

## Drawing a Giraffe with Edel

**Name:**

**Date:**

### New Directions: Personal Expression and Creativity

#### You will need:

Pencil

Some paper

Eraser

1. Firstly, going to turn the page vertical
2. Start by drawing the eye in the shape of a circle
3. Above the eye, we will start the head by drawing another line repeating underneath and connecting the 2 points together
4. To create some leafs which the giraffe is eating, draw two oval lines and connecting them while also drawing a line each side in the oval circles
5. Drawing the ears draw a line up and finish like a circle but don't close the circle

6. To draw the neck we are going to draw one line down with a slight curve in it. Drawing the same on the other line but keeping the line straight

7. Now, going to draw a tail by narrow line and joining it the line for the giraffe back

8. Creating the giraffe's leg, draw two lines with a slight curve

9. Recreating the same line for the rest of the giraffe's legs also adding a small line with a slight curve to join the legs together

10. To create the feet were going to add almost a box shape

11. Now we have created the outline of the giraffe, we will now give him a patten by drawing small circles

12. Adding some extra features, we going to create some leaves and grass

Well done guys, now you have created a wildlife giraffe

Why not add some colour to your giraffe and add it to the Reconnect Facebook page
