

### Rationale for measurement

Demonstrates the volume of clinical activity in each organisation and information is reported on the total number of mothers delivered, the total numbers of births, the number of multiple pregnancies, and transfers in and out to hospitals.

### Measurement methodology and data sources:

Local extracts submitted monthly and extrapolated for analysis and publication.

### Target

These figures are not formatted in a way to support comparison with other hospitals or aggregation with other data.

### Measurement methodology and data sources:

Local data extracts submitted monthly and extrapolated for analysis and publication.

### Target

The figures beneath are not formatted in a way to support comparison with other hospitals or aggregation with other data. Context is provided in the graph in section 'Perinatal Deaths  $\geq$ 2.5kg without a Congenital Anomaly (Perinatal Adjusted)'.
