A statement about the effectiveness of the approved centre's actions to eliminate, where possible, and reduce physical restraint

There were no physical restraints at the approved centre during 2024. However, it should be noted that the centre had been closed for refurbishments from October 2023, only reopening on 15th August 2024. Thus the figures reported here refer only to the period after that date. This combined with it being a small centre, with resultant small numbers, makes it difficult to make a meaningful comparison with previous years, nor to interpret the lack of any restraints during the four and a half months, as being part of any trend.

A statement about the approved centre's compliance with the code of practice on the use of physical restraint

A detailed policy was in place, outlining roles, responsibilities, and training. The policy had been reviewed in March 2024.

However, this policy was found not to be compliant with the code of practice for physical restraint during the Mental Health Commission inspection in September 2024 because, in relation to staff training on physical restraint, the policy did not identify the appropriately qualified persons to give the training, 8(2)(c).

The policy has subsequently been amended accordingly.

A statement about the compliance with the approved centre's own reduction policy

The annual report for the year 2023 was not published on the approved centre's website at the time of the 2024 inspection, 7(7)(b).

This has since been rectified.
