

# Maternity Patient Safety Statement

This is a monthly report, specific to the hospital named below setting out a range of information on the safety of maternity services.

Hospital Name	University Maternity Hospital Limerick	Reporting Month	April
Purpose & Context	<p>This Statement is used to inform local hospital and hospital Group management in carrying out their role in safety and quality improvement. The objective in publishing the Statement each month is to provide public assurance that maternity services are delivered in an environment that promotes open disclosure.</p> <p>It is not intended that the monthly Statement be used as a comparator with other units or that statements would be aggregated at hospital Group or national level. It assists in an early warning mechanism for issues that require local action and/ or escalation. It forms part of the recommendations in the following reports:</p> <ul style="list-style-type: none"> <li>• HSE Midland Regional Hospital, Portlaoise Perinatal Deaths, Report to the Minister for Health from Dr. Tony Holohan, Chief Medical Officer, 24 February 2014; and</li> <li>• HIQA Report of the Investigation into the Safety, Quality and Standards of Services Provided by the HSE to patients in the Midland Regional Hospital, Portlaoise, 8 May 2015.</li> </ul> <p>It is important to note tertiary and referral maternity centres will care for a higher complexity of patients (mothers and babies), therefore clinical activity in these centres will be higher and therefore no comparisons should be drawn with units that do not look after complex cases.</p> <p>Maternity Safety Statements form part of the suite of key performance indicators for the maternity services. Hospitals must populate and publish on a monthly basis (2 months in arrears). Additionally, the statements are discussed at the Hospital Group Maternity Network meetings with the National Women and Infants Health Programme as part of the quality and safety agenda.</p>		

Maternity Patient Safety Statement for Publication

Headings	Ref	Information Areas	2022	
			Month	Year to date
			April	
<b>Hospital Activities</b>	1	Total mothers delivered $\geq$ 500g (n)	321	1286
	2	Multiple pregnancies (n)	6	31
	3	Total births $\geq$ 500g (n)	327	1317
	4	Perinatal mortality rate – adjusted (per 1,000 total births)	0.0 Per 1000	0.0 Per 1000

<b>Maternity Services Total Clinical Incidents</b>	17	Total number of clinical incidents for <b>Maternity Services</b> (reported monthly to NIMS) (n)	56	205

## Maternity Patient Safety Statement for Publication

### DEFINITIONS

(n) = Number

Nulliparas = Women who have never had a previous pregnancy resulting in a live birth or stillbirth ( $\geq 500\text{g}$ )

Multiparas = Women who have had at least one previous pregnancy resulting in a live birth or stillbirth ( $\geq 500\text{g}$ )

N/A = Not available

◇ An executive decision was made to return major obstetric events presenting to our general hospital, giving a clearer picture of obstetric management. This is likely to raise our figures when compared to hospitals not returning data from general hospitals. This is particularly relevant to pulmonary embolism numbers.

The Maternity Patient Safety Statement for (University Maternity Hospital Limerick) provides up to date information for management and clinicians who provide maternity services in relation to a range of patient safety issues for the month of (April) and year (2022)

The information in this Statement is a core element of clinical governance and management of maternity services within the above hospital and the University of Limerick Hospital Group.
