues.
- Ensure appropriate participation of the Area 1 functions/services in the inter-agency coordination structures.
- Maintain the Area 1 functions/services normal day-to-day services
- Oversee the recovery strategies of Area 1 resources.
- Co-ordinate all requests for assistance both internally and externally.
- Collect and collate all available information on the Major Emergency.
- Oversee the management of staff resources during a protracted incident.
- Co-ordinate all media briefings in relation to Area 1 function's/service's activities.
- Co-ordinate and endorse regular public information.
- Arrange and conduct debriefs on the Major Emergency.
- Liaise with the Local and or Regional Coordination Centre.
- Co-ordinate the phased stand down of Area 1 resources as required.

## 6.2 CMT Members and their Respective Function

## 6.2.1 Area 1 Crisis Management Team Membership

- **1.** Chief Officer of CH CDLMS (Chair).
- 2. Representative of the EM West region Office.
- **3.** Hospital Group representatives.
- 4. National Ambulance Service representatives.
- 5. CH CDLMS representatives (Heads of Services)
- 6. Director of Public Health or designate.
- **7.** Principal Environmental Health Officer.
- 8. Psychosocial Lead.
- **9.** Communications Representative.

#### *Representatives from the following services will be requested by the Chief Officer as appropriate:*

- **10.** Human Resources.
- 11. Finance.
- 12. HBS Estates.
- 13. Procurement.
- 14. IT.

## 6.2.2 Chairperson – Chief Officer or his/her designate

- Chair all Area 1 CMT meetings.
- Ensure coordination of HSE services involved.
- Establish and maintain linkages and reporting functions with National HSE involved in the response.
- In conjunction with Emergency Management staff, ensure all appropriate documentation is maintained in relation to the activation.
- Establish and maintain contact with HSE Representative on the Regional Co-Ordination Group (if activated).
- Provide Support to the HSE representative at Local Co-ordination Centre (LCC).
- Establish and maintain links with the responding services involved in the Activation.
- Manage requests and resource requirements which will affect the HSE's response to the activation.
- Liaise with other ACMTs in relation to issues which will impact on the HSE response to the activation.
- Advise the regional coordination group in relation to HSE service issues on an Inter-Agency basis.
- Deliver status reports on the activity of HSE services during and post incident to the Area 1 CMT.
- Manage the stand down of HSE services in the area following the incident.
- Ensure that service continuity is maintained during and post incident.
- Establish and maintain links with the responding services involved in the Activation.

## 6.2.3 NAS Area Operations Manager or designate

General Manager NAS and their Assistants are members of the Area 1 CMT

- Represent the National Ambulance Service at the Area 1 CMT meetings.
- Establish and maintain links with the responding Ambulance Service Officers involved in the management of the Activation.
- Manage requests and requirements which will affect the area's ambulance services response to the activation.
- Liaise with other HSE services in relation to issues which will impact on the area ambulance services response to the activation.
- Through the chair of the Area 1 CMT advise the Local Coordination group in relation to ambulance service issues on an interagency basis.
- Deliver status reports on the activity of the ambulance service during and post incident to the Area 1 CMT.
- Manage the stand down of the ambulance service in the area following the incident, having cognisance of the other HSE responding services.
- Ensure that service continuity is managed during and post incident.

## 6.2.4 Acute Hospital Divisions – Saolta University Healthcare Group/RCSI Hospital Group

The CEO & COO of Saolta/RCSI and the General Managers and their Deputies of SUH, LUH & Cavan/Monaghan Hospital are members of the Area 1 CMT

- Represent the Saolta/RCSI Group at the Area 1 CMT meetings.
- Establish and maintain links with the responding services (NEOC & NAS as required).
- Manage all acute hospital requirements in response to the Emergency.
- Provide updates to CHO Area 1 CMT regarding capacity and hospital status.
- Liaise with other HSE services regarding issues which impact the acute hospitals.
- Through the chair of the Area 1 CMT liaise with the Local Coordination group in relation to acute hospital services on an Inter- Agency basis.
- Deliver status reports on the activity of the acute hospital services during and post incident to the Area 1 CMT.
- Manage the stand down of the acute hospital services in the area following the incident. Having cognisance of the other HSE responding services.
- Ensure that service continuity for Saolta/RCSI Hospitals is managed during and post incident.

## 6.2.5 Community Healthcare CDLMS

The Heads of Service are members of the CHO Area 1 CMT.

- Represent CH CDLMS at the Area 1 CMT meetings.
- Establish and maintain links with the responding services as required.
- Manage all CH CDLMS requirements in response to the Emergency.
- Provide updates to Area 1 CMT regarding CH CDLMS service's status.
- Liaise with other HSE services regarding issues, which impact CH CDLMS services.
- Through the chair of the Area 1 CMT liaise with the Local Coordination group in relation to CH CDLMS services on an Inter- Agency basis.
- Deliver status reports on the activity of CH CDLMS services during and post incident to the Area 1 CMT.
- Manage the stand down of the CH CDLMS services in the area following the incident. Having cognisance of the other HSE responding Services.
- Ensure that service continuity for CH CDLMS services are managed during and post incident.

## 6.2.6 North West Department of Public Health

The Director of Public Health or a Specialist in Public Health Medicine is a member of the Area 1 CMT.

- Represent the North West and North East Department of Public Health service at the Area 1 CMT meetings.
- Take a lead role where the incident involves a biological agent.
- Establish and maintain links with the responding services of the Area 1 Department of Public Health services involved in the activation.
- Manage requests and requirements which will affect the Area 1 Department of Public Health services response to the activation.
- Provide Public Health advice as required at Area 1 CMT meetings.
- Liaise with other HSE services in relation to issues which will impact on the Department of Public Health services response to the activation.
- Through the chair of the Area 1 CMT liaise with the Local Coordination group in relation to Department of Public Health services issues on an Inter- Agency basis.

- Deliver status reports on the activity of the Department of Public Health services during and post incident to the Area 1 CMT.
- Manage the stand down of the Department of Public Health services in the area following the incident. Having cognisance of the other HSE responding Services.
- Ensure that service continuity is managed during and post incident.
- In any emergency which involves possible exposure of members of the public to a hazard, public health will perform a public health risk assessment (PHRA) based on the information provided to them. This includes determining the exposure – receptor pathway. The PHRA is an iterative process, and the public health medical advice is updated as new information is provided.
- Based on the PHRA, public health will provide public health medical advice, including advice on decontamination measures.
- Public health is trained in communicating the risk and advice to members of the public, media as well as to the Area 1 CMT.
- Where there is a credible threat of a CBRNE incident, this advice is used to feed into a Joint Threats Analysis. The joint threat analysis is carried out by An Garda Siochana, supported by the Defence Force Explosive Ordnance Disposal team (EOD), Fire Service and public health.
- Where a biological agent is suspected public health is responsible for the provision of postexposure chemoprophylaxis to all those exposed in conjunction with the other services represented on the ACMT.

## 6.2.7 Psycho – Social Support

The Principal Psychologist (Psychosocial Lead), is a member of the Area 1 CMT.

- Represent the Psycho- Social function at the Area 1 CMT meetings.
- Manage requests and requirements which will affect the Area 1 Psycho- Social function's response to the activation.
- Provide Psycho-Social advice as required at Area 1 CMT meetings
- Liaise with other HSE services in relation to issues, which will affect the Psycho- Social function's response to the activation.
- Through the chair of the Area 1 CMT liaise with the Local Coordination group in relation to Psycho- Social issues on an Inter- Agency basis.
- Deliver status reports on the activity of the Psycho- Social function during and post incident to the Area 1 CMT.
- Manage the stand down of the Psycho- Social function in the area following the incident. Having cognisance of the other HSE responding Services.
- Ensure that service continuity is managed during and post incident.

## 6.2.8 Environmental Health

The Regional Chief Environmental Health Manager and the Principal Environmental Health Officers in Area 1 are members of the Area 1 Crisis Management Team.

- Represent the Area 1's Environmental Health service at the Area 1 CMT meetings.
- Establish and maintain links with the responding services of the area's Environmental Health services involved in the activation.
- Manage requests and requirements, which will affect the Area 1's Environmental Health services response to the activation.
- Liaise with other HSE services in relation to issues which will impact on the Environmental Health service's response to the activation
- Through the chair of the Area 1 CMT liaise with the Local Coordination group in relation to Environmental Health services issues on an Inter- Agency basis.
- Deliver status reports on the activity of the Environmental Health services during and post incident to the Area 1 CMT.

## As Appropriate to the incident, carry out the following:

- Immediately Liaise with Irish Water and the Local Authority.
- Liaise with the Department of Public Health to develop a knowledgeable position on the incident and to develop information and advice for other agencies and general public.
- Inform Irish Water/ Local Authority of advice to be given to consumers.
- Contact relevant laboratories in order to prepare for the taking of necessary samples.
- Lead out on food contamination issues.
- Liaise immediately and maintain regular contact with the Food Safety Authority of Ireland (FSAI) and with the Food Industry.
- Maintain contact and liaise with the relevant colleagues in local and adjoining Health Safety Executive services, Local Authorities and other stakeholders (e.g. Social Protection).
- Enforce as appropriate Food Safety statutory measures where required in situations which threatens or results in the contamination of water or food supplies.
- Co-operate with FSAI and Area 1's Communications Departments in advising the general public.
- Manage the stand down of the Environmental Health services in the area following the incident. Having cognisance of the other HSE responding Services.
- Ensure that service continuity is managed during and post incident.

## 6.2.9 Regional Emergency Management Office

The Chief Emergency Management Officer and the Regional Emergency Management Officers are members of the Area 1 CMT.

- To provide advice on the HSE MEM Management of the incident to the members of the Area 1 CMT.
- To liaise with the National Office of Emergency Management in relation to the Incident.
- To liaise with the Emergency Management staff from other HSE areas in relation to the response.
- To assist in the collation all documents generated in relation to the activation.
- In association with the Chair of Area 1 CMT, manage the stand down of the emergency management staff and command centre following the incident
- To assist the completion of reports in relation to the activation post incident.

## 6.2.10 HSE Communications Division Representative

Depending on the nature of the Emergency and availability of appropriate staff, the Communications Officer will be nominated from either the Hospital or the CHO 1 service by the Area 1 CMT. Their duties will include the following:

- Provide Communications Expertise at the Area 1 CMT meetings as required.
- Establish and maintain links with the HSE National Communications Division and the relevant HSE functions/services involved in the Activation.
- Manage requests and requirements in relation to communications issues from the members of the Area 1 CMT.
- Through the chair of the Area 1 CMT, liaise with the communications sections of the other responding statutory agencies in relation to all media and public information issues.
- Deliver status reports on the activity of the Communications Division during and post incident to the Area 1 CMT.
- Manage the stand down of the Communications Division in the area following the incident. Having cognisance of the other HSE responding Services.
- Ensure that service continuity is managed during and post incident.

## 6.2.11 Logistics/Procurement Manager

- Represent the Logistic/Procurement management service at the Area 1 CMT meetings.
- Manage requests and requirements in relation to Logistic/Procurement management service issues from the members of the Area 1 CMT.
- Through the chair of the Area 1 CMT liaise with the other responding statutory agencies in relation to all Logistic/Procurement issues.
- Deliver status reports on the activity of the Logistic/Procurement management service services during and post incident to the Area 1 CMT.
- Manage the stand down of the Logistic/Procurement management service in the area following the incident. Having cognisance of the other HSE responding Services.
- Ensure that service continuity in all supply chains are managed during and post incident.

## 6.2.12 Human Resources

• As required, HR will advise the Area 1 CMT on all Human Resource issues in relation to the incident.

## 6.2.13 Specialist Advisers to the Area 1 Crisis Management Team

The Area 1 CMT have at its disposal specialist advisers who can be contacted by the Area 1 CMT during activation. They are not members of the Area 1 CMT but can be contacted to assist the Area 1 CMT in their response to an incident. Their functions are to:

- To attend Area 1 CMT meetings on request either by phone link or in person.
- To give advice on specific issues in relation to their specialist area expertise.
- To research issues in relation to their specialist area and report to the Area 1 CMT on their findings.

## 6.3 Control at the Site

At the site of a Major Emergency, the HSE will exercise control, not only over its own services, but also over any additional services (other than those of the other Principal Response Agencies) which it mobilises to the site. Control of the HSE services at the site of the Emergency shall be exercised by the Controller of Operations. The Controller of Operations is empowered to make all decisions relating to his/her agency's functions, but must take account of decisions of the On-Site Co-ordination Group in so doing.

## 6.3.1 The Role of the Controller of Operations is set out below:

- To make such decisions as are appropriate to the role of controlling the activities of HSE services at the site (Controlling in this context may mean setting priority objectives for individual services; command of each service should remain with the officers of that service.)
- To meet with the other two Controllers, determine the lead agency and inform Area 1 CMT of this decision
- To undertake the role of On-Site Co-ordinator, where the service s/he represents is identified as the lead agency
- To participate fully in the site co-ordination activity, including the establishment of a Site Management Plan
- Where another service is the Lead Agency, to ensure that HSE operations are co-ordinated with the other Principal Response Agencies, including ensuring secure communications with all agencies responding to the major emergency at the site
- To decide and request the attendance of such services as s/he determines are needed
- To exercise control over such services as s/he has requested to attend
- To operate a Holding Area to which HSE personnel from his/her agency will report on arrival at the site of the major emergency and from which they will be deployed
- To requisition any equipment s/he deems necessary to deal with the incident
- To seek such advice as s/he requires
- To maintain a log of HSE activity at the incident site and decisions made;
- To contribute to and ensure information management systems operate effectively;
- To liaise with and brief the Area 1 CMT on the handling of the major emergency.

## 6.3.2 Other functions of the HSE Controller of Operations

• For most incidents the HSE Controller of Operations will be a designated Ambulance Officer or his or her designated. The Regional Ambulance Plan may contain additional tasks and responsibilities for the HSE Controller of Operations

## SECTION 7 THE COMMON ELEMENTS OF RESPONSE

The common elements of response are as follows:

- 7.1 Declaring a Major Emergency
- 7.2 Initial Mobilisation
- 7.3 Command, Control and Communication Centres
- 7.4 Co-ordination Centres
- 7.5 Communications Facilities
- 7.6 Exercising the Lead Agency's Co-ordination Roles
- 7.7 Public Information
- 7.8 The Media
- 7.9 Site Management Arrangements
- 7.10 Mobilising Additional Resources

#### **Emergency Management West 2024**

- 7.11 Casualty and Survivor Arrangements
- 7.12 Emergencies involving Hazardous Materials
- 7.13 Protecting Threatened Populations
- 7.14 Early and Public Warning Systems
- 7.15 Emergencies arising on Inland Waterways
- 7.16 Safety, Health and Welfare Considerations
- 7.17 Logistical Issues/ Protracted Incidents
- 7.18 Investigations
- 7.19 Community/ VIPs/ Observers
- 7.20 Standing-Down the Major Emergency

## 7.1 Declaring a Major Emergency

## 7.1.1 General

A Major Emergency can be declared by an "Authorised Officer" and the relevant Major Emergency Plans activated by whichever of the Principal Response Agencies (An Garda Síochána, the Health Service Executive or the Local Authority) first becomes aware that a Major Emergency has occurred or is imminent.

A Major Emergency will be declared by an Authorised Officer of the Principal Response Agency which first considers that the criteria set out in the Framework<sup>11</sup> definition of a Major Emergency have been satisfied.

Note: Only an Authorised Officer of a Principal Response Agency (PRA) can declare that a Major Emergency exists.

Please refer to the Common Pages inside the front cover of this Plan, which gives the method of Activation and a typical message to declare a Major Emergency

## 7.1.2 HSE Activation & Authorised Officers

The following HSE staff or their designate acting on their behalf are authorised to declare a Major Emergency and to activate this plan.

- National Ambulance Service General Manager/ Assistant Chief/ Area Operations Manager
- National Ambulance Service National Emergency Operations Centre Manager
- Regional Executive Officers (REOs)
- Acute Hospitals Division CEO/COO
- Chief Officer of CH CDLMS
- Director of Public Health
- Chief Emergency Management Officer

Where an Authorised Officer considers that the criteria set out in the Framework<sup>12</sup> definition of a Major Emergency has been satisfied, that Officer should immediately contact NAS National Emergency

<sup>&</sup>lt;sup>11</sup> A Framework for Major Emergency Management, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

<sup>&</sup>lt;sup>12</sup> A Framework for Major Emergency Management Appendices, 2006 <u>http://mem.ie/wp-</u> content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf

Operations Centre, declare that a Major Emergency exists and request the activation of the HSE Area 1 CMT Major Emergency Plan (covering the geographical areas of counties Donegal, Sligo, Leitrim, Cavan & Monaghan).

This request should be supported by as much information as is available, structured using the METHANE mnemonic.

National Emergency Operations Centre will then initiate the HSE Major Emergency Mobilisation Procedures, which include notifying the other Principal Response Agencies of the declaration of a Major Emergency, using the telephone numbers in the Common Pages.

Once An Garda Síochána and the Local Authority have been notified, they will contact NEOC Centre using the numbers in the Common Pages, to confirm that they have activated their Major Emergency Plans.

The National Emergency Management Office has adopted the process of compulsory notification to its Crisis Management Teams (CMTs) should a Major Emergency Plan be activated in one of the HSE Services. This means that all members of the CMT for that area are notified of the emergency and required to come together on a teleconference to discuss the response and agree further actions for the CMT. This Plan is identical to all other plans in relation to its process of activation: all Major Emergency Plans have two phases of activation.

These two phases of "Alert" are

#### Declaration of Standby:

When a Major Emergency appears likely to occur (adverse weather forecasts terrorist threat or possibility of disease outbreak)

The declaration of a Standby is intended to alert the individual members of the Crisis Management Team that a Major Emergency may occur giving the Team time to assess the situation and time to prepare an appropriate response.

#### Declaration of Major Emergency:

When a Major Emergency has been declared

The declaration of a Major Emergency is intended to confirm to the individual members of the Crisis Management Team that a Major Emergency has been declared.

#### 7.1.3 Garda or Local Authority Activation

Where a Major Emergency is declared by An Garda Síochána or a Local Authority, they will notify National Emergency Operations Centre of the declaration, using the telephone numbers in the Common Pages. National Emergency Operations Centre will then initiate the HSE Major Emergency Mobilisation Procedures.

As part of that process, National Emergency Operations Centre will call An Garda Síochána and the relevant Local Authority, using the numbers on the Common Pages, to confirm that the A1CMT Major Emergency Plan has been activated.

#### 7.1.4 Other Activations

In addition to the declaration of a Major Emergency by one of the Principal Response Agencies, this Plan may be activated in response to a request from a member of the HSE National CMT.

# 7.1.5 Major Emergency Arising at a Hospital, Community Healthcare Organisation (CHO) facility, Department of Public Health or other HSE Facility

In the event that a Major Emergency arises in a HSE facility, the relevant authorised officer at that facility, having declared a Major Emergency at the facility, will contact NAS National Emergency Operations Centre and inform the Controller on Duty of the nature of the incident and that a Major Emergency has been declared at the facility.

NEOC will initiate the HSE's Major Emergency Plan; alert the Area 1 CMT and other PRA's.

## 7.1.6 Response of the HSE to a Major Emergency

The detailed response of the HSE to the declaration of a Major Emergency will depend on the information supplied (in the METHANE Message) and an assessment of the range and scale of HSE resources, which are likely to be required in the response.

Activation of the Emergency Management Area 1 Major Emergency Mobilisation Procedures will include the following:

- The Ambulance Controller on Duty will follow pre-determined National Emergency Operations Centre Procedures which will normally include: - the dispatch of the nearest available ambulance(s) to the scene, notification of appropriate hospitals, notification of the relevant National Ambulance Service personnel, as appropriate as per the control centre protocols.
- The Area 1 CMT will be activated using the text alert system and will meet initially by teleconference, to manage, control and co-ordinate the HSE's overall response to the situation.
- Not all hospitals may be required to act as Receiving Hospitals for casualties from the Major Emergency. Some may be required to support the Receiving Hospital(s) by, for example, taking more non Major Emergency ED traffic. Such Support Hospitals will be notified accordingly.
- If necessary, other resources may be put on stand-by, such as other Hospitals, CH CDLMS services, voluntary organisations, that need extra time to mobilise, as well as services in adjoining Regions. Public health may request additional resources from neighbouring areas, or at a national level through the National Clinical Director for Health Protection.

**Note:** A HSE response will always follow the declaration of a Major Emergency which is made in accordance with the MEM Framework<sup>13</sup>. The extent and detail of that response will depend on the information supplied. As an incident progresses, the HSE response will be managed by the Area 1 CMT. Even if the incident proves to be less serious than first assessed, the HSE response will not normally

<sup>&</sup>lt;sup>13</sup> A Framework for Major Emergency Management Appendices, 2006 <u>http://mem.ie/wp-</u> content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf
be stood down until the Area 1 CMT has issued the appropriate stand down instructions. These instructions will vary depending on the service, department or hospital involved.

# 7.2 Initial Mobilisation

The Major Emergency Mobilisation Procedure (See Appendix 6 of this plan-HSE Mobilisation Procedure) will be implemented immediately on notification of the declaration of a major emergency. When this Plan has been activated, each service requested shall respond, in accordance with predetermined arrangements.

In some situations, there may be an early warning of an impending emergency. Mobilisation within the geographical area of Community Healthcare CDLMS may include moving to a standby/alert stage for some services or specific individuals, until the situation becomes clearer.

There may also be circumstances where the resources or expertise of agencies other than the Principal Response Agencies will be required. In these situations, the relevant arrangements outlined in Section 7.10 of this Plan will be invoked. No third party should respond to the site of a major emergency, unless mobilised by one of the Principal Response Agencies through an agreed procedure.

Depending on the nature of the emergency, mobilisation may involve the dispatch to the site of a Site Medical Officer and, possibly, a Site Medical Team. Decisions on the personnel involved (whether from a hospital or a community based service) will depend on a number of local and event specific factors.

In the event of a Major Emergency being declared initial mobilisation will be carried out by the National Emergency Operations Centre (NEOC). Once the NEOC is satisfied that initial mobilisation is underway a compulsory notification of the Area 1 CMT will be initiated using the text alert system. When the Area 1 CMT is assembled on a conference call either the NAS Duty Controller or NAS Area Operations Manager will brief the Area 1 CMT on the emergency.

# 7.2.1 Process used to alert the Area 1 CMT

Following receipt of a METHANE message the Emergency Medical Controller (NEOC) will initiate the nationally agreed protocol for alerting the Area 1 CMT.

The initial alert is disseminated to each member of the Area 1 CMT via SMS text messaging system.

Each member will be contacted by SMS text, the content of the message will be as follows:

# "Major Emergency Area 1 CMT Consult your Action Card Teleconference in 15 minutes Check message sent time on your phone"

The Area 1 CMT members should consult their **Action Card** and ring the prescribed number contained in their Action Card to participate in the teleconference (*15 minutes from message sent time*).

A full briefing will be given on the teleconference by the lead HSE directorate/division (NAS/Public Health) which is involved in the operational response.

The purpose of this text is to inform the members of the Area 1 CMT that a Major Emergency has occurred or is imminent and to allow them to prepare to respond.

# 7.2.2 Activation Protocol Backup

# In the event of failure of the text system the following protocol will be initiated by the National Emergency Operations Centre (NEOC).

NEOC will phone the Emergency Management Lead for each service/function or their alternate of the Area 1 CMT from a list provided, and relay details pertaining to the Major Emergency.

When the Area 1 CMT is convened, members will cascade the activation through their own directorates as deemed appropriate and deploy resources required.

# 7.2.3 Notification of others

The alerting process has a built in resilience element, when the initial SMS Text message is sent to the Area 1 CMT members an identical message is simultaneously received by:

# • The Assistant National Director for Emergency Management

The NEOC (National Emergency Operations Centre) which receives the declaration from an internal HSE source will then contact the relevant Principal Response Agencies within the area where the incident has occurred and alert them of the HSE activation.

# 7.3 Command, Control and Communication Centres

The NEOC will be the primary means by which the HSE will mobilise its resources at the scene and maintain communications between the site(s), the receiving hospital(s) and Area 1 CMT.

# 7.4 Co-ordination Centres

Co-ordination of the response to a Major Emergency will take place primarily at the site, at the Area 1 CMT's facility and at the Local Co-ordination Centre (Interagency). Each "Receiving" Hospital and each Community Healthcare Organisation (CHO) area have designated facilities from which to manage its response to a Major Emergency.

# 7.4.1 Interagency On-Site Co-ordination Centre

This may be a dedicated vehicle, tent or an adjacent building near the location of the incident site. The three Controllers of Operation will decide on the most suitable location for the On-Site Coordination Centre.

# 7.4.2 Area 1 Crisis Management Team

The Area 1 CMT will meet at:

# Conference Room, Primary Care Centre, Barrack Street, Sligo, Eircode F91 Y8EK beside Markievicz House

In the event that the Major Emergency is specific to the geographical areas of Cavan or Monaghan, and it is deemed necessary to meet at the pre-determined location, the meeting room on first floor of the Primary and Community Building in Blackstone, Cavan Eircode H12TN67 and

# room 61 of the Support Services Building on the St Davnets Campus can facilitate the HSE Area 1 CMT if required.

# 7.4.3 Local Interagency Co-ordination Centre

The Local Co-Ordination Group will meet in whichever of the following Local Co-ordination Centre is most appropriate:

- Donegal County Council, County House, The Diamond, Lifford, Co. Donegal
- Sligo County Council, County Hall, Riverside, Sligo
- Leitrim County Council, Arás An Chontae, Carrick-on-Shannon, Co Leitrim
- Cavan County Council, Cavan Court House, Farnham St, Abbeyland, Cavan.
- Monaghan County Council, The Glen, Glen Road, Killygowan, Co. Monaghan

# 7.4.4 Regional Interagency Co-ordination Centres

In the event that a regional level response is required, the Plan for Regional Level Co-operation may be activated and a Regional Co-ordination Group will meet in whichever of the Local Co-ordination Centres is considered most appropriate. (See Section 9).

# 7.5 Communications Facilities

During a Major Emergency the HSE will use a variety of technical communications facilities for internal and external communications.

# 7.5.1 HSE Communications Systems

All normal communications systems, including telephone, email, mobile telephone and fax, will be used to communicate between the various HSE Centres involved in the response to a Major Emergency, as well as with relevant external agencies, such as the Local Authority, An Garda Síochána, the Department of Health and Children, etc.

The NAS use TETRA Radio System as their means of communication.

# 7.5.2 Inter-Agency Communications On-Site

Inter-Agency Communications On-Site will be facilitated by means of a set of hand portable radios which will be operated on a single channel shared between the three Principal Emergency Services (PES).

# 7.5.3 Communications between the Site and Co-ordination Centres

Communication between the On-Site Co-ordination Group and the Local Co-ordination Group will be facilitated by way of the radio and/or telephone systems available to relevant personnel at the time.

# 7.6 Exercising the Lead Agency's Co-ordination Roles

# 7.6.1 The Lead Agency

For every Major Emergency, one of the three Principal Response Agencies will be designated as the lead agency, in accordance with Section 5.4.2<sup>14</sup> of the Framework, and will assume responsibility for inter-agency co-ordination at both the site(s) and at the Local Co-ordination Centre (in accordance with Section 5.4.3<sup>15</sup> of the Framework).

# 7.6.2 Review and Transfer of the Lead Agency

The lead agency role may change over time, to reflect the change in circumstances of the Major Emergency. Ownership of the lead agency should be reviewed at appropriate stages. All changes in lead agency designation, and the timing thereof, shall be by agreement of the three Controllers of Operation and shall be notified as soon as possible to the Local Co-ordination Group.

# 7.6.3 The HSE as Lead Agency

Where the HSE is assigned the role of lead agency in a Major Emergency in Area 1, it will have responsibility for the co-ordination function, at both the On-Site and the Local Co-ordination Centres. Public health have a significant role in the event of a biological incident. In accordance with Section 5.4.3<sup>16</sup> of the Framework, the co-ordination function includes:

- Ensuring involvement of the three Principal Response Agencies and the principal emergency services in sharing information
- Ensuring involvement of the other organisations, who may be requested to respond, in co-ordination activities and arrangements
- Ensuring that mandated co-ordination decisions are made promptly and communicated to all involved
- Ensuring that site management issues are addressed and decided
- Ensuring that Public Information messages and Media briefings are co-ordinated and implemented
- Ensuring that pre-arranged communication links are put in place and operating
- Operating the generic Information Management System
- Ensuring that the ownership of the lead agency is reviewed, and modified as appropriate
- Ensuring that all aspects of the management of the incident are dealt with before the response is stood down
- Ensuring that a report on the co-ordination function is prepared in respect of the emergency after it is stood down, and circulated (first as a draft) to the other services which attended.

<sup>&</sup>lt;sup>14</sup> Section 5.4.2, *A Framework for Major Emergency Management*, 2006 <u>http://mem.ie/wp-</u> content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

<sup>&</sup>lt;sup>15</sup> Section 5.4.3, A Framework for Major Emergency Management, 2006 <u>http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf</u>

<sup>&</sup>lt;sup>16</sup> Section 5.4.3, *A Framework for Major Emergency Management*, 2006 <u>http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf</u>

With responsibility for co-ordination comes a mandate for decision making, as set out in Section 5.4.4<sup>17</sup> of the Framework. The purpose of this mandate is to make explicit the decisions that need to be made at the appropriate level and to define how decisions are to be arrived at quickly. Associated with this empowerment is the need for individuals holding key roles to hear the views of colleagues in Principal Response Agencies and to use the Information Management System as part of the decision making process. The decision making mandate does not empower unilateral decision making until the views of the other agencies have been heard and considered.

Where the HSE is assigned the lead agency role, the responsibilities involved will be discharged:

- At the site, by the National Ambulance Service, on behalf of the HSE, supported by public health if required
- At the Local Co-ordination Centre, by the Chief Officer or designate on behalf of the HSE

# 7.7 Public Information

During a Major Emergency situation it will be crucial for the Principal Response Agencies to provide timely and accurate information to the public. This will be especially important for members of the public who may perceive themselves and their families to be at risk and who are seeking information on the actions which may be taken to protect themselves and their families.

Initial public information messages will be issued by the On-Site Co-ordination Group but, once the Local Co-ordination Group has met, it will take over the task of co-ordinating the provision of public information. Public information may be disseminated by means of local and national media outlets - help lines, web pages, Social Media and automatic text messaging. This activity should be co-ordinated on behalf of the Local Co-ordination Group by the lead agency and will be in accordance with the North West MEM Interagency Public Communications plan.

# 7.7.1 Role of HSE – Public Information

In emergency situations where there is a real or perceived threat to the health of individuals or the general public, the HSE, and in particular the Department of Public Health service, can play a crucial role in the development of appropriate advice, information and reassurance for both individuals and communities. To this end, it is important that the appropriate specialists within the HSE are notified and consulted at the earliest opportunity, so that their input to public information messages can be optimised. The quality of the public health medical advice is dependent on the accuracy of the information provided to them to feed into the risk assessment.

<sup>&</sup>lt;sup>17</sup> Section 5.4.4, *A Framework for Major Emergency Management*, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

# 7.8 The Media

The West Interagency Region has an Interagency Public Communications Plan – Media Liaison. Each of these plans follows a standard template outlining the Regions arrangements for communications during a Major Emergency. These are detailed under the following headings:

- Section 1: Introduction to the plan
- Section 2: Response
- Section 3: Roles and Responsibilities
- Section 4: Information Processing
- Section 5: Stand Down and Protocols
- APPENDICES including Directory of Contacts

All Communications processes during a major emergency will follow the Interagency Public Communications Plan. Please see Appendix 7 of this plan for North West Interagency Public Communications Plan.

# 7.9 Site Management Arrangements

These will be as per the MEM Framework and as set out in section 7.9.2.<sup>18</sup>

# 7.9.1 Actions of First Officer Attending

The first National Ambulance Service Crew/Manager to arrive at the site will, de facto, have the role of HSE Controller of Operations at the scene until relieved. The immediate concerns and actions of this officer, in addition to specific National Ambulance Service issues, should include:

- Continuing to gather information on the extent of the incident;
- Providing information on the emergency to NAS National Emergency Operations Centre, for distribution to the Area 1 CMT and other relevant health service managers and facilities;
- Meeting with the other Controllers of Operations to agree on the lead agency and, therefore, the On-Site Co-ordinator; and
- Establishing inter-agency communication links.

The first ambulance vehicle that arrives at the scene will become the HSE Control Point, until the Controller of Operations declares otherwise; a dedicated incident command vehicle may take over the control function when it arrives. The Controller of Operations should ensure that, where possible, the HSE Control Point is co-located with the Control Points of the other emergency services to form the initial Site Control Point.

The Ambulance that acts as the HSE Control Point will be the only ambulance that has a blue warning beacon illuminated. All other ambulance vehicles will turn off their blue lights to facilitate easy identification of the control vehicle.

# 7.9.2 General Site Management Arrangements

An initial important task of the HSE Controller of Operations, in association with the other two Controllers, is to match the components of the typical Site Plan, set out in Figure 7.1, with the terrain of the Major Emergency. Once agreed, the resulting Site Management Plan should be disseminated for implementation, to all responding organisations.

<sup>&</sup>lt;sup>18</sup> Section 7.9.2, *A Framework for Major Emergency Management*, 2006 http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf

# Figure 7.1 Typical Site Management Arrangements

The Body Holding Area and the Holding Areas of the responding services can be located on Figure 7.1 above. A Traffic Cordon is used to prevent congestion at and around the site and thereby ensure the free passage of emergency response vehicles into and out of the site.

HSE staff should only attend the scene when deployed by their service.

# 7.9.3 Control of Access

In order to control access to a Major Emergency site, cordons should be established as quickly as possible, to facilitate the operations of the emergency services, to protect the public and to protect evidence.

Depending on the terrain involved, An Garda Síochána, in consultation with the On-Site Co-ordination Group, will establish up to three cordons, including an Inner Cordon, an Outer Cordon and a Traffic Cordon.

In general, an Inner Cordon is used to define the area where the emergency services work to rescue casualties and survivors and deal with the substance of the emergency. An Outer Cordon is used to define an area, between the Inner and Outer Cordons, where the Site Control Point, the On-Site Coordination Centre, the Casualty Clearing Station, the Ambulance Loading Area, the Body Holding Area and the Holding Areas of the responding services can be located. A Traffic Cordon is used to prevent congestion at and around the site and thereby ensure the free passage of emergency response vehicles into and out of the site.

# 7.9.4 Danger Area

A Danger Area may be declared where there is a definite risk to rescue personnel, over and above that which would normally pertain at emergency operations. This risk could arise because of danger posed by the release of hazardous materials, buildings in danger of further collapse, the threat of explosion, or the presence of an armed individual. In such a situation, the On-Site Co-ordination Group may decide to declare a Danger Area and may designate an officer, appropriate for the circumstances (e. Senior Fire Officer at the Site), to define the boundaries of, and control access to, the Danger Area.

# 7.9.5 Identification

All uniformed personnel, responding to the site of a Major Emergency, should wear the prescribed uniform, including high visibility and safety clothing, issued by their agency. Officers who are acting in key roles, such as the Controller of Operations, should wear the appropriate tabards, which in the case of the HSE has a green and white chequered pattern and the words "HSE Controller". The corresponding tabards for the other Principal Response Agencies are as follows: Local Authority, red and white with "Local Authority Controller" and An Garda Síochána, blue and white with "Garda Controller".

When the lead agency has been determined, the On-Site Co-ordinator should don distinctive tabards with the words "On-Site Co-ordinator", clearly visible, front and back. Where non uniformed HSE personnel are required to respond to the site of a Major Emergency, they should wear a high visibility jacket, appropriately colour coded for the HSE, with their job/function clearly displayed both front and back.

# 7.9.6 Helicopters

Helicopters may be used at the site of a Major Emergency to provide aerial reconnaissance, to ferry people or equipment to the site, to remove casualties or to transport them to distant facilities. However, the use of helicopters has to be integrated into the overall site management arrangements to avoid having a negative impact on operations on the ground. The On-Site Co-ordinator will, in consultation with the other Controller of Operations, determine if, and for what purpose, helicopter support should be mobilised to the site and the preferred Landing Zone(s) for them. No helicopters should travel to the site of a major emergency unless mobilised through this arrangement.

# 7.9.7 Air Exclusion Zone

Where the Principal Response Agencies consider it appropriate and beneficial, the On-Site Coordinator may request, through An Garda Síochána, that an Air Exclusion Zone be declared around the emergency site by the Irish Aviation Authority. When a restricted zone above and around the site is declared, it is promulgated by means of a "Notice to Airmen – NOTAM" – from the Irish Aviation Authority.

# 7.10 Mobilising Additional Resources

# 7.10.1 General

During the response to a Major Emergency, the HSE may need to mobilise additional resources and this can be achieved either by:

- Activating resources from parts of HSE, which are not primarily involved in the Major Emergency
- Mobilising assistance from other organisations;
- Seeking national/international assistance as appropriate.
- In certain circumstances, the HSE may request assistance from private healthcare facilities in the locality.

# 7.10.2 HSE Resources

In the event of a Major Emergency, the various services involved, including the National Ambulance Service and the Acute Hospitals Division may be in a position to activate resources from other areas to provide appropriate support, which are not primarily involved in the emergency. This process can be facilitated and augmented by the Area 1 CMT.

# 7.10.3 The Defence Forces

The Defence Forces can provide a significant support role in a major emergency response. The Defence Forces capabilities can be employed across a wide spectrum of activity in a major emergency. However, these capabilities are primarily deployed in a military role at home and in peace support operations overseas and their deployment in a major emergency situation may require a lead in time to facilitate redeployment. All requests for Defence Force assistance by the HSE should normally be be channelled through An Garda Síochána. The Area 1 CMT can make a request directly for Defence Force assistance using the standard "aid to the civil authority" request format. (Appendix 8 and 9)

# 7.10.4 Links with Voluntary Emergency Services

The following table shows the links between the PRAs and the Voluntary Emergency Services.

Principal Response Agency	Linked Voluntary Emergency Service
An Garda Síochána	Irish Mountain Rescue Association
	Irish Cave Rescue Association
	Search and Rescue Dogs
	Sub-Aqua Teams
	Coast Guard
	RNLI
Health Service Executive	Irish Red Cross
	Order of Malta Ireland
	St. John Ambulance Brigade
Local Authority	Civil Defence

 Table 7.1.
 Principal Response Agencies with Linked VES

Each Principal Response Agency with a linked Voluntary Emergency Services is responsible for the mobilisation of that service and their integration into the overall response. The mobilisation of the VES by the HSE will be coordinated through National Emergency Operations Centre (NEOC). The internal command of each volunteer organisation resides with that organisation.

# 7.10.5 Utilities

Utilities are frequently involved in the response to emergencies, usually to assist the Principal Response Agencies in making situations safe. They may also be directly involved in restoring their own services, for example, electricity supply in the aftermath of a storm. Utilities operate under their own legislative and regulatory frameworks but, during the response to an emergency, they need to liaise with the On-Site Co-coordinator. Utilities may be requested to provide representatives and/or experts to the On-Site Co-ordination Group, the Local Coordination Group and/or the Regional Co-ordination Group, as appropriate.

Private sector organisations may be involved in a major emergency through ownership of the site where the emergency has occurred or through ownership of some element involved in the emergency e.g. an aircraft, bus, factory, etc. They may also be called on to assist in the response to a major emergency, by providing specialist services and/or equipment. Private sector representatives and/or experts may be requested to support the work of the On-Site Co-ordination Group, the Local Co-ordination Group and/or the Regional Co-ordination Group, as appropriate.

# 7.10.6 National, International Assistance

Where resources that are controlled at a national level are required, as part of the management of the incident, requests for those resources should be directed by the lead agency to the Lead Government Department.

Any decision to seek assistance from outside the state should be made by the lead agency, in association with the other Principal Response Agencies, at the Local Coordination Centre. The Local Co-ordination Group should identify and dimension the level/type of assistance likely to be required and its duration.

In the event of a major public health incident, public health will notify the National Clinical Director for Health Protection for any additional resources required. In addition, the public health service in Ireland has a contract with Public Health England – Centre for Radiation, Chemicals and Environmental Hazards (PHE-CRCE) to provide 24/7 advice and support. The European Community has established a Community Mechanism to facilitate the provision of assistance between the member states in the event of major emergencies. The chair of the Local/Regional Coordination Group should make requests for such assistance to the National Liaison Officer in the Department of Housing, Planning, Community and Local Government.

# 7.11 Casualty and Survivor Arrangements

# 7.11.1 General

The primary objective of any response to a Major Emergency is to provide effective arrangements for the rescue, care, treatment and rehabilitation of all of the individuals who are affected by the emergency. While the HSE is not a primary rescue service, it has responsibility for the transport and treatment of injured persons, once they have been rescued.

# 7.11.2 Casualties

Once casualties have been rescued or found, they will be assessed or triaged as quickly as possible. Triage is a dynamic process of assessing casualties and deciding the priority of their treatment, including a two stage process of triage sieve and triage sort. Following initial triage, casualties will normally be labelled, using Triage Cards, and moved to a Casualty Clearing Station. The purpose of this labelling is to indicate the triage category of the casualty, to facilitate the changing of that category, if required, and to record any treatment, procedure or medication administered. A standard card with Red (Immediate), Yellow, (Urgent), Green (Minor) and White (Dead) sections is normally used for this purpose.

The National Ambulance Service, in consultation with the HSE Controller of Operations and the Site Medical Officer will establish a Casualty Clearing Station at the site, where casualties will be collected, further triaged, treated, as necessary, and prepared for transport to hospital. The HSE Controller will, in consultation with the Site Medical Officer and the relevant hospitals, decide on the hospital(s), to which casualties are to be brought, the Receiving Hospital(s), and, on the basis of their condition, the distance and the capacity of available hospitals. In the event of a protracted incident, with significant numbers of casualties, the Area 1 CMT may become involved in this process.

# 7.11.3 Fatalities

The bodies of Casualties, which have been triaged as dead, should not be moved from the incident site unless this is necessary to affect the rescue of other casualties or to prevent them being lost or damaged. The recovery of the dead and human remains is part of an evidence recovery process and, as such, is the responsibility of An Garda Síochána, acting as agents of the Coroner. [See Appendix 10 of this document the role of the Coroner.]

The On-Site Co-ordinator, in association with the other Controllers, will decide if it is necessary to establish a Body Holding Area at the site. This Body Holding Area, if established, will be situated close to the Casualty Clearing Station.

An On - Site Body Holding Area is not an appropriate place for the prolonged storage of dead bodies. These will be moved as soon as possible to an appropriate mortuary. However, in any Major Emergency involving a large number of fatalities, it is likely that a Temporary Mortuary will be required. The decision to establish a Temporary Mortuary will be made by the Local Co-ordination Group in consultation with the Coroner. The provision of such a Temporary Mortuary is the responsibility of the Local Authority. The West Interagency region has specific arrangements outlined in their "Mass Fatality Protocols" A copy of these protocols are available from the Emergency Management Office by request.

# 7.11.4 Survivors

In certain circumstances, the On-Site Co-ordinator, in conjunction with the other Controllers, may decide that a Survivor Reception Centre is required. All those who have survived the incident uninjured will be directed to this location, where their details will be documented and collated by An Garda Síochána. The Local Authority is responsible for the establishment and running of such centres.

# 7.11.5 Casualty Bureau

In the event of a major emergency involving significant numbers of casualties, An Garda Síochána will establish a Casualty Bureau to collect and collate the details (including condition and location) of all casualties and survivors. As part of this process, a Casualty Liaison Officer or team will normally be sent by An Garda Síochána to each Receiving Hospital where casualties are being treated. All potential Receiving Hospitals have arrangements in place to facilitate An Garda Síochána in this process. (Appendix 10 of this document Garda Casualty Bureau)

# 7.11.6 Friends' and Relatives' Reception Centres

Some emergencies may warrant the establishment of Friends' and Relatives' Reception Centre's at appropriate locations associated with the emergency, these centres will be established through the coordination groups, with local authorities responsible for identifying locations, the HSE meeting any health needs including the provision of psychosocial advice & support and the Gardai coordinating information and security related matters. All potential Receiving Hospitals have arrangements in place to establish and staff a Friends' and Relatives' Reception Centre outlined in their Major Emergency Plans.

## 7.11.7 Non- Irish -National Casualties

It is possible that some Major Emergencies may involve significant numbers of casualties from other jurisdictions and it is important that provision is made for any resulting issues of language and culture differences. All potential Receiving Hospitals have arrangements in place to secure translators and to deal, as far as practical, with cultural sensitivities.

#### 7.11.8 Pastoral Care

The On-Site Co-ordinator has responsibility for ensuring that, where appropriate, pastoral services are mobilised to the site and facilitated by the Principal Response Agencies in their work with casualties and survivors. Similarly, individual hospitals have arrangements for the provision of pastoral services.

#### 7.11.9 Psycho-Social Care

It is generally recognised that being involved in abnormal, traumatic events, such as occur at major emergencies, can cause serious but normal stress reactions for the individuals involved. Those affected can include those who are injured, those who are involved with the event but not physically injured, persons who witness aspects of the emergency, individuals involved in rescue and recovery, including volunteers, as well as many other individuals involved in the response, such as those working with bodies, with severely injured casualties and with bereaved families. It is accepted that the provision of practical help and information as well as social, emotional and psychological support, frequently referred to as psycho-social support, to such individuals is an important objective of any emergency response. The HSE will provide psychosocial support to all staff involved in an emergency response via the Employee Assistance Programme

The HSE also has responsibility for the provision of psycho-social support to members of the public who may be affected by an emergency. The HSE Controller of Operations at the site and the relevant Area 1 CMT, in consultation with colleagues from the other Principal Response Agencies, will establish the likely nature, dimensions, priorities and optimum locations for the delivery of any psycho-social support that may be required in the aftermath of a major emergency. Leadership in this area will be provided by the Director of Psychology.

# 7.12 Emergencies Involving Hazardous Materials

Hazardous material incidents pose specific issues for the principal emergency services and for that reason, special arrangements are required. These incidents can occur either because of deliberate or accidental events. The Local Authority is the lead agency for response to normal hazardous material incidents, with the exception of those involving biological agents, where the HSE is the lead agency.

# 7.12.1 Lead Agency

The On-Site Co-ordinator, in association with the other Controllers of Operations, will establish the need for decontamination. Public health can advise on the appropriate decontamination method. The preferred decontamination method is:

- Disrobe
- Dry decontamination is the default decontamination method
- Wet decontamination for caustic substances / or where biological or radiological exposure is identified

The HSE has responsibility for providing clinical decontamination and medical treatment to casualties affected by hazardous materials. The fire services have responsibility for providing other forms of physical decontamination of persons at the site. The HSE will be responsible for decontamination where required to protect health service facilities, such as hospitals, from secondary contamination. Where emergency decontamination of the public is required, the fire service may use its fire-fighter decontamination facilities, or improvised equipment may be used prior to the arrival of dedicated equipment. Where persons have to undergo this practice it should be carried out under the guidance of medical personnel. It should be noted that emergency decontamination carries risks for vulnerable groups, such as the elderly and the injured.

The On-site Co-Ordinator will take the decision on how best to protect a threatened population, after consultation with the other Controllers of Operations. This protection is usually achieved by moving people temporarily to a safe area, by evacuation where appropriate or feasible, or by advising affected individuals to take shelter in an appropriate place. Details of procedures for warning and informing the public are contained in the North- West Interagency Public Communication Plan (Appendix 7)

# 7.12.2 Suspect Chemical Biological Radiological Nuclear & Explosives (CBRNE) Incidents

Where terrorist involvement is suspected, An Garda Síochána will act as the lead agency. The Defence Forces, when requested, will assist An Garda Síochána in an Aid to the Civil Power role with Explosive Ordnance Disposal teams. Public health inputs into the Joint Threats Analysis where a credible CBRNE threat cannot be discounted.

Details of specific actions to be taken in the event of a suspect CBRNE incident are contained in the *Protocol for Multi-Agency Response to Suspect Chemical and Biological Agents arising from terrorist activity.* 

# 7.12.3 Biological Incidents

Contaminated casualties pose a particular problem for the HSE, since, although decontamination facilities may be mobilised to the site, there is a strong possibility that contaminated individuals may present independently at local hospitals, with a consequential threat to the health and safety of staff and the capacity of the facility to continue to receive further casualties and to treat existing patients. In this situation, it is critically important that casualties are directed and health service decontamination resources are deployed in a manner which is not only the optimum for the treatment of casualties but also protects health service facilities and staff from contamination. Consultation and co-ordination between the HSE Controller of Operations, the Area 1 CMT and the management of Receiving Hospitals is vital to the achievement of this aim.

Where it is thought that casualties may have been contaminated with a biological substance, public health is responsible for arranging chemoprophylaxis of those exposed. The details from the Casualty Information Forms should be provided to public health to facilitate this process.

# 7.12.4 Infectious Diseases Outbreaks

Details of specific actions to be taken in the event of an outbreak will be mandated by the Department of Public Health. The Health Protection Surveillance Centre (HPSC) will provide advice and guidance. Under Medical Officer of Health (MOH) legislation public health can take whatever steps are required to control outbreaks.

# 7.12.5 Nuclear Incidents

Details of specific actions to be taken in the event of an activation of the National Emergency Plan for Nuclear Accidents are detailed in the *Protocol for Multi-Agency Response to Radiological/ Nuclear Emergencies.* 

# 7.13 Protecting Threatened Populations

The scale and nature of a Major Emergency will determine whether evacuation of the public from a particular area is necessary, or whether they should be advised to remain indoors for shelter.

It is the responsibility of the local authorities to provide Rest Centres for evacuated populations.

It is the responsibility for local authorities to provide mortuary facilities for the dead.

When decided upon, the process of evacuation will be undertaken by An Garda Síochána, with the assistance of the other services.

The Garda Controller of Operations at the scene in consultation with the HSE and Local Authority will be responsible for ordering and effecting the evacuation. The extent and duration of the evacuation will be based on the advice received. The principle that the estimated duration of the evacuation should be considered before evacuation is implemented should be adhered to as far as possible.

Emergency Accommodation is identified in the relevant local authority's major emergency plan.

Additional guidance on evacuation is provided in A Guide to Managing an Evacuation<sup>19</sup>.

The role of the Department of Public Health Service in protecting threatened populations in regard to infection control or adverse effects of environmental issues both acute and long-term is significant. Contact details of those potentially exposed to hazardous material should be provided to public health to allow them to complete follow up surveillance and monitoring if indicated.

The Director of Public Health/ Specialist in Public Health Medicine as MOH will exercise control in these circumstances through existing structures and via the Area 1 CMT.

<sup>&</sup>lt;sup>19</sup> A Framework for Emergency Management – Guidance Document 6 - A Guide to Managing Evacuation and Rest Centres, Version 2 October 2015 <u>http://mem.ie/wp-content/uploads/2016/01/A Guide to Evacuation 20151.pdf</u>

# 7.14 Early and Public Warning Systems

An early warning system for severe weather is currently in place for Severe Weather forecasts. This is a 24-hour service provided by Met Éireann. During a Major Emergency there may be a need for the site or Local Co-ordination Group to inform the public of a current or threatened situation or of a possible evacuation. *Please refer to Section 11.1 of this document*.

Other such warning systems are in place for Flooding, detailed in the Flood Response Plans, Water contamination etc.

Major Emergency Warnings -During a Major Emergency, it may be necessary to inform and warn the public of a current or threatened situation which may result in the need for some action, for example, evacuation.

# Methods of Dissemination

Warnings may be disseminated to the public by use of some or <u>all</u> of the following methods:

- Door to Door
- Radio and T.V. broadcasting
- Local helpline / information line
- Web services and internet services
- Social Media
- Automated Text services
- Establish site specific warning systems

The detail of how this is implemented is detailed the West Interagency Public Communications Plan (Appendix 7 of this document).

# 7.15 Emergencies arising on Inland Waterways

The HSE National Ambulance Service may be asked by An Garda Síochána or the Coast Guard to assist in emergencies arising on inland waterways. They will normally do this by providing Ambulances and personnel to a pre-arranged location. It is important to note that HSE National Ambulance Service personnel are not equipped or trained to deal with emergencies involving search and rescue of casualties involved in emergencies on inland waterways.

# 7.16 Safety, Health and Welfare Considerations

The scene of a major emergency normally results from a dangerous occurrence and may, depending on the circumstances be an area of serious, imminent and unavoidable danger. HSE employees and voluntary agencies acting under their control, in this instance are engaged in activity relating to a civil emergency.

Every member of the HSE and voluntary agencies acting under their control shall ensure, so far as is reasonably practicable, the safety, health and welfare at work of his or her follow workers.

In particular the HSE controller at the scene shall as far as is reasonably practicable ensure that in the course of the work being carried by individuals under their control are not unnecessarily exposed to risks to their safety, health or welfare.

The controller at the scene will make an initial assessment of the risks presented by the hazards observed at the scene. It is important that the controller maintains a dynamic risk assessment process and may if he or she determines it is necessary designate a specific person to act in this role and advise on health and safety considerations.

If it is advised that there is serious and imminent deterioration in the hazards at the scene the controller of operations shall take action and give instructions to enable personnel to immediately leave the danger area and to proceed to a safe place.

In as far as is reasonably practicable the HSE controller of operations at the scene will ensure that the HSE staff and voluntary agencies acting under their control have training, including, in particular, information and instructions relating to the specific task to be performed.

Each member of the HSE and voluntary agencies acting under their control must as far is reasonably possible comply with relevant safety and health instructions, wear appropriate personal protective clothing where necessary cooperate with the controller of operations, look out for one another, and not do anything which would place themselves or others at risk.

They must not be under the influence of an intoxicant at the scene to the extent that the condition he or she is in is likely to endanger his or her own safety, health or welfare or that of any other person.

In a protracted incident consideration must be given to the organisation of time spent working at the scene and adequate rest periods must be taken into consideration both by the controllers at the scene and those engaged in the response to the incident.

- Command support arrangements at the scene should assign responsibility for the oversight and management of the safety of rescue personnel
- Danger Area: On arrival at the site, the HSE Controller of Operations should establish from the On-Site Co-ordinator (or the other two Controllers, where the On-Site Co-ordinator has not yet been designated) if a Danger Area has been defined and, if so, what particular safety provisions may apply. This issue should be kept under constant review by the On-site Coordinator and supporting Controller of Operations.
- Where there is a definite risk to personnel, over and above that which would normally pertain at emergency operations, a Danger Area may be declared. This risk could arise because of dangers posed by the release of hazardous materials, buildings in danger of further collapse, the threat of explosion or the presence of an armed individual. Any HSE Officer/ Responder who was aware of such additional risks should bring them to the attention of the On-Site Coordinator via the HSE Controller of Operations.
- Where it is necessary that HSE personnel continue to operate in a Danger Area, they should apply normal incident and safety management arrangements, and relevant officers should continue to exercise command /control over HSE personnel working in the Danger Area.
- Where a situation deteriorates to a point where the officer in charge of the Danger Area decides that it is necessary to withdraw response personnel from a Danger Area, a signal, comprising repeated sounding of a siren for ten seconds on, ten seconds off, will be given. All personnel should withdraw from the Danger Area on hearing this signal.

# 7.17 Logistical Issues/ Protracted Incidents

# Arrangements for Rotation of Staff etc. at the Site(s)

During protracted emergencies it is important that front line field staff are relieved and rotated at regular intervals, particularly in situations which increase the stress on responders, for example, extreme heat or cold. The provision of relief staff, to replace those who have been on duty for some time, is a matter for discussion and agreement between the support staff of the HSE Controller at the Site, Ambulance Control and the Area 1 CMT.

- Hospital arrangements are contained in the relevant hospital plan.
- The Local Authority is responsible for the provisions of appropriate rest and refreshment facilities for all response personnel at the site(s) of a major emergency, as well as for survivors. These facilities may include the provision of food and drink, rest facilities and sanitary facilities.

# 7.18 Investigations

- An Garda Síochána is responsible for carrying out investigations when a crime has been identified in a Major Emergency.
- The scene of a suspected crime will be preserved by An Garda Síochána until a complete and thorough examination has been made. An Garda Síochána will need to obtain evidence of the highest possible standard and will require that all evidence is left in situ, unless a threat to life or health prevents this. Statements may be required from the staff of other Principal Response Agencies regarding their involvement.
- Subsequent investigations by An Garda Síochána will be carried out in accordance with best policies and the Garda Code.
- Other parties with statutory investigation roles.
- Depending on the nature of the Major Emergency, agencies other than An Garda Síochána may require access to the site for the purposes of carrying out an investigation. These agencies include the Health and Safety Authority (HSA), the Air Accident Investigation Unit (AAIU) and the Environmental Protection Agency (EPA).
- All HSE employees are requested to co-operate fully with all statutory investigations and to ensure that, unless a threat to life or health prevents this, all evidence is left undisturbed.

# 7.19 Community/ VIPs / Observers

# 7.19.1 Community Links

Where communities are affected by a Major Emergency, the Principal Response Agencies, operating within the Local Co-ordination Group, will make every effort to establish contact/links with the relevant communities, utilising established links or developing new ones as appropriate.

## 7.19.2 Visiting VIPs

All requests for visits to the site, or facilities associated with it should be referred to the Local Coordination Group. Requests for visits to HSE locations, such as the hospitals where casualties are being treated, should be referred to the Area 1 CMT.

Visits by dignitaries usually require extra security arrangements and liaison with the media. It is important that the organisation of such visits does not distract from the response effort. As a general rule, VIPs should be advised not to visit sites where danger still exists or where on-going rescues are in progress.

# 7.19.3 National/International Observers

Requests may be received from national and/or international observers who may wish to observe the response operations. The presence of experts from other regions or jurisdictions, who wish to act as observers at an incident, can greatly enhance the operation of debriefings and facilitate the process of learning lessons from an emergency. The Local Co-ordination Group will normally make arrangements for any such observers. However, specific health related observers may be facilitated by the Area 1 CMT.

#### 7.20 Standing-Down the Major Emergency

#### 7.20.1 Stand-Down at the Site

The decision to stand-down the Major Emergency status of an incident at the site will be taken by the On-Site Co-ordinator, in consultation with the other Controllers of Operations at the site and the Local Co-ordination Group. It is important to note that a great deal of activity may continue (for example, at hospitals, the temporary mortuary, etc.) after the Major Emergency is stood down at the site.

Each HSE service, department and hospital has a stand down procedure included in the relevant mobilisation action card. The Area 1 CMT has the responsibility of issuing the appropriate stand down instructions. These instructions will vary with the service, department or hospital depending on the requirement and may not apply to all elements of the HSE simultaneously and therefore all HSE personnel are instructed to only act on a stand-down instruction issued via the same communications route through which mobilisation or activation was received.

#### 7.20.2 Stand-Down of the HSE

As the situation is brought under control and casualties leave the site, the HSE Controller of Operations should review the resources on the site and reduce/ stand-down these resources, in light of the changing situation. The Controller should ensure that, where other organisations have been mobilised to the site by the HSE, these should be informed of the decision to stand them down; likewise, services operating at other locations. The On-Site Co-ordinator should be consulted before any service is stood down by the HSE. Each HSE service involved in the response must be stood down by the Senior Manager of the Service, Services may Stand Down at different times depending on the demand of their element to the response.

# 7.20.3 Operational debriefing and reporting activity

Each HSE Service which is involved in a response to a Major Emergency should carry out an operational debriefing of its involvement and document this debriefing in a report to the Regional Emergency Management Steering Group. The Regional Emergency Management Steering Group should review these reports and prepare a composite report to reflect the overall involvement of the HSE.

The HSE should also engage with the other Principal Response Agencies in a review of the inter-agency co-ordination aspects of the response. This review should be hosted by the lead agency and should involve all services which were part of the response. A composite report should be compiled by the Principal Response Agency which was the initial lead agency for submission, within a reasonable time scale, to the relevant Regional Interagency Steering Group and the National Interagency Steering Group.

The purpose of the above reviews should be to formulate lessons learned from the incident and the resulting reports should highlight these.

# SECTION 8 AGENCY SPECIFIC ELEMENTS AND SUB-PLANS

This Plan has a series of supporting plans from:

- The National Ambulance Service
- The Acute Hospitals Division
- CH CDLMS(CHO 1)

These plans are listed in Appendix 11 of this plan.

# SECTION 9 PLAN FOR REGIONAL LEVEL CO-ORDINATION

# 9.1 Introduction

In some situations where a major emergency has been declared and the Major Emergency Plans of the Principal Response Agencies have been activated, it may be appropriate to consider scaling up from a local response to a regional level response.

This may occur when the resources available in the local area where the incident has happened do not appear to be sufficient to bring the situation under control in an expeditious and efficient manner; or the consequences of the emergency are likely to impact significantly outside of the local area; or the incident(s) is spread across more than one Local Authority or Division of An Garda Síochána; or the incident occurs at or close to a boundary of several of the Principal Response Agencies.

# 9.2 Regional Response

# 9.2.1 Decision to Scale up to a Regional Level Response

The decision to scale up from a local to a regional level response will be taken by the chair of the Local Co-ordination Group, in consultation with the chair of the On-Site Co-coordinating Group and the other members of the Local Co-ordination Group. This consultation may occur at a meeting of the Local Co-ordination Group, where such a group is in session or, alternatively, by means of a telephone conference call.

This decision will, by definition, involve specifying those extra Principal Response Agencies which are to be involved in the regional response.

**Note:** In many Major Emergency situations, neighbouring Garda Divisions, HSE Areas and Local Authorities will provide support and resources to the Garda Division, HSE Area and Local Authority, which are primarily involved in the response. Such support is not equivalent to the activation of the Plan for Regional Level Co-ordination and, in fact, will often precede the activation of the regional plan.

# 9.2.2 Response Region

The areas covered by the Principal Response Agencies which are activated under the Plan for Regional Level Co-ordination will constitute the response region for the emergency.

**Note:** The response region for a regional level major emergency need not coincide (and in many cases will not coincide) with one of the predetermined Major Emergency Management Regions set out in Appendix F4<sup>20</sup> of the Framework.

In situations where more than one principal response agency from a particular service is represented at the site, Appendix F7 to the Framework for Emergency Management<sup>21</sup> makes it clear that there will be only one Controller of Operations from that service and the unit from which the Controller of Operations will come should be determined in accordance with the guidance provided in Appendix F7<sup>22</sup>

# 9.2.3 Activation

Once the decision has been taken, the chair of the Local Co-ordination Group will declare that a regional level emergency exists and will activate the Plan for Regional Level Co-ordination by:

- Notifying each of the Principal Response Agencies involved that the Plan for Regional Level Co-ordination has been activated;
- Requesting that each of the Principal Response Agencies, which has not already activated its MEM Plan, should do so;
- Delivering an information message to each Principal Response Agency using the mnemonic METHANE; and
- Providing each of the Principal Response Agencies involved with a list of the agencies which are being activated to form the regional response

# 9.3 Command Control and Co-ordination of Response

• Command and Control Arrangements on Site

The command and control arrangements at the site(s) of a regional major emergency will be the same as those for a standard major emergency including:

- Three Controllers of Operation
- A lead agency determined in accordance with the Framework<sup>23</sup> and
- An On-Site Coordinating Group
- An On-Site Co-ordinator
- The Regional Co-ordination Group

<sup>&</sup>lt;sup>20</sup> Appendix F4, A Framework for Major Emergency Management Appendices, 2006 <u>http://mem.ie/wp-</u> <u>content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf</u>

<sup>&</sup>lt;sup>21</sup> Appendix F7, A Framework for Major Emergency Management Appendices, 2006 <u>http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf</u>

<sup>&</sup>lt;sup>22</sup> Appendix F7, A Framework for Major Emergency Management Appendices, 2006 <u>http://mem.ie/wp-</u> <u>content/uploads/2015/05/A-Framework-For-Major-Emergency-Management-Appendices.pdf</u>

<sup>&</sup>lt;sup>23</sup> A Framework for Major Emergency Management, 2006 <u>http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf</u>

The mobilisation and operation of the Regional Co-ordination Group will be as per the arrangement for Local Co-ordination Groups set out in 5.4.5.2<sup>24</sup> in the Framework Document. Regional Co-ordination Group arrangements should be made for

- The mobilisation of other organisations /agencies
- Requesting mutual aid from neighbours
- Requesting national/international assistance where required
- Dealing with multi-site or trans-boundary emergencies
- Linkage to national emergency plans
- Links with Government
- Support for chairs by Information Managers, etc. and communication arrangements with the site and with other groups will be as for a Local Co-ordination Group.

# 9.4 Trans-boundary Major Emergencies

Some Major Emergency events (e.g. severe storms, extensive flooding and/or blizzards) may affect a significant geographical area crossing CHO and county boundaries, in such a situation, a number of Local Co-ordination Groups may be activated. Where the chair of a Local Co-ordination Group, which has been activated in response to a major emergency, becomes aware that one or more other Local Co-ordination Groups have also been activated, contact should be made with the other chair(s) with a view to considering the establishment of a Regional Co-ordination Centre.

Such a Regional Co-ordination Centre will normally be located at the Local Co-ordination Centre which, in the view of the chairs, is best positioned (in terms of resources, communications and geography) to co-ordinate the activity of the different Local Co-ordination Groups which are active. In such a situation, these Local Co-ordination Groups will continue to act as per standard arrangements and will communicate with the Regional Co-ordination Centre through their chairs.

**Note:** During a trans-boundary Major Emergency, each Local Co-ordination Group will be in contact with the lead Government Department (in accordance with Section 5.4.5.5<sup>25</sup> of the Framework) and, in such a situation, the decision on whether the activities of a number of Local Co-ordination Groups should be co-ordinated via a Regional Co-ordination Centre or via the lead Government Department will be taken in light of the prevailing circumstances. The HSE at a national level, or another national body, may request the activation of this Plan and call upon HSE Areas to assist in responding to, or to perform its normal function/role arising from, a national level emergency.

The envisaged role could include:

- Monitoring and/or reporting on the impact of the emergency in the HSE Area
- Undertaking pre-assigned roles in a National Emergency Plan
- Undertaking relevant tasks following an emergency/crisis or Acting as a communications and co-ordination conduit.

All communications from relevant national bodies should be directed to the Chair of the CMT or his/her designated alternate. When a request is received from a national body in the context of a national emergency, the CMT will be activated and will co-ordinate the appropriate activities of the

<sup>&</sup>lt;sup>24</sup> Section 5.4.5.2, *A Framework for Major Emergency Management*, 2006 <u>http://mem.ie/wp-content/uploads/2015/05/A-Framework-For-Major-Emergency-Management.pdf</u>

<sup>&</sup>lt;sup>25</sup> Section 5.4.5.5, A Framework for Major Emergency Management, 2006 <u>http://mem.ie/wp-content/uploads/2015/05/A-</u> Framework-For-Major-Emergency-Management.pdf

HSE. This Plan may also be activated in response to a request from a Minister of Government in light of an emergency/crisis situation.

This Plan may also be activated in response to a request from the Irish Coast Guard, following a threatened or actual emergency in the Irish Maritime Search and Rescue Region.

#### SECTION 10 LINKS WITH NATIONAL EMERGENCY PLANS

This Plan will normally be activated in response to a local or regional Major Emergency. However, where a National Emergency Plan has been activated, the Department of Health and Children will/may request the activation of this plan.

#### **SECTION 11 SEVERE WEATHER PLANS**

Severe weather emergencies may involve significant threats to infrastructure and business continuity for all HSE services in Area 1. Support may be required for vulnerable sections of the community and HSE services/functions.

In Area 1, HSE managers have a responsibility to increase/develop the resilience of their services/functions to mitigate against the impact Severe Weather may have on the day-to-day running of their services.

To assist managers in their contingency planning for Severe Weather, a Severe Weather checklist and associated guidance document has been developed for HSE managers. Each manager has a responsibility to address this Severe Weather Checklist and Guidance document Version 6 dated October 2023 and it is available at the below link:

# https://www.hse.ie/eng/services/list/3/emergencymanangement/severe-weather/hse-severe-weather-checklist-and-guidance-document.pdf

Each Local Authority has, as a sub plan of its Major Emergency Plan, a Plan for responding to severe weather emergencies, whether a Major Emergency is declared or not, and Local Co-ordination Centres may be activated to manage response to a severe weather event, whether a Major Emergency is declared or not.

If a Local Authority activates the Local Coordination Group, the HSE will engage and the Area 1 CMT will be activated, where appropriate and assistance will be provided in whatever areas and by whichever services are appropriate to the situation.

**Note**: although these arrangements are initially directed towards storms, flooding and severe cold, problems can also be created for vulnerable population by periods of extreme heat and the HSE, in particular, needs to be vigilant at such times, monitoring the effect on the elderly and other vulnerable groups.

# SECTION 12 SITE AND EVENT SPECIFIC ARRANGEMENTS AND PLANS

There are both legislative and procedural arrangements which require that Emergency Plans be prepared for specific sites or events. These include internal and external Emergency Plans for Uppertier Seveso Establishments, Emergency Plans for airports and ports and Emergency Plans and arrangements for major sporting and cultural events.

The geographical area of A1CMT currently has no designated Upper-tier Seveso Sites.

# **SECTION 13 THE RECOVERY PHASE**

Once the response to a Major Emergency is underway and operating effectively, the HSE, in consultation with the other Principal Response Agencies, will begin to plan for recovery. The Framework envisages recovery as occurring in two phases – immediate recovery and long term recovery.

The HSE will engage in this process through the CHO Area 1 CMT and via its representatives on the Local Co-ordination Group.

As soon as it is practical, the Area 1 CMT will nominate an individual (or group) to begin the process of planning for the recovery phase. The principal issues for the HSE in recovery are likely to be

- Long term care and support for casualties and survivors
- Long term support for relatives of casualties and survivors
- Managing the conflicting demands of the emergency and the maintenance of normal services
- Supporting staff who have been under great pressure
- Continuing to engage with the media
- Preparing for legal and quasi legal issues, such as enquiries, criminal investigation, inquests, etc.

The Area 1 CMT will continue to function through the recovery phase until the issues arising are more appropriately dealt with by normal management processes.

# SECTION 14 REVIEW OF THIS PLAN

This Plan will be reviewed and updated annually by the Area 1 Emergency Planning Group (AEPG). It will also be reviewed and amended as appropriate after any activation of this plan or major emergency exercise to reflect key learnings or recommendations. The Emergency Management Office will coordinate this process.

# **APPENDIX 1 - GLOSSARY OF TERMS AND ACRONYMS**

## **Ambulance Loading Point**

An area, close to the Casuality Clearing Station, where casualties are transferred to ambulance for transport to hospital.

#### **Body Holding Area**

An area, under the control of An Garda Síochána, where the dead can be held temporarily until transferred to a Mortuary or Temporary Mortuary.

#### **Business Continuity**

The processes and procedures an organisation puts in place to ensure that essential functions can continue during and after an adverse event.

#### **Casualty**

Any person killed or injured during the event. (For the purpose of the Casualty Bureau it also includes survivors, missing persons and evacuees).

#### Casualty Bureau/Casualty Information Centre

Central contact and information point, operated by An Garda Síochána, for all those seeking or providing information about individuals who may have been involved.

#### **Casualty Clearing Station**

The area established at the site by the ambulance service, where casualties are collected, triaged, treated and prepared for evacuation.

#### **Casualty Form**

A standard form completed in respect of each casualty and collated in the Casualty Bureau.

#### **Civil Protection**

The term used in the European Union to describe the collective approach to protecting populations from a wide range of hazards.

# **Collaboration**

Working jointly on an activity.

#### Command

The process of directing the operations of all or part of the particular service (or group of services) by giving direct orders.

# <u>Control</u>

The process of influencing the activity of a service or group of services, by setting tasks, objectives or targets, without necessarily having the authority to give direct orders.

# **Controller of Operations**

The person given authority by a Principal Response Agency to control all elements of its activities at and about the site.

# **Co-operation**

Working together towards the same end.

#### **Co-ordination**

Bringing the different elements of a complex activity or organisation into an efficient relationship through a negotiated process.

#### **Cordons**

The designated perimeters of an emergency site, with an Outer Cordon, an Inner Cordon, a Traffic Cordon and a Danger Area Cordon, as appropriate.

#### **Crisis Management Team (CMT)**

A strategic level management group, which consists of senior managers from within the Principal Response Agency, which is assembled to manage a crisis and deal with issues arising for the agency both during the emergency and the subsequent recovery phase.

# Danger Area

An area where there is a definite risk to rescue personnel, over and above that which would normally pertain at emergency operations.

# **Decision Making Mandate**

Establishes the envelopes of empowered activity and decision making to be expected, without references to higher authorities.

# **Decontamination**

A procedure employed to remove hazardous materials from people and equipment.

# **Emergency Response**

The short term measures taken to respond to situations which have occurred.

# **Evacuation Assembly Point**

A building or area to which evacuees are directed for onward transportation.

# Friends and Relatives Reception Area

A secure area, operated by An Garda Síochana, for the use of friends and relatives arriving at or near the site of the emergency.

# Garda Code Instructions

A document containing instructions, legislation, processed and procedures in respect of the day-today management of An Garda Síochana.

# <u>Hazard</u>

Any phenomenon with the potential to cause direct harm to members of the community, the environment or physical infrastructure, or being potentially damaging to the economic and social infrastructure.

# Hazard Identification

A stage in the Risk Assessment process where potential hazards are identified and recorded.

# Hazard Analysis

A process by which the hazards facing a particular community, region or country are analysed and assessed in terms of the threat/risk which they pose.

# Holding Area

An area at the site, to which resources and personnel, which are not immediately required, are directed to await deployment.

# **Hospital Casualty Officer**

The member of An Garda Síochána responsible for collecting all information on casualties arriving at a receiving hospital.

# Impact

The consequences of a hazardous event being realised, expressed in terms of a negative impact on human welfare, damage to the environment or the physical infrastructure or other negative consequences.

# Information Management Officer (IMO)

A designated member of the support team of a Principal Response Agency who has competency/training in the area of information management

# **Information Management System**

A system for the gathering, handling, use and dissemination of the information.

# **Investigating Agencies**

Those organisations with a legal duty to investigate the causes of an event.

# Lead Agency

The Principal Response Agency that is assigned the responsibility and mandate for the co-ordination function.

# Likelihood

The probability or chance of an event occurring.

# Local Co-ordination Centre

A pre-nominated building, typically at county or sub-county level, with support arrangements in place, and used for meetings of the Local Co-ordination Group.

# Local Co-ordination Group

A group of senior representatives from the three Principal Response Agencies (An Garda Síochána, HSE and Local Authority) whose function is to facilitate strategic level co-ordination, make policy decisions, liaise with regional/national level co-ordination centres, if appropriate, and facilitate the distribution of information the media and the public.

# **Major Emergency Management**

The range of measures taken under the five stages of emergency management paradigm.

## **Major Emergency Plan**

A plan prepared by one of the Principal Response Agencies.

# Major Emergency

Any event which usually with little or no warning, causes or threatens death or injury, serious disruption of essential services, or damage to property, the environment or infrastructure beyond the normal capabilities of the principal emergency services in the area in which the event occurs, and requiring the activation of specific additional procedures to ensure effective, co-ordinated response.

# Media Centre

A building/area specifically designated for use by the media, and for liaison between the media and the Principal Response Agencies.

# **Media Holding Statements**

Statements that contain generic information that have been assembled in advance, along with preliminary incident information that can be released in the early stages of the emergency.

# **Mitigation**

A part of risk management and includes all actions taken to eliminate or reduce the risk of people, property and the environment from hazards which threaten them

# Mutual Aid

The provision of services and assistance by one organisation to another.

# **National Emergency Co-ordination Centre**

A centre designated for inter-departmental co-ordination purposes.

# <u>On – Site Co-ordinator</u>

The person from the lead agency with the role of co-ordinating the activities of all agencies responding to an emergency.

# **On-Site Co-ordination Centre**

Specific area/facility at the Site Control Point where the On-site Co-ordinator is located and the Onsite Co-ordination group meet.

# **On-Site Co-ordination Group**

Group that includes the On-Site Co-ordinator and the Controllers of Operations of the other two agencies, an Information Management Officer, a Media Liaison Officer and others as appropriate.

# **Operational Level**

The level at which the management of hands-on work is undertaken at the incident site(s) or associated areas.

## Principal Emergency Services (PES)

The services which respond to normal emergencies in Ireland, namely An Garda Síochána, the Ambulance Service and the Fire Service.

## Principal Response Agencies (PRAs)

The agencies designated by the Government to respond to Major Emergencies i.e. An Garda Síochána, The HSE and the Local Authorities.

#### **Protocol**

A set of standard procedures for carrying out a task or managing a specific situation.

# **Receiving Hospital**

A hospital designated by the HSE to be a principal location to which major emergency casualties are directed. (24-hour Emergency Department)

# Recovery

The process of restoring and rebuilding communities, infrastructure, buildings and services.

#### **Regional Co-Ordination Centre**

A pre-nominated building, typically at regional level, with support arrangements in place and used by the Regional Co-ordination Group.

# **Regional Co-Ordination Group**

A group of senior representatives of all relevant Principal Response Agencies, whose function is to facilitate strategic level co-ordination at regional level.

# **Rendezvous Point (RVP)**

The Rendezvous Point is the location to which all resources responding to the emergency site are directed in the first instance. An Garda Síochána will organise the Rendezvous Point. Other services may have one of their officers present to direct responding vehicles into action or to that service's Holding Area.

# **Response**

The actions taken immediately before, during and/or directly after an emergency.

#### **Resilience**

The term used to describe the inherent capacity of communities, services and infrastructure to withstand the consequences of an incident, and to recover/restore normality.

# Rest Centre

Premises where persons evacuated during an emergency are provided with appropriate welfare and shelter.

# <u>Risk</u>

The combination of the likelihood of a hazardous event and its potential impact.

# **Risk Assessment**

A systematic process of identifying and evaluating either qualitatively or quantitatively, the risk resulting from specific hazards.

# **Risk Holders**

Organisations and companies, which own and/or operate facilities and/or services where relevant hazards are found, such as Airlines, Chemical Manufacturers etc.

# **Risk Management**

Actions taken to reduce the probability of an event occurring or to mitigate its consequences.

# **Risk Matrix**

A matrix of likelihood and impact on which the results of a risk assessment are plotted.

# **Risk Regulators**

Bodies with statutory responsibility for the regulation of activities where there are associated risks, such as the Health and Safety Authority, the Irish Aviation Authority, etc.

# <u>Scenario</u>

A hypothetical sequence of events usually based on real experiences or on a projection of the consequences of hazards identified during the risk assessment process.

# **SEVESO Sites**

Industrial sites that, because of the presence of dangerous substances in sufficient quantities, are regulated under Council Directive 96/82/EC and 2003/105/EC, commonly referred to as the Seveso II Directive.

# Site Casualty Officer

The Member of An Garda Síochána with responsibility for collecting all information on casualties at the site.

# Site Control Point

The place at a major emergency site from which the Controllers of Operations control, direct and coordinate their organisation's response to the emergency.

# **Site Medical Officer**

The medical officer with overall medical responsibility at the site, who will liaise with the health service Controller of Operations on all issues related to the treatment of casualties.

# Site Medical Team

A team drawn from a pre-arranged complement of doctors and nurses, with relevant experience and training, which will be sent to the site, if required.

#### Site Medical Plan

The arrangement of the elements of a typical major emergency site, matched to the terrain of the emergency, as determined by the On-Site Co-ordination Group.

## **Standard Operating Procedures (SOPs)**

Sets of instructions, covering those features of an operation that lend themselves to a definite or standardised procedure, without loss of effectiveness.

#### Support Team

A pre-designated group formed to support and assist individuals operating in key roles, such as On-Site Co-ordinate, Chair of Local Co-ordination Group, etc.

#### **Strategic Level**

The level of management that is concerned with the broader and long-term implications of the emergency and which established the polices and framework within which decisions at the tactical level are taken.

#### **Survivor Reception Centre**

Secure location to which survivors, not requiring hospital treatment, can be taken for shelter, first aid, interview and documentation.

# **Tactical Level**

The level at which the emergency is managed, including issues such as, allocation of resources, if required, and the planning and co-ordination of ongoing operations.

# **Temporary Mortuary**

A building or vehicle adapted for temporary use as a mortuary in which post mortem examinations can take place.

# <u>Triage</u>

A process of assessing casualties and deciding the priority of their treatment/or evacuation.

Acronyms	
AAIU	Air Accident Investigation Unit
CCBRNE	Conventional, Chemical, Biological, Radiological, Nuclear or Explosive
СМТ	Crisis Management Team
EOD	Explosive Ordnance Disposal

PRA	Principal Response Agency
RVP	Rendezvous Point
SAR	Search and Rescue
SLA	Service Level Agreement
SOP	Standard Operating Procedure
VIP	Very Important Person

# **APPENDIX 2 - MARINE AND OFF-SHORE INCIDENTS AND MEDICO CORK**

In the event of a medical emergency at sea the Principal Emergency Service responsible for the initiation, control and co-ordination of maritime emergencies in Irish territorial waters, harbours and coastline is the Irish Coast Guard.

The major emergency plans of the principal response agencies may be activated by one of those agencies in response to a request to the Irish Coast Guard following a threatened or actual emergency in the Irish Maritime Search and Rescue Region.

# **Emergency Medical Advice in Marine and Off-shore Islands**

Medical Emergencies that arise at sea and on islands have unique issues caused by the distance from shore. These incidents may not of themselves constitute a Major Emergency as provided for in the Framework however they do present some challenges different from a land based small-scale emergency.

To provide a response to this geographic isolation EU regulations [EC Council Directive 92/29/EEC] stipulate that every country must have one receiving hospital to take calls from the Coast Guard from seagoing vessels which require medical advice.

In accordance with Section 9 (1) of S.I. No. 506 of 1997, the Department of Communications, Marine and Natural Resources\* has designated Cork University Hospital as the Radio Medical Consultation Centre for Ireland. It was designated as the Radio Medical Consultation Centre for Ireland by Marine Notice 28 of 2001. (Also, called a Notice to Mariners NTM) \*Note: The relevant marine emergency functions of the Department of Communications, Marine and Natural Resources were transferred to the Department of Transport on and from 1 January 2006.

The Maritime Medical Consultation Unit of CUH is MEDICO\*\* Cork. The unit is available to provide vessels at sea with free medical advice by radio on a 24 hour basis.

\*\* "MEDICO" is a radio nickname for medical service. There is MEDICO Madrid, MEDICO Rome and so on. So for example if a Spanish Trawler wanted medical advice in Irish waters it would most likely be put in contact with MEDICO Madrid.

The unit can be contacted through the Irish Coast Guard Radio Stations at Dublin, Valentia and Malin Head. The Coast Guard plays a pivotal role in the service facilitating three-way communication between the sea-going vessel and the emergency department CUH where there is a designated Medico Cork phone. All calls are then dealt with by a consultant or registrar.

# Extension of Medico Cork advice to Off-shore Islands

Air Ambulance Operations Notice 2/08 Dated: 24<sup>th</sup> January, 2008 extends the On-line advice from Medico, Cork to assist the national ambulance service in providing similar advice.

This will apply in situations where a call for an emergency helicopter transfer is received from an offshore Island.

In order to ensure that helicopter resources are properly used and that the appropriate patients receive this service, the EMC dealing with such calls will use the following procedure:

The EMC will patch the caller through to Medico Cork where a senior emergency care practitioner will discuss the details of the patient's condition with the caller, give appropriate medical advice and provide a direction on the category of the medical emergency.

The EMC will respond to this advice to meet the needs of the patient concerned in accordance with National Ambulance Service protocols.

# Method of Contact with Medico Cork

All calls for assistance from Medico Cork which fall within the guidelines should be directed to the Irish Coast Guard at:

# DUBLIN (Marine Rescue Co-ordination Centre, MRCC)

01-6620922 / 6620923

VALENTIA (Kerry)

066 - 9476109

# MALIN HEAD (Donegal)

Paulgill@transport.gov.ie / 074 – 9370195 / 085-8718093

mrcsmalin@irishcoastguard.ie / 074 – 9370103 / 085-8085961

Or alternatively Dial **112/999** as ask for the Coast Guard and the Coast Guard will initiate the contact with Medico Cork.
# **HSE Emergency Management Area 1**

# (Covering Geographical Areas of Counties Donegal, Sligo, Leitrim, Cavan & Monaghan)

# **RISK ASSESSMENT**

June 2024

# **Version Control:**

Revision Number	Version 8 – May 2022	Summary of edits	Feedback and updates from Department of Public Health and Emergency Management
	Version 9 – May 2023		
	Version 10 – June 2024		Feedback and updates from Emergency Management and AEPG members.

# **Explanatory Notes:**

- The HSE is currently in the process of transitioning to RHA model as per Slainte Care however, at the time of publication, the HSE is organised into Acute Operations (Hospital Groups) and Community Operations (Community Healthcare Organisations). The Area 1 Crisis Management Team (CMT) is a strategic group that consists of senior managers representing *all HSE functions and services*. The Area 1 CMT is aligned with the geographical area of Community Healthcare CDLMS (that is, Counties Donegal, Sligo, Leitrim, Cavan & Monaghan). For the purposes of this A1CMT Major Emergency Plan, the 'Area' refers to these counties.
- •
- At the time of review of Version 10 of this plan (June 2024), the tactical and strategic recommendations of the PWC Independent Post Cyber Incident Review published (Dec 2021) are actively being implemented while this plan and risk assessment was being updated.

It is acknowledged that the threat of a cyber-attack continues to be a national risk that would have a significant impact on HSE functions and services in the area. It is anticipated that a section detailing the interface with the Office of Chief Information Officer and a risk assessment for cyber-attacks will be added to the next version, in accordance with national HSE adjustments and guidance.

## **REGIONAL RISK ASSESSMENT**

The Framework for Major Emergency Management 2006 outlines a 5 stage systems continuous cycle approach to Major Emergency Management. The principal elements of this system are

- Hazard Analysis / Risk Assessment
- Mitigation / Risk Management
- Planning and Preparedness
- Coordinated Response and
- Recovery

Each principal response agency should carry out a risk assessment in accordance with procedures outlined in the framework. The risk assessment approach is complimentary to the principle of an "All Hazards" approach.

The risk assessment process is comprised of a number of stages.

They are as follows:

- 1. Establishing the Context. Describing the characteristics of the former HSE West Region including the geography, populations and infrastructure of the Area.
- 2. Hazard Identification in this Risk Assessment document the potential hazards in the HSE West are categorised under four headings
  - Natural Storms, floods etc.
  - Transport Air, Road, rail, water accidents
  - Technological Fire, CBRNE, building collapse etc.
  - Civil Crowd safety, communicable diseases etc.
- 3. Risk Assessment consideration is given to the overall risks presented by the identified hazards.
- 4. Recording identified potential hazards on a Risk Matrix The Risk is plotted on a specially designed graph that gives a visual context to lesser and greater risks at a glance.

# **STAGE 1 ESTABLISHING THE CONTEXT**

# The first stage of this Risk Assessment is to contextualise Risk by detailing the geography, populations and infrastructure of the Emergency Management West Region.

The CHO Area 1 remit covers the counties of Donegal, Sligo, Leitrim, Cavan & Monaghan and includes a number of "Off Shore" inhabited Islands (Appendix 3.1). It borders other HSE Emergency Management Regions and the five counties comprise a total area of just over 4,400 square miles.

Acute Hospital services in CHO Area 1 are provided by the following Hospital Groups:

- Saolta University Health Care Group comprising of Sligo University Hospital and Letterkenny University Hospital

- RSCI Hospital Group comprising Cavan / Monaghan Hospital

The Community services are now organised into Community Healthcare Organisations as depicted in the map below

Table 1 Establishing the context - HSE Emergency Plan	(Donegal, Sligo, Leitrim, Cav	van &
Monaghan)		

Social Population Centres				
Population of the Region 419,473 2022 census (including Cavan and Monaghan)	County

#### **STAGE 3 RISK ASSESSMENT**

The next stage of this process is to consider the overall risks presented by these hazards. Risk assessment starts with an examination of the impact (severity of consequences to life and health, property and infrastructure, and the environment – see Table 4.1) of the hazards identified. The likelihood (probability) also has to be considered (see Table 4.2) and the resulting judgement recorded on a risk matrix in the next stage. The basis for making this judgement is set out on the individual hazard record sheet, and includes sources which influence the judgement (e.g. national/level intelligence and advice from available centres of expertise, information from risk holder/risk regulator).

A five-point scale is used for categorising both impact and likelihood, ranging as shown in the risk matrix. In considering the potential impact of a hazard, it is relevant to take two factors into account, - the type or nature of the impact, and the scale. The type or nature of impact may be considered in three fields:

- Impact on life, health and residual welfare of a community
- Social/environmental impact. Social impact may be thought of in terms of disruption/displacement of people affected by the event, while environmental is impact on the physical area;
- Economic impact in terms of costs of property/ infrastructure damage as well as recovery costs or loss of economic production.

A simple approach to assessing the likelihood is used, expressed in Terms of Probability of an event occurring.

Ranking	Classification	Impact on life and health
1	Minor	Single severe damage, serious injury
2	Limited	Single death, a few serious injuries
3	Serious	A few deaths (<5), several serious injuries (20), up to 500 evacuated
4	Very serious	5 to 50 deaths, up to 100 serious injuries, up to 2000 evacuated
5	Catastrophic	>50 deaths, injuries in hundreds, more than 200 evacuated

#### IMPACT

## <u>LIKELIHOOD</u>

Ranking	Classification	Likelihood
1	Extremely Unlikely	Less than once per 1000 years
2	Very Unlikely	Once per 100-1000 years
3	Quite Unlikely	Once per 10-100 years
4	Likely	Once per 1-10 years
5	Very Likely	More than once a year

# Hazards are measured by judging the IMPACT of an event against the LIKELIHOOD of this event taking place. The hazards are detailed in the tables below:

Natura	Natural (Reference = NM)								
Ref.	Category/ Sub-category	Hazard/Threat	Potential Outcome description	Relative Risk areas of Ireland/ Historical Evidence	Likelihood	Impact	Risk Rating		
NM1	Meteorological	Storm/Gale Both coastal and inland areas can be affected by high winds	Likely damage to property. Displacement and/or fatalities may occur.	All counties.	Likely	Serious	Planning and preparedness		
NM2	Meteorological	Heavy Snow	Roads inaccessible Road Traffic Accidents Hypothermic patients	All counties 28/02/18 to 4/03/18 Storm Emma Significant snowfall widespread across the Country Winter 2010/2011 Heavy snow falls in some Counties &	Likely	Serious	Planning and preparedness

The following twelve scenarios were selected to provide a good basis for development of an allhazards major emergency plan for the Emergency Management West Region:

- 1. Extremes of Weather
- 2. Flooding
- 3. Landslide/Tsunami/Earthquake
- 4. Aircraft Incident
- 5. Major Road Traffic Accident / Hazmat
- 6. Rail Incident
- 7. Marine Incident
- 8. Large Building Fire
- 9. Hazardous Material Incident
- 10. Crowd Incident
- 11. Pandemic
- 12. Terrorism

#### HAZARD RECORD SHEET 1 EXTREMES OF WEATHER

HAZARD CATEGORY	SUB-CATEGORY
Natural	Severe weather event
Hazard Description	Hazard Location
An extreme weather event or prolonged	North West (Donegal, Sligo, Leitrim, Cavan and
instance of inclement weather	Monaghan)
Date Reviewed:	Review Due:
June 2024	June 2025

#### **1.** Overview of Hazard

Although Ireland's climate is generally moderate, severe weather events do occur.

An extreme storm could have the consequences of flooding, landslides, damage to properties and infrastructure or even fatalities. Storms with gale force winds are a regular occurrence in the western region.

An extended cold spell is possible in Ireland during winter months, expected impacts as follows:

- Icy roads would have an impact on road safety and use of transport infrastructure.
- Water distribution system would be severely compromised resulting in a prolonged period of water shortages and repair
- Severe cold would have an impact on over-ground power transmission systems
- Elderly persons would be particularly at risk
- Lack of water for firefighting purposes

During summer months, a prolonged heat wave may occur. Drought conditions could impact upon water supply, reservoirs and animals.

#### 2. Key Historical Evidence

#### Storms:

#### Ireland

- 2021 December, Storm Barra, sustained winds of 104 km/h with gusts of 135 km/h recorded, fallen trees, damaged electricity lines and floods, work, education and childcare closures for two days.
- 2021 November, Storm Arwen, sustained winds of 96 km/h with gusts of 130 km/h recorded in Ireland, 1 fatality in Northern Ireland and 2 in Great Britain.
- 2020 August, Storm Francis, sustained winds of 80 km/h with gusts of 96 km/h recorded, flooding in Cork (significant damage to shops and properties), 37 people evacuated from flooded area in Northern Ireland.
- 2020 March, Storm Jorge, sustained winds of 100 km/h with gusts of 133 km/h recorded, power outages, overturned truck in Galway (no casualties).
- 2019 October, Storm Lorenzo, sustained winds of 89 km/hr with gusts of 107 km/h recorded, substantial flooding in Donegal, power outages.

- 2018 September, Storm Ali, gusts of 143km/h were recorded resulting in fallen trees, power supply interruptions and structural damage 2 fatalities.
- 2018 February/March, Storm Emma, snow and high winds created blizzard like conditions. Widespread disruptions to roads, rail and air travel, with work and school closures 42 fatalities across Europe (18 in Poland).
- 2017 October, Storm Ophelia, sustained winds (10-minute mean) of 111km/h and gusts of up to 156km/h resulting in costal damage, fallen trees, structural damage, power supply interruption and flooding – 3 fatalities.
- 2014 January & February, High winds and spring tides resulted in widespread costal damage, falling trees, structural damage, power supply interruption and flooding, widespread damage caused.
- 2010 & 1982, Severe snow and frost
- 1996 August, Hurricane Charlie, East and Southeast of country affected by flooding and loss of power transmission lines.
- 1974 January, 2 storms, gust of 124 m.p.h. was recorded at Kilkeel in County Down, many thousands of trees blown down, extensive damage to roads and vessels, some coastal roads destroyed, power & telephone outages (for over a week in some areas), island of Innisboffin off County Donegal was 'cut in two' by waves sweeping over its central area – 5 lives lost and many minor injuries reported.
- 1961 Sept, Hurricane Debbie, winds reached hurricane force resulting in 12 Fatalities and widespread damage.

# United Kingdom

- 1987, Hurricane and storms, 20 fatalities.
- 1990, Gales and floods, 45 fatalities.

# Belgium:

• 1990, Severe storms, 19 fatalities.

# Severe cold:

- Ireland: 2018, Storm Emma Significant snowfall widespread across the Country Sub-zero temperatures and blizzard like conditions
- Ireland: 2009 2010, prolonged cold spell
- Ireland: 1970s, a series of cold winters experiences, a number of elderly fatalities.
- Ireland: 1947, Prolonged snowstorms.
- India: 2006, 1 week of prolonged cold temperatures, 200 fatalities.
- Baltic States: 2006, prolonged cold weather, 30+ fatalities.
- USA: 2004, North & South Carolina, 50+ fatalities.

# Heat wave:

# Ireland:

• 2018, one of the hottest and driest summers on record causing drought conditions Europe:

- 2006 European heat wave death toll estimated at 3,418.
- 2003 European heat wave led to health crises in several countries, with the European death toll estimated at more than 70,000.

# 3. Assessment of Impact and Likelihood

		Impact						
Hazard	Human Welfare	Environment	Physical Infrastructure	Social				
Extremes of Weather	Very Serious - 5-50 fatalities, up to serious 100 injuries depending on number of people involved and the nature of the incident.	Minor - No contamination, localised effects.	Very Serious -	Serious - Community functioning poorly, minimal services available	Likely (Once per 10-100 years)			

#### 4. Position on Risk Matrix

#### 5. Prevention/Control/Mitigation Measures in Place

- Met Éireann Forecasting
- 'Be Winter Ready' and 'Be Summer Ready' campaigns
- HSE Severe Weather Planning Guidance for Services
- Local Authority Severe Weather Plans
- Local Authority Salting / Gritting Plans Ice-cast System
- Local Authority plans for emergency accommodation centres with necessary equipment and supplies.
- Use of water tankers for water distribution
- Road Design

## 6. Risk Management Approach: Prevention/Control/Mitigation Measures Required

- Ongoing development of plans for emergency accommodation centres with necessary equipment and supplies
- Community Resilience Planning
- Coastguard / Air Corp Assistance
- Transportation requirements of all Agencies Vehicles
- Business Continuity Planning to ensure that personnel can attend work / do not have to attend work
- Review Storage of Salt / Grit Supplies (National / Regional / Local)

#### HAZARD RECORD SHEET 2 FLOODING

HAZARD CATEGORY	SUB-CATEGORY
Hydrological	Flooding
Hazard Description	Hazard Location
Urban flooding in areas susceptible to	North West (Donegal, Sligo, Leitrim, Cavan and
flooding	Monaghan)
Date Reviewed:	Review Due:
June 2024	June 2025

#### 1. Overview of Hazard

There are a number of river, lakes and an extensive coastline in the North West region. Lakes which have a history of flooding in the region are Lough Derg, Foyle and Swilly in Donegal and Lough Allen Leitrim.

Rivers, lake and coastal flooding is caused by:

- Heavy rain
- Prolonged rainfall
- Tides (Spring)
- Low atmospheric pressure
- Winds/Storms

#### 2. Key Historical Evidence

#### Irish Examples:

- 2020 September County Galway Flash Flooding
- 2019 October North West Storm Lorenzo caused flooding
- 2018 Galway City Flooding
- 2017 Galway City Flooding
- 2017 August Inishowen Peninsula Flooding
- 2015 December Limerick, Leitrim, Galway significant widespread flooding
- 2014 January Limerick City Flooding
- 2013 March Cork City Flooding
- Various 2012 Cork County Flooding
- 2009 November Serious flooding throughout the Country 40% of Cork's population without running water for more than 10 days
- 2008 August Newcastle West, Co. Limerick
- 2004 November Clonmel Flooding/Heavy Rain
- 2002 November Dublin Flooding
- 1999/2000 Winter Flooding reported in many parts

• 1954 Significant flooding occurred

## **International Examples:**

- 2007 Gloucestershire, England, Flooding/Heavy Rain
- 2002 Prague, 2002 Heavy Rain

#### 3. Assessment of Impact and Likelihood

Hazard	Impact				
	Human	Environment	Physical	Social	
	weifare		Infrastructure		
Major Flooding in Urban/ Residential area	Serious - Evacuation, disruption to access/egress to/from homes & businesses, restrictions on emergency services, disease, drowning risk	Serious - Contamination by sewage, risk of contamination to public water supply	Serious - Water damages to property, Traffic congestion or blockages, contamination of water and pipe networks	Serious: Community only partially functioning, some services available	Major flooding – Likely (once per 1-10 years)

## 4. Position on Risk Matrix

5. Prevention/Control/Mitigation Measures in Place

- Local Authority development controls e.g. County Development Plans, flood impact assessments.
- Local Authority flood Response Plans
- Local Authority maintenance works e.g. clearing of gullies, storm drains, shores, roads and bridge culverts where required prior to onset of severe rain.
- Maintenance of adequate stocks of sandbags and flood barriers.
- Ensure measure availability of stocks of appropriate signs, including flood signs, indicating roads closed etc. and notification of An Garda Síochána as to their location and means of access etc.
- Flood mapping of flood risk areas is currently performed by the OPW and is available to the public via the website <u>www.floodinfo.ie</u>
- Information on protecting your health in the event of flooding can be found here: https://www.hse.ie/eng/services/list/5/publichealth/publichealthdepts/extreme/flood%2 Orisks.html

# 6. Risk Management Approach: Prevention/Control/Mitigation Measures Required

- Ongoing development of flood response plans guidance from National Directorate
- Work with OPW to collate data and anticipate future flood risks.
- Develop plans for emergency accommodation centres with necessary equipment and supplies.
- Community Resilience Plans: National  $\rightarrow$  Regional  $\rightarrow$  Local
- Investigate provision of additional equipment and training for responding to flooding emergencies. E.g. boats, survival equipment, rapid water rescue etc.
- Involvement of Coastguard in training.

# HAZARD RECORD SHEET 3 Landslides / Earthquakes / Tsunami

HAZARD CATEGORY	SUB-CATEGORY
Natural	Geological
Hazard Description	Hazard Location
Landslides/Earthquakes/Tsunami	North West (Donegal Sligo Leitrim, Cavan and Monaghan)
Date Reviewed:	Review Due:
June 2024	June 2025

## 1. Overview of Hazard

According to Geological Survey Ireland, historical records and geological evidence indicate that, while unlikely, the Irish coast is vulnerable to tsunamis from distant earthquakes and submarine landslides. The Lisbon earthquakes of 1755 and 1761 caused tsunamis that reached Ireland. Submarine landslides mapped by Infomar on the Rockall Bank probably caused tsunamis although coastal effects have not been recognised. Likely worst case tsunamis around Ireland would be similar to the level of coastal flooding seen during storm surges, but with greater momentum and less time to react. Tsunami is included in the National Major Emergency Management guidelines, with the Department of Communications, Climate Action & Environment as the Lead Government Department. Tsunami was added to the National Risk Matrix in 2017.

The term "landslide" describes a wide variety of processes that result in the downward and outward movement of materials under the force of gravity; this includes materials like rock, debris, earth, mud and peat, or a combination of these. Ireland's location, terrain and climate result in landslides occurring mainly in areas with steep slopes where rock meets the surface and peat covers the terrain. It does not require spectacularly huge landslide events to cause serious disruption or loss of life. Relatively small landslides in terms of the volume of material displaced can damage bridges and roads, and also cause injury and death.

The Irish National Seismic Network (INSN) is a network of seismometers installed across Ireland to detect earthquakes. Major investment expanded the network in 2018 resulting in more stations, greater coverage and more accurate recording of earthquakes in Ireland.

## 2. Key Historical Evidence

- 2016, June, Clifden, Co Galway, mudslide causing closure of N59
- 2011, Japan, magnitude 9.0–9.1Mw undersea megathrust earthquake causing a tusnami resulting in 19,747 fatalities and 6,157 non-fatal injuries; estimated cost of damage \$360 billion USD
- 2009, Donegal, Glencolmcille mudslide covering 800m of country road, cutting of 20 families
- 2008 Arigna/Geevagh Landslide, tons of debris down through forest, covering or sweeping 50-foot trees away

- 2004, Indonesia Tusanami, magnitude 9.1–9.3Mw undersea megathrust earthquake causing a tsunami resulting in 227,898 fatalities
- 2003, Mayo, Poullathomas Landslide, 200,000 cubic metres of debris swept down the mountainside leaving locals homeless, killings hundreds of livestock, destroying the local graveyard and sweeping five human remains out to sea.
- 2003, Galway, Derrybrien Landslide, dislodged 450,000 cubic metres of peat, and causing disruption to water supply of local townland and the perishing of 50% of fish in the lake.

# 3. Assessment of Impact and Likelihood

Hazard		Likelihood			
	Human Welfare	Environment	Physical Infrastructure	Speed of Development / Escalation	
Landslides/ Earthquakes/ Tsunami	Loss of life and injury	Pollution/health risks to Public and Rescue Personnel from sewerage systems, fuel storage tanks and other sources of pollution	Major damage to property and surrounding land. Structural damage/closure of bridges and roads/rail lines and other infrastructure. Landslides	Slow	Evidence suggests that extremely unlikely.
+	Serious	Serious	Catastrophic		Extremely unlikely

## 5. Prevention/Control/Mitigation Measures in Place

- Existing Major Emergency Plan
- The Irish National Seismic Network (INSN)
- The Geological Survey Ireland (GSI)
- Public announcements

#### 6. Risk Management Approach: Prevention/Control/Mitigation Measures Required

- More training required for emergency personnel on how to deal with such an event.
- Environmental impact assessments to be completed before planning permission granted for new developments (which could cause landslides like the one in Derrybrien)

#### HAZARD RECORD SHEET 4 AIRCRAFT INCIDENT

HAZARD CATEGORY	SUB-CATEGORY
Aviation	Aircraft
Hazard Description	Hazard Location
Aircraft Collision / Loss	North West (Donegal, Sligo, Leitrim, Cavan and Monaghan)
Date Reviewed:	Review Due:
June 2024	June 2025

#### 1. Overview of Hazard

**Carrickfin (Donegal) Airport** is located on the top North-Western corner of Ireland. Located at Carrickfinn, Kincasslagh, the airport is approximately 15 minutes drive from Dungloe and Gweedore, and 45 minutes from Letterkenny. Donegal Airport is just 45 minutes flying time from Dublin and is a region noted for its unspoiled natural scenery, its maritime environment and fishing industry, inhabited islands and a unique tourism industry. The airport is popularly known, within County Donegal, as Carrickfinn Airport. Over the years preceding Covid, the airport achieved significant passenger growth rates year on year; in 2019, Donegal Airport had 48,542 passengers but this dipped to 18,067 in 2020 (CSO).

**Sligo Airport** is located at the end of the R277 in Strandhill, 8km west of Sligo town. The airport is a small regional airport with no scheduled routes. Sligo Airport is the North-West base of the Irish Coast Guard S-92 Search & Rescue Helicopter.

Approximately 80% of all aviation accidents occur shortly before, after or during take-off or landing and are typically the result of human error and/or technical problems within an aircraft. An aircraft collision with other aircraft, maintenance vehicles, the ground or buildings are the most frequent type of collision involving aircraft at or near airports.

An accident survey of 2,147 aircraft accidents worldwide from 1950 through 2004 determined the causes to be as follows:

- 45% pilot error;
- 33% undetermined or missing in record;
- 13% mechanical failure;
- 7% weather;
- 5% sabotage (bombs, hijackings etc);
- 4% other human error (air traffic control, improper loading, improper maintenance, fuel contamination etc);
- 1% other cause.

A study by Boeing (1996 to 2005) determined the primary cause of airline hull loss accidents to be:

- 55% Flight crew error;
- 17% Airplane;
- 13% Weather;
- 7% miscellaneous/other;
- 5% Air Traffic Control (ATC);
- 3% Maintenance.

The most serious accident would be a collision of 2 aircraft on the runway. However given the current schedule / absence of flights in Donegal and Sligo respectively, the chances of this type are extremely remote. A single collision on landing / take off is therefore considered the most serious hazard and could result in large numbers of fatalities / injuries with possible structural damage.

2. Key Historical Evidence

- 2017 Rescue 116 Coastguard, Black Sod, Mayo 4 fatalities
- 2011 Manx2 Commuter Flight, Cork Airport 6 fatalities
- 2011 Aer Arann ATR 72-212, Shannon Airport No casualties
- 1999 Aer Corp, Waterford 4 fatalities;
- 1985 Air India Boeing 747, Off South Coast of Ireland 329 fatalities
- 1968 Aer Lingus Flight 712, Tuskar Rock, county Wexford 61 fatalities
- 1961 President Airlines DC-6b, Shannon Estuary 83 fatalities
- 1960 Alitalia DC-6, Clonloghan, Co. Clare 34 fatalities
- 1958 KLM Super Constellation, off the West Coast (after fuelling in Shannon) 99 fatalities
- 1954 KLM Constellation, Shannon Estuary 28 fatalities
- 1948 Pan-American Lockheed Constellation, Shannon Airport 30 fatalities

3. Assessment of Impact and Likelihood

Hazard	Impact				Likelihood
	Human Welfare	Environment	Physical Infrastructure	Social	
Catastrophic Mechanical Failure Mid- Air	Catastrophic - Death/Serious Injury *	None	None	Limited: Normal community functioning with some inconvenience	Unlikely (Once per 10 to 100 years)
Collision with Ground	Catastrophic - Death/Serious Injury *	Serious – Fire damage/ destruction	Serious – Impact / crash	Limited: Normal community functioning with some inconvenience	Unlikely
Fire and/or Explosion	Catastrophic - Death/Serious Injury *	Serious – Fire damage/ destruction	Serious – Impact / Crash Debris	Limited: Normal community functioning with some inconvenience	Unlikely

\* Dependant on aircraft type and occupancy / content
#### 4. Position on Risk Matrix

#### 5. Prevention/Control/Mitigation Measures in Place

The Irish Aviation Authority commits to maintain safety standards which at least comply with the requirements of:

- Legislation in the Republic of Ireland
- The International Civil Aviation Organisation
- Eurocontrol
- The European Union (EU)
- The Safety Regulation Division of the Irish Aviation Authority
- Live exercise with principal response agencies and airport every year
- ICAO Regulations
- Knowledge of flight paths

- Inter- Principal Response Agency cooperation and training, exercising.
- Measures to provide for clean-up and repair after an incident.

# HAZARD RECORD SHEET 5 MAJOR RTA/HAZMAT

HAZARD CATEGORY	SUB-CATEGORY
Road	Multiple Vehicle RTC
Hazard Description	Hazard Location
Multiple Vehicle RTC	North West (Donegal Sligo Leitrim & Cavan
	Monaghan)
Date:	Review Date:
June 2024	June 2025

#### 1. Overview of Hazard

The National Primary routes throughout the region are:

N3, N4, N13, N14, N15, N16, N55, N54, N56, N87,

There were 134 deaths on Irish Roads in 2021.

#### 2. Key Historical Evidence

- 2019 Bus crash Castleblaney Monaghan 30 people on board No major injuries
- 2018 Hospital, Limerick, 46 secondary school students on bus
- 2010 Glasmullen Co.Donegal 8 fatalities
- 2012 Castleogry, Killybegs. 52 people on the bus all transferred to LGH for assessment.
- 2007, Wellington Road, Cork bus crash, 40 casualties
- 2007 M7 Motorway, Kildare, Multiple vehicle collision, 1 fatality, 30 casualties
- 2004, Wellington Quay, Dublin Bus Crash, 5 fatalities, 17 casualties
- 2005 Kentstown, Navan, Co. Meath, Bus Crash, 5 fatalities, 40 casualties

#### 3. Assessment of Impact and Likelihood

Hazard	Impact		Likelihood		
	Human Welfare	Environment	Physical Infrastructure	Social	
Multiple Vehicle Collision / Bus Crash	Serious – Death/Serious injury, Mental health	Limited - Traffic Congestion	Limited - Damage to road surface or Boundary with Road	Limited: Normal community functioning with some inconvenience	Likely (Once per 1-10 years)
Fire	Serious – Death/Serious injury, Burns,	Limited – Fire damage, Smoke damage,	Limited – Fire destruction, Fire damage, Smoke damage	Limited: Normal community functioning	Likely

Toxic	Ground/Surface	with some	
poisoning	water	inconvenience	
	contamination,		
	Traffic		
	congestion		

#### 4. Position on Risk Matrix

#### 5. Prevention/Control/Mitigation Measures in Place

- Irish Road Safety Week
- Garda enforcement of Traffic Law New measures in recent years Garda Traffic Corp established, Penalty points system introduced, random breath testing in place.
- Forensic collision investigators
- NCT and Road Safety Authority Vehicle testing and road side inspection programmes.
- Road Building & Maintenance Programmes NRA & Local Authorities.
- Road Safety Officer appointed in each Local authority.
- Inter-Agency co-operation, training & exercising
- Involvement of Gardaí & Ambulance Service in Fire Service RTA Training Course.
- Inter-agency tunnel training and exercises
- Fire service training in dealing with Hazmat incidents.

- Inter-Agency agreements in response to Road Traffic Accidents
  - Traffic Management Plan
  - Knowledge of high accident locations
  - Knowledge of level of hazardous material transported through county
  - Fire Service equipped to manage accidents on motorways.
  - Protocol for response to tunnel incidents.
  - Driver Education
  - Interagency cooperation, training and exercises.

#### HAZARD RECORD SHEET 6 RAIL INCIDENT

HAZARD CATEGORY	SUB-CATEGORY
Rail Incident	Mainline
Hazard Description	Hazard Location
Derailment / Collision / Fire	North West Donegal Sligo Leitrim & Cavan Monaghan
Date:	Review Date:
June 2024	June 2025

# **Overview of Hazard**

The following lines pass through the region:

Dublin to Sligo

1.

Safety Risks include:

- Level Crossings
- Derailment/Collision
- Bridge Strike
- Bridge Collapse
- Environmental Severe weather, storms etc.
- Equipment failure
- Human error
- Potential damage to water supply, rivers or wildlife in the vicinity of an incident.
- Restricted access to incidents on the rail line.

# 2. Key Historical Evidence

- 2009 Malahide Viaduct Accident Viaduct Collapse
- 1997 Knockcroghery, Co. Roscommon Derailment
- 1991 Ballycumber, Co Offaly- Derailment, 1 fatality
- 1989 Claremorris, Co. Mayo Derailment
- 1983 Cherryville, Co. Kildare– Collision involving two trains, 7 fatalities
- 1980 Buttevant, Co. Cork Derailment, 18 fatalities
- 1975 Gorey, Co. Wexford– Under bridge strike, 5 fatalities

#### 3. Assessment of Impact and Likelihood

Hazard	Impact	Likelihood			
	Human	Environment	Physical	Social	
	Welfare		Infrastructure		
Derailment/	Very Serious -	Limited –	Serious -	Limited:	Unlikely (Once
Collision	Death /	Fuel Spill	Damage to rail	Normal	per 10-100
	Serious Injury	Soil	line, structural	community	years)
		Contamination	collapse of	functioning	
		Ground Water	bridge, closure	with some	
		or Surface	of mainline	inconvenience	
		Water			
		Contamination			

Fire	Serious –	Limited –	Serious –	Limited:	Unlikely
	Death/Serious	Fire Damage	Fire	Normal	
	Injury, burns,	Smoke Damage	destruction,	community	
	toxic	Deposition of	fire/smoke	functioning	
	poisoning	Toxic Materials	damage,	with some	
		Soil	closure of	inconvenience

		Water	congestion		
		Contamination			
		Fire Water			
		Runoff			

#### 4. Position on Risk Matrix

# 5. Prevention/Control/Mitigation Measures in Place

- Iarnród Éireann is licensed to operate by the Railway Safety Commission.
- Safety Management system in place in larnród Éireann.
- Railway Traffic monitored by Central Traffic Control, Connolly Station, Dublin.
- Electronic / Mechanical emergency controls in locomotives.
- Hold joint Interagency exercises with Iarnród Éireann Table top/on site
- Rail Accident Investigation Unit

6.

- Obtain suitable equipment to help the Fire Service respond to such an incident.
- Map access points for emergency services to the rail line.
- Continue identification of higher risk areas on the tracks & map bridges and crossings.
- Increase public awareness on the dangers of railway crossings.
- Malahide Viaduct Accident Investigation Report 2010

#### HAZARD RECORD SHEET 7 MARINE INCIDENT

HAZARD CATEGORY	SUB-CATEGORY
Transportation	Marine Incident
Hazard Description	Hazard Location
Ship/boat incident on inland waterway or at sea	North West (Donegal Sligo Leitrim & Cavan Monaghan)
Date:	Review Date:
June 2024	June 2025

#### 1. Overview of Hazard

North West region has a significant coastline with several piers and the fishing port at Killybegs, The North West has a large number of rivers and lakes.

A number of cargo ships, fishing vessels, pleasure crafts and ferries operate on the rivers, lakes and coast carrying both passengers and freight.

#### 2. Key Historical Evidence

Ireland:

- 2020 Fatal Incident Involving Fishing Vessel FV Myia in Galway bay, 1 fatality
- 2018 Fatal incident Involving a Vessel off Portronan Donegal, 2 fatalities
- 2003, Off Rosslare Europort, Stena Europe ferry lost all power with 155 passengers and 65 crew aboard. The ship was adrift for three hours in winds of 35-45 knots.
- 1991, Dublin Bay collision between 2 cargo ships, 3 fatalities.
- 1986, Cork, Kowloon Bridge ran aground, major oil pollution.
- 1979, Whiddy Island, Bantry, oil tanker explosion, 50 fatalities.

#### UK:

• 1989, River Thames, pleasure boat collided with dredger, 51 fatalities.

# Belgium:

• 1987, Zeebrugge Ferry capsized, 193 fatalities

Italy

- 2012, Isola del Gigl, Italian Cruise Ship, Costa Concordia ran aground 32 fatalities
- EU:
  - Key figures for 2020, Statistics on marine casualties and incidents which: involve ships flying a flag of one of the EU Member States; occur within EU Member States' territorial sea or internal waters, 38 fatalities, 46 very serious casualties, 675 persons injured.

#### 3. Assessment of Impact and Likelihood

Hazard			Likelihood		
	Human Welfare	Environment	Physical Infrastructure	Social	
Marine Incident	Very Serious Dependent on type of boat and capacity.	Very Serious - Heavy contamination if it involves cargo, localised effects of extended	Serious – 3- 10M Euros	Limited: Normal community functioning with some inconvenience	Very Unlikely (Once per 10 - 100 years)

#### 4. Position on Risk Matrix

# 5. Prevention/Control/Mitigation Measures in Place

- Irish Port Safety Week
- European Maritime Safety Agency (EMSA)
- Marine Casualty Investigation Board (MICB)
- Marine Notices from the Department of Transport
- Marine safety procedures and protocols.
- Maritime law.
- Dublin Fire Brigade Marine Emergency Response Team available to region (Tasked by Coastguard)
- Shannon Estuary Anti-Pollution Team (SEA-PT).
- Shannon Foynes Port Company emergency plans.
- Shannon Estuary Serious Incident and Major Emergency Strategic Co-Ordination Document
- Plan exercises involving coastguard and PRAs.

- Further exercises involving coastguard and PRAs.
- Co-operation with and participation in any principal agency training, exercises and protocols that may be put in place in this regard.
- Ship firefighting training required for all responding officers and fire fighters.

#### HAZARD RECORD SHEET 8 LARGE BUILDING FIRE

HAZARD CATEGORY	SUB-CATEGORY
Building Fire	
Hazard Description	Hazard Location
Fire in a large building housing a large number	North West (Donegal Sligo Leitrim & Cavan
of occupants.	Monaghan)
Date:	Review Date:
June 2024	June 2025

#### 1. Overview of Hazard

This individual hazard record sheet assesses the risks which could develop should a fire occur in a large building such as a housing complex, nightclub or hotel. There are numerous hotels in the region with nightclubs and/or holding public dance licenses, with a number of other premises types holding public dance licenses. Some premises may hold over 1000 people at any one time.

#### 2. Key Historical Evidence

#### Irish Examples:

- 2015 Dublin, Carrickmines Halting Site. 10 fatalities
- 1981 Dublin, Stardust nightclub fire. 48 fatalities.
- 1980 Bundoran, Central Hotel fire. 10 fatalities.

#### International Examples:

- 2022 Bronx apartment building fire, 19 fatalities (including 9 children)
- 2020 ICU Hospital Fire Piatra Neamt, Romania, 10 fatalities
- 2001 Volendam, Netherlands, Cafe/nightclub fire. 10 fatalities.
- 1998 Gothenburg, Sweden,. Dance hall fire. 63 fatalities.
- 2009 Perm, Russia, Nightclub fire, 113 fatalities, 140 injured
- 2008 Shenzhen, China, , Nightclub fire, 43 fatalities
- 2009 Bangkok, Nightclub, 64 fatalities
- 2013 Rio Grande do Sul, Brazil, Nightclub 242 fatalities
- 2013 Novgorod region, Russia, Nursing Home, 37 fatalities
- 2017 Grenfell Tower, UK, Residential Building, 72 fatalities, 70 injured

# 3. Assessment of Impact and Likelihood

Hazard	Impact	Likelihood			
	Human Welfare	Environment	Physical Infrastructure	Social	
Fire	Very Serious – Death/injury, burns, toxic poisoning	Limited – Fire damage/destruction, smoke damage, fire water run-off	Serious – Fire/structural damage to building	Limited: Normal community functioning with some inconvenience	Unlikely (Once per 10-100 years)

4. Position on Risk Matrix

# 5. Prevention/Control/Mitigation Measures in Place

- Health and Safety Authority
- Health and Welfare at work Act 2005
- During performance inspections if appropriate.
- Building Control Legislation.
- Fire Services Legislation.
- Planning Legislation.
- Pre fire planning/familiarisation visits.
- Inspection & enforcement by Building Regulations and Planning sections.
- During performance inspections.
- Fire Services Act 1981

# Risk Management Approach: Prevention/Control/Mitigation Measures Required

# • Fire safety enforcement.

• Event safety plans.

6.

- Agreed inter-agency response protocols and procedures.
- Multiservice liaison and exercising.

# HAZARD RECORD SHEET 9 HAZARDOUS MATERIAL INCIDENT

HAZARD CATEGORY	SUB-CATEGORY
Technological	Hazardous materials
Hazard Description	Hazard Location
Hazardous material incident	North West Donegal Sligo Leitrim & Cavan Monaghan
Date:	Review Date:
June 2024	June 2025

#### 1. Overview of Hazard

Although, there are no designated Upper-tier Seveso Sites in the North West (CHO Area 1), there are a number of Seveso sites in Western Area, which are as follows:

#### **Upper Tier Sites:**

- Atlantic Industries Ballina Co. Mayo
- Bellanaboy Bridge Gas Terminal ("Corrib Gas Terminal") Belmullet Co. Mayo
- Topaz, Galway City
- Colas Oranmore Co. Galway
- Money Point Power Station Kilrush, Co. Clare
- Shannon Aviation Fuels, Shannon Co. Clare
- Gouldings, Askeaton, Co. Limerick
- Atlantic Fuels, Foynes, Co. Limerick

LLS Derry NI while outside the jurisdiction must also be considered due to its proximity to Donegal.

#### Lower Tier Sites:

- Calor Teo, Claremoirris, Co. Mayo
- Flogas Ir. Ltd, Ballyhaunis, Co. Mayo
- Tynagh Energy Ltd, Galway
- Enva Ireland Ltd, Smithstown Ind Estate Shannon, Co. Clare
- Grassland Agro Dock Road, Limerick City
- Roche Ireland Ltd, Clarecastle, Co. Clare
- Analog Devices International Raheen Business Park, Limerick
- Avara Shannon Pharmaceutical Services Shannon Industrial Estate Shannon Co. Clare
- Inter Terminals Shannon Ltd Foynes Harbour Foynes Co. Limerick

The region also contains a large number of chemical industries. LPG and Natural Gas are used commonly throughout the region both commercially and domestically. The Irish ring-main gas line runs through the region, and there are a number of pumping stations associated with this line.

# 2. Key Historical Evidence

- 2022 Creeslough, Donegal Gas explosion petrol station/convenience store/apartments 10 fatalities
- 2021 Glenisk's organic yoghurt factory in Killeigh, near Tullamore Extensive Fire destroys plant
- 2008 Little Island, Corden PharaChem, Chemical Explosion, 1 fatality.
- 2006 Ennis, Gas line rupture, a number of people evacuated.
- 2005, Kilmallock, Co. Limerick, 24-hour disruption to local services.
- 2004 Lahinch, Co. Clare, gas leak causing explosion, severe structural damage to premises.
- 2003 Limerick City, Acetylene cylinder explosion, 1 fatality.
- 1994 Cork, Hicksons Pharmaceutical plant, 36 injured, major environmental damage
- 1993 Dublin, Newport Pharmaceuticals plant, 500+ evacuated

# 3. Assessment of Impact and Likelihood

		Likelihood			
Hazard	Human Welfare	Environment	Physical	Social	
			Infrastructure		
Hazardous	Catastrophic:	Very serious:	Serious	Serious:	Unlikely
material	5 to 50	Heavy		Community	(Once per
incident	fatalities, up to	contamination		only partially	10-100
occurring at	100 serious	localised effects		functioning,	years)
a industrial	injuries, up to	or extended		some services	
site	2000	duration.		available.	
	evacuated.				

#### 4. Position on Risk Matrix

# 5. Prevention/Control/Mitigation Measures in Place

- Seveso III Directive 2012/18/EU)
- Internal and External emergency plans.
- Site specific protocols and safety procedures and emergency response teams.
- Fire Services Legislation & Planning Legislation.
- Provision of Fire service including equipment and training.
- Fire service training with risk holders.

- Ongoing inter-agency co-operation, training & exercises
- Develop PRA plans/procedures/protocols for dealing with HAZMAT incidents.

Advice and expertise of private sector to be utilised in the response to chemical incidents.
 HAZARD RECORD SHEET 10 CROWD INCIDENT

HAZARD CATEGORY	SUB-CATEGORY
Civil	Crowd Incident
Hazard Description	Hazard Location
Crowd incident at an organised event involving	North West Donegal Sligo Leitrim & Cavan
large numbers of people	Monaghan
Date:	Review Date:
June 2024	June 2025

# 1. Overview of Hazard

Organised Large Crowd events are a regular occurrence in the HSE West region. Civil disorder at unorganised events through a disturbance or rioting may occur at nightclubs, music events, sporting events, organised protests (e.g. anti-war protests at Shannon Airport), or during visits of controversial public figures.

# 2. Key Historical Evidence

Belgium:
1985, Hysel Stadium, 38 fatalities, 400 injuries.
U.K.:
1989, Hillsborough, 96 fatalities.
1971, Ibrox Park, Glasgow, crush of spectators, 66 fatalities.
Ireland:
1995 - Lansdowne Road, riots at international soccer match.
2004 - 2007, Shannon Airport anti-war protests
2006 - Co. Clare U.S. President Bush visit.
2006 - Love Ulster riots, Dublin.
2006 - 2008, Corrib Gas line disturbances
2012 -SWEDISH HOUSE MAFIA CONCERT PHOENIX PARK THUGS RUN RIOT - THREE DRUG DEATHS, NINE
STABBINGS OVER 30 ARRESTS

the nature of		
the incident.		

#### 4. Position on Risk Matrix

#### 5. Prevention/Control/Mitigation Measures in Place

- vent Management / Risk assessment.
- Planning legislation "Event Licence".
- Safety at Sports Grounds Guidance.
- Co-operation and planning by each Principal Response Agency prior to and during an organised event.

- Guidance required when dealing with unlicensed events.
- Continued event management and risk assessment.
- Ongoing co-operation with and participation in any principal agency training, exercises and protocols that may be put in place in this regard.

# HAZARD RECORD SHEET 11 INFLUENZA PANDEMIC

HAZARD CATEGORY	SUB-CATEGORY
Influenza Pandemic/Epidemic	Communicable Diseases
Hazard Description	Hazard Location
Influenza Pandemic/Epidemic in Ireland	North West (Donegal, Sligo, Leitrim, Cavan and Monaghan)
Date Reviewed:	Review Due:
June 2024	June 2025

#### 1. Overview of Hazard

In the Northern Hemisphere, the influenza season commences in October and continues through to May. In general influenza outbreaks last between 6 - 8 weeks and can affect all ages, in particular the extremes of age, but can last for twice as long (2017/2018). The World Health Organisation (WHO) makes a recommendation every year as to which strains of influenza are most likely to be circulating during the flu season and thus for inclusion in the seasonal flu vaccine. All healthcare workers are recommended to get the flu vaccine.

Pandemic Influenza, however, can occur at any time of the year. An influenza pandemic is a global epidemic caused by a new influenza virus to which there is little or no pre-existing immunity in the human population. The most recent pandemic occurred in May 2009 and was caused by an influenza A (H1N1) virus. It lasted until August 2010 and is estimated to have caused between 100 000 and 400 000 deaths globally in the first year alone.

Influenza virus undergoes minor changes on its surface regularly as it multiplies. This is known as antigenic drift and is the reason why a person needs to be vaccinated annually.

When more major changes occur in the structure of the virus such that a new virus subtype is produced, this is known as antigenic shift. This is of major importance, as the general population will not have any protection against this new virus. The new subtype can cause a pandemic if it has the ability to spread rapidly from person to person and if it is virulent. As a result large numbers of people all over the world are affected over a relatively short space of time and some cases can prove fatal.

#### Zoonotic Influenza Viruses

Animal influenza viruses are distinct from human seasonal influenza viruses and do not easily transmit between humans. However, animal influenza viruses that may occasionally infect humans through direct or indirect contact - can cause disease in humans ranging from a mild illness to death.

Examples of zoonotic influenza viruses that have recently caused human infections include highly pathogenic avian influenza A(H7N9), A(H5N1), and A(H5N6); low pathogenic avian influenza A(H7N2), which was transmitted from a cat; and swine influenza A(H1N2)v and A(H3N2)v.

Whether currently-circulating avian, swine and other zoonotic influenza viruses will result in a future pandemic is unknown. Experience with the emergence of such a variety of different influenza strains that transmit from animals to humans illustrates the highly unpredictable nature of influenza

viruses such that assumptions about where the next influenza virus with pandemic potential will emerge, or what its characteristics will be, cannot easily be made. This uncertainty underscores that planning should not focus only on avian influenza but should be based on broad and robust surveillance and evidence-based risk assessment.

# Surveillance

The global community needs to be continually alert to the possibility of another pandemic strain emerging at any time, as pandemics, like the viruses that cause them, are unpredictable.

Influenza surveillance can provide information that may help detect and manage a pandemic. This involves the collection of both clinical and virological data. Clinical surveillance monitors the impact of the illness on the health service and the community, while virological surveillance confirms that influenza is circulating and also identifies the current strain.

The WHO Global Influenza Surveillance and Response System comprises 153 institutions in 114 countries. The network acts as a global alert mechanism, monitoring circulating influenza viruses in order to detect the emergence of those with pandemic potential.

In Ireland, Influenza is a notifiable disease and is reported to Departments of Public Health who are responsible for the surveillance, investigation and control of infectious diseases. Outbreaks of influenza are usually managed by Depts. Of Public Health.

The Health Protection Surveillance Centre in partnership with the Irish College of General Practitioners (ICGP) and the National Virus Reference Laboratory (NVRL) have established a network of sentinel general practices which report on a weekly basis the number of patients seen with influenza-like illness. Virological confirmation identifies the type, and subtyping of influenza is often undertaken by the NVRL.

Following collection of the data a weekly influenza report is compiled throughout the influenza season, which runs from October to May. Reports of influenza activity in Europe and Worldwide are also provided as part of the overall monitoring of influenza activity.

Influenza pandemics, whether mild, moderate or severe, affect a large proportion of the population, which puts significant strains on health and other essential services and may result in significant economic losses. As an influenza pandemic may last months or even years, this requires a sustained response in the health sector but also in other sectors providing essential services, such as energy and food production. Large numbers of staff are likely to be absent from work at any one time.

As a result essential functions of the Principal Response Agencies would be affected due to lack of resources. At a European level, the EU "Guide to revision of national pandemic influenza preparedness plans: Lessons learned from the 2009 A (H1N1) pandemic" recommends strategic planning at both national and subnational level, intersectoral planning, business continuity and surge capacity planning.

# 2. Key Historical Evidence

In the past 300 years there have been at least ten influenza pandemics and four of them have occurred in the last ninety years. In the 20th century, there were three influenza pandemics: 'Spanish flu' (1918-1919), 'Asian flu' (1957-1958) and 'Hong Kong flu' (1968-1969). Of these pandemics, the Spanish flu, which was caused by an avian influenza virus, had the most devastating impact and resulted in about 40 million deaths worldwide. The Asian flu caused more than two million deaths worldwide, while the Hong Kong flu resulted in about one million deaths.

Seasonal Influenza and Pandemic Influenza are a significant cause of mortality. The annual number of deaths reported in Ireland from Influenza in recent years is shown below. The high number for 2017/2018 highlights the severity of this Influenza season.

COVID 19 originated in China in late 2019. The first cases in Europe were identified in early 2020, it quickly developed causing mass fatalities and large hospitalisation numbers. Within months, Governments worldwide initiated a series of strict protocols around, social distancing, hand hygiene, face coverings as well as lockdowns of major parts of their economies in a bid to curtail the spread. Various mutations of the virus appeared throughout 2020 and 2021causing major disruption to business, travel and industry. Multiple vaccines were developed and mass vaccination programmes were rolled out internationally. In Ireland the uptake of vaccines was very successful and while the pandemic went through a series of waves it became somewhat under control in 2022 with most restrictions being lifted.

Flu Season	2012/2013	2013/2014	2014/2015	2015/2016	2016/2017	2017/2018	2018/2019
Number of deaths	38	58	66	84	95	222	97

In the 2018/2019 season the number of confirmed influenza cases admitted to ICU was 159.

Hazard	Impact			Likelihood	
	Human Welfare	Environment	Physical Infrastructure	Social	
Influenza pandemic	Catastrophic– significant fatalities, illness, loss of essential services due to absenteeism.	Minor	Minor	Very Serious: Community functioning poorly, minimal services available	Unlikely (Once per 10 - 100 years)

# 3. Assessment of Impact and Likelihood

# 4. Position on Risk Matrix

#### 5. Prevention/Control/Mitigation Measures in Place

- Plans have been developed from the work of expert groups in the HSE on vaccines and antiviral medicines, surveillance, communications, case management, laboratory operation, personnel and supplies.
- In the event of a pandemic antiviral medicine (drugs used to treat influenza) will be given to people who are infected with the flu virus.
- Effective use of pandemic vaccines

- Identify essential functions and posts whose absence would place business continuity at particular risk.
- Put in place measures to maintain core business activities for several weeks with high levels of staff absenteeism.
- Identify which services could be curtailed or closed down during all, or the most intense period, of the pandemic.
- Identify inter-dependencies between organisations and make sure they are resilient. For example, suppliers delivering services under contract should have arrangements in place to continue to provide their service.
- Ensure employees are aware of official advice on how to reduce the risk of infection during a pandemic. (This will be available as part of the HSE communications plan during a pandemic)
- Ensure that adequate hygiene (e.g. hand-washing) facilities are routinely available.

# HAZARD RECORD SHEET 12 TERRORISM

HAZARD CATEGORY	SUB-CATEGORY
Terrorism CT	Bombs
Hazard Description	Hazard Location
Damage, Injury, Fatalities, Disruption to essential services	North West Donegal Sligo Leitrim & Cavan Monaghan
Date	Review Date
June 2024	June 2025

#### 1. Overview of Hazard

Acts of terrorism occur in practically every society in the world as some point in its history. Typically, the term terrorism conjures up images of rebellious groups planting car bombs, incendiary devices and trying to disrupt opposing factions or the establishment of a State by committing callous murders of people pursuing opposing beliefs or going about employment on behalf of the State. The island of Ireland is no stranger to acts of terrorism given its history. Whilst incidents of terrorism have significantly reduced in the past number of years, small active groups still exist who pursue their stated cause by violent means. Furthermore, terrorism has become more chemically based in some instances and cross nations in the rest of the world.

Since 2015 there has been an increase in the emergence of Radical Groups worldwide which have led to increased acts of terrorism targeting civilian populations resulting in Mass Fatality events.

Ireland has seen much tragedy in the past fifty years occasioned by acts of terrorism. Incidents still occur almost on a daily basis where suspicious devices are located and dealt with by army experts which reminds us that the threat of terrorism to the State is ever present. Only some more recent acts of terrorism are included below as historical evidence.

#### Hazards:

- Large scale personal injury and fatalities requiring hospitalisation
- Damage to property including vital installations
- Disruption of arterial traffic routes.

2. Key Historical Evidence (the atrocities in Northern Ireland and worldwide are too numerous to log- the most recent significant are noted below)

1999 Omagh Co. Tyrone 1th August 1998 29 dead 220 injured 2001 New York Arlington Pennsylvania September 11<sup>th</sup> 2001 "9/11" attacks 3,000 dead 2,680 injured – 10,000 9/11 cancer related cancers

2005 London July 7<sup>th</sup> London Underground 56 dead including suicide bombers 700 injured

2013 Donegal August 26<sup>th</sup> Live LED discovered at Carrowmore Gleneely (International Rally)

2013 Derry March 3<sup>rd</sup> Four mortar bombs discovered in Derry

2015 Paris November 13<sup>th</sup> 2015 multiple attacks across city 130 dead 416 injured

2017 Manchester Area May 22<sup>nd</sup> 2005 Ariana Grande concert 23 dead 1,017 injured

2019, November: 29<sup>th</sup> 2019 London Bridge stabbing 2 dead 3 injured

# 3. Assessment of impact and likelihood

Hazard		Impact			Likelihood
	Human Welfare	Environment	Physical Infrastructure	Social	
Terrorism	Very Serious	Serious. Catastrophic if chemical explosion caused.	Serious – 3- 10M Euros	Serious – Long lasting effects for survivors of terrorist attack	Likely (Once per 1 - 10 years)

# 4. Position on Risk Matrix

#### 5. Prevention/Control/Mitigation Measures in Place

- Anti terror legislation (Offences Against the State Act 1939/1998
- Policing measures surveillance, checkpoints, intelligence.
- Plan exercises involving coastguard and PRAs.

- Further exercises involving PRAs.
- Co-operation with and participation in any principal agency training, exercises and protocols that may be put in place in this regard.

#### Aide Memoire on Seeking Defence Forces Assistance in Aid to the Civil Authority

- 1. 1 Brigade are tasked by Defence Force Headquarters to be prepared to provide Aid to the Civil Authority<sup>1</sup> (ACA) within the Brigade's Area of Operations (AO). For ACA purposes <u>only</u>, 1 Brigade AO covers the counties of Cork, Kerry, Limerick, Clare, Tipperary, Waterford, Kilkenny, Wexford, Carlow, Galway, Mayo and Roscommon.
- 2. Operations Section, 1 Brigade, which is located in Collins Barracks, Cork is the point of contact for agencies seeking ACA within this AO.
- **3.** Troops responding to requests will normally be deployed from either Collins Barracks in Cork, Sarsfield Barracks in Limerick, Stephens Barracks in Kilkenny or Dún Uí Mhaoilíosa (Renmore Barracks) in Galway. In time critical situations, direct contact may be made with the Barracks.
- 4. As the Defence Forces are not a Principal Response Agency in terms of Emergency Management a lead in time is required before 1 Brigade are in a position to respond to requests. This lead in time will be dependent on the type and timing of the request. It is therefore recommended that agencies include the Defence Forces in contingency planning regarding potential Emergency Situations.
- Operations Section, 1 Brigade is contactable by telephone 24 hours a day, 7 days a week.
- 6. The attached proforma outlines the contact details of Operations Section, Collins Barracks and of the other Barracks. It also contains the information required regarding the requested Operation. It is assumed that the agency seeking assistance will vet and prioritise all internal requests for support prior to contacting the Defence Forces.

<sup>&</sup>lt;sup>1</sup> The term *Civil Authority* generally refers to Government Departments, Local Authorities and the Health Service Executive.

Procedure for Requesting Assistance from the Defence Forces

The following is the procedure for requesting assistance from the Defence Forces:

(1) Where <u>time is critical</u>, contact should immediately be made directly with the Department of Defence. It is then advisable that contact be made to the local military post, to advise them that a formal request has been made and to provide this relevant post with the necessary information. (*This will have the effect of speeding up the practical and logistic issues at a local level, while the formal 'due process' is being carried out*). In addition, Garda Authorities should then be notified as soon as possible.

(2) Where <u>time is not critical</u>, the request should be made, (in the case of Local Authorities), through the Department of the Housing, Planning & Local Government. This Department will in turn formally eMail the Secretary at the Department of Defence situate at Parkgate, Dublin 8, using the form outlined in Section (e) of this Appendix and the eMail addresses of <u>1sbdeops@defenceforces.ie</u> and <u>bdo.south@defenceforces.ie</u>. As in para 1 and in the case of non-time critical events, local liaison still should be carried out with the local military post to allow them to begin planning.

The following arrangements should be made locally in relation to (1) above:

- (i) The local agencies should each designate a Senior Official who would filter and pass on the request for assistance to the Garda Authorities.
- (ii) Discussions between designated officials and local senior military personnel should be held on a regular basis.

#### Aide Memoire on Seeking Defence Forces Assistance in Aid to the Civil Authority

 2 Brigade is tasked by Defence Force Headquarters to be prepared to provide Aid to the Civil Authority<sup>1</sup> (ATCA) within the Brigade's Area of Operations. The 2 Brigade provides ATCA cover to the following Major Emergency Management (MEM) Areas and the associated counties outlined in Table 1. Troops responding to requests will normally be deployed from the Barracks responsible for each MEM area.

MEM Areas	Counties	Barracks Responsible
East	Dublin	Cathal Brugha Barracks,
	Kildare	Rathmines, Dublin
	Wicklow	
Midlands	Longford	Custume Barracks,
	Westmeath	Athlone, Co Westmeath
	Offaly	
	Laois	
North East	Cavan	Aiken Barracks,
	Monaghan	Dundalk, Co Louth
	Meath	
	Louth	
North West	Donegal	Finner Camp, Co
	Sligo	Donegal
	Leitrim	

Table 1

2. Agencies requesting assistance should contact Operations Section, 2 Brigade, which is contactable by telephone 24 hours a day, 7 days a week and is located in Cathal Brugha Barracks, Dublin.

Timings	Contact Details
0830 -1630 Monday to Friday	Telephone: 01 8046218 Facsimile: 01 4974027
1630 – 0830 Monday to Friday weekends and Public Holidays	Telephone: 01 8046294 Facsimile: 01 4974027

Table 2

- 3. As the Defence Forces are not a Principal Response Agency in terms of Emergency Management a lead in time is required before 2 Brigade are in a position to respond to requests. This lead in time will be dependent on the type and timing of the request. It is therefore recommended that agencies include the Defence Forces in contingency planning regarding potential Emergency Situation.
- The attached proforma Annex A should be completed when requesting ATCA from the Defence Forces. It is assumed that the agency seeking assistance will vet and prioritise all internal requests for support prior to contacting the Defence Forces.
- Annex B outlines the 2 Brigade areas of responsibility for the provision of Aid to the Civil Authority to the MEM areas.

<sup>&</sup>lt;sup>1</sup> The term *Civil Authority* generally refers to Government Departments, Local Authorities and the Health Service Executive.

## APPENDIX 10 - CASUALTY BUREAU AND ROLE OF THE CORONER

#### Protocol Between An Garda Síochána and the HSE

#### Introduction

In the event of a Major Emergency involving a significant number of casualties, An Garda Síochána will establish a Casualty Bureau to collect and collate the details of all casualties and survivors, in accordance with Clause 5.7.4 of **A Framework for Major Emergency Management (2006)**.

This is a critical element of the process, coordinated and provided by the Principal Response Agencies for casualties, their relatives and friends in the aftermath of a Major Emergency.

### **Hospital Role**

When the Garda Team arrives at a hospital, it is important that people and procedures are in place (as detailed in the Hospital Major Emergency Plan) to accommodate the arrival and work of the Team.

To achieve this, each hospital, which may receive casualties from a Major Emergency, must have (as far as possible):

- A nominated individual (with alternates), who will act as liaison officer between the hospital and the Garda Documentation Team, i.e. The Hospital /Garda Casualty Liaison Officer
- A location (office) where the Garda Casualty Team can work, which has
  - a telephone (or preferably 2)
  - access to a printer / photocopier

#### **Key Information**

The Garda Casualty Form is an extensive document, but the <u>key information fields</u> that the Garda Documentation Team will be seeking to complete, in the case of each individual casualty, are

- Hospital Patient Reference Number
- Surname
- Forename
- Date of Birth (or Approximate Age)
- Sex
- Condition
  - Minor Injuries
  - Seriously Injured
  - Life threatening injuries
  - Deceased

Obviously in the case of some casualties (for example unconscious casualties) some of this key information may not be available.

Other information fields, such as current address, nationality and details of next of kin, will be completed, where practical.

## **Further Information:**

An Garda Síochána will provide the services of a Casualty Bureau in conjunction with the other two Principal Response Agencies.

## **Casualty Information**

The accuracy of information in relation to casualties is of vital importance and the key information sought must be verified before distribution to media outlets. The following is an indication of the core information required in the aftermath of a Major Disaster:

- How many were killed or injured
- Of those injured, how serious is their condition
- How many uninjured of the total involved
- Were any of the victims prominent persons
- Where were those involved in the aftermath of the incident
- Hospitals, Rest Centres, Friends / Relatives Reception Centre
- Facilities to deal with injured / deceased

### The Garda Casualty Form

As part of this process, An Garda Síochána have prepared a standard Casualty Form which <u>they</u> will use to collect information on casualties. For this purpose casualties include any person, who is killed or injured, as well as survivors, missing persons and evacuees.

When casualties from a Major Emergency are brought to a hospital, a Garda Casualty Documentation Team will be sent to the hospital to complete (as much as possible) a Casualty Form in respect of each casualty.

The form is reproduced here for information only. It is a Garda task to complete this form. This form once completed is forwarded to the Casualty Bureau and/or Incident Room, collated and cross referenced with other information.

#### Release of Casualty Bureau number to the Press and to the Public

At the time of an incident, the Gardai will establish a dedicated Casualty Bureau phone number that will be made available to the public through the media. This process will be coordinated by the Garda Press Office in conjunction with the Casualty Bureau Supervisor and Senior Officer in Charge of the incident.

It is worth noting that there is a time lag between the activation of procedures to establish the Casualty Bureau and activation of the dedicated call centre at Garda Headquarters.

Advice to the public (via the media) will be given through the Garda Press Office of when the Casualty Bureau dedicated telephone lines are operational.

An Garda Síochána will request families of persons missing to **nominate one Person to contact the help lines / casualty bureau** to minimise the number of queries, duplicate records and as far as possible the burden on the recording system and personnel involved.

## Closure of Casualty Bureau

Closure of the Casualty Bureau will take place after consultation between the Casualty Bureau Supervisor and the Senior Garda Officer in charge of the incident and Inspector in charge Garda Communications Centre, Harcourt Square.

## The following diagram is an outline of the planned procedures.

# The Role of the Coroner

The Coroner is an independent judicial officer, who has responsibility for investigating all sudden, unexplained, violent or unnatural deaths. It is the task of the Coroner to establish the 'who, when, where and how' of unexplained deaths. All such deaths in Ireland are investigated under the Coroners' Act, 1962.

### The Coroners' Act, 1962

S 17.—Subject to the provisions of this Act, where a coroner is informed that the body of a deceased person is lying within his district, it shall be the duty of the coroner to hold an inquest in relation to the death of that person if he is of opinion that the death may have occurred in a violent or unnatural manner, or suddenly and from unknown causes or in a place or in circumstances which, under provisions in that behalf contained in any other enactment, require that an inquest should be held.

The Coroner has overall responsibility for the identification of bodies and remains and s/he is entitled to exclusive possession and control of a deceased person until the facts about their death have been established. A full post-mortem and forensic examination will be carried out on everybody from a major emergency and each death will be the subject of an Inquest. The post-mortem is carried out by a Pathologist, who acts as the 'Coroners Agent' for this purpose.

### List of Coroners Districts

The coroner's districts listed in the appropriate Garda Division Major Emergency Plan. The districts are roughly equivalent to Local Authority areas, although there are some cases where a number of Coroners operate in the same Local Authority area. Each of the districts has one Coroner and a Deputy Coroner, who acts for the Coroner in the event of absence or illness. All Coroners must be either registered medical practitioners or practising solicitors or barristers for five years.

### **Planning for Fatalities**

Multiple fatalities are a feature of many major emergencies and each Principal Response Agency should have robust arrangements in place, which set out that agency's role in dealing with fatal casualties. Once rescue is complete, and there are no further live casualties at the site, the focus of work there turns to evidence recovery. No removal/recovery of the dead will usually take place without the Coroner's authority, except as provided for in Section 5.7.2 of the Framework.

Stage	Who	Action	Facilities	Who may
			Required	assist
Finding the casualty	Any agency			
Recognising as dead	Doctor or	Label casualty as	Triage Labels	
	Paramedic	'DEAD'		
Pronouncing dead	Doctor	Sign Triage Label
