

The National Maternity Hospital **DRAFT**

Maternity Patient Safety Statement – March 2019

These summary statistics reflect the most recent monthly activity at The National Maternity Hospital. We hope that these data provide reassurance regarding the quality and safety of services at our hospital. These figures are not formatted in a way to support comparison with other hospitals or aggregation with other data. Given the complexity of care at our hospital, which is a national tertiary referral centre, it is not appropriate to compare any of these statistics with other hospitals that have different patient numbers or types of clinical workload.
