

Fulvestrant Therapy

INDICATIONS FOR USE:

INDICATION	ICD10	Regimen Code	Reimbursement Status
Treatment of postmenopausal women with oestrogen receptor positive, locally advanced or metastatic breast cancer for disease relapse on or after adjuvant anti-oestrogen therapy.	C50	00361a	CDS
Treatment of postmenopausal women with oestrogen receptor positive, locally advanced or metastatic breast cancer for disease progression on or after adjuvant anti-oestrogen therapy.	C50	00361b	CDS

TREATMENT:

The starting dose of the drugs detailed below may be adjusted downward by the prescribing clinician, using their independent medical judgement, to consider each patient's individual clinical circumstances.

Fulvestrant is administered on day 1 and day 14 for cycle 1 and then on day 1 of a 28 day cycle for all subsequent cycles until disease progression or unacceptable toxicity occurs.

Day	Drug	Dose	Route	Diluent & Rate	Cycle
1, 14	Fulvestrant	500 mg	IM	N/A	1
1	Fulvestrant	500 mg	IM	N/A	Continuous

Administered as two consecutive 5 ml injections by slow intramuscular injection (1-2 minutes/injection), one in each buttock

ELIGIBILITY:

- Indications as above
- ECOG performance status 0-2

EXCLUSIONS:

- Hypersensitivity to fulvestrant or any of the excipients
- Severe hepatic impairment
- Pregnancy and lactation

PRESCRIPTIVE AUTHORITY:

The treatment plan must be initiated by a Consultant Medical Oncologist

TESTS:

Baseline tests:

- FBC, renal and liver profile

Regular tests:

- Liver profile as clinically indicated.

Disease monitoring:

Disease monitoring should be in line with the patient's treatment plan and any other test/s as directed by the supervising Consultant.

DOSE MODIFICATIONS:

- Any dose modification should be discussed with a Consultant.

Renal and Hepatic Impairment:

Table 1: Dose modification of fulvestrant in renal and hepatic impairment

Renal Impairment	Hepatic Impairment
<p>No dose adjustments are recommended for patients with mild to moderate renal impairment (creatinine clearance ≥ 30 ml/min).</p> <p>Safety and efficacy have not been evaluated in patients with severe renal impairment (creatinine clearance < 30 ml/min), and, therefore, caution is recommended in these patients.</p>	<p>No dose adjustments are recommended for patients with mild to moderate hepatic impairment. However, as fulvestrant exposure may be increased, fulvestrant should be used with caution in these patients.</p> <p>There are no data in patients with severe hepatic impairment</p>

SUPPORTIVE CARE:

EMETOGENIC POTENTIAL: Minimal (Refer to local policy).

PREMEDICATIONS:

None required

OTHER SUPPORTIVE CARE:

No specific recommendations

ADVERSE EFFECTS / REGIMEN SPECIFIC COMPLICATIONS

The adverse effects listed are not exhaustive. Please refer to the relevant Summary of Product Characteristics for full details.

- Due to the intramuscular route of administration, fulvestrant should be used with caution if treating patients with bleeding diatheses, thrombocytopenia or those taking anticoagulant treatment.

DRUG INTERACTIONS:

- Current drug interaction databases should be consulted for more information.

ATC CODE:

Fulvestrant - L02BA03
