

Update of NCIS Chart to version 2025-07

NCIS Chart will be updated to version 2025-07 on October 16th, 2025. New features that users might like to note are outlined below. Version 2025-07 will be available in the NCIS Training environment from September 30th 2025, to provide the opportunity to “Use & Learn” the changes.

Therapy Form – Ready to Treat Date

When a therapy form is created in NCIS Chart and a subsequent therapy plan created in NCIS Med the ‘Ready to treat date’ field in the therapy form will no longer automatically populate with the first day of planned treatment. The date can be manually entered at a later stage. The ‘Start date’ field will automatically populate with the first day of treatment; because of this, when a date is entered in the ‘Ready to treat date’ field, the ‘Working days between Ready to treat Date - Start of treatment’ field will automatically be calculated and entered.

The screenshot shows the 'Therapy (NCIS med), Therapy line 1' form. The 'Ready to treat Date' is set to 11.07.2025. The 'Working days between Ready to treat Date - Start of treatment' is calculated as 2. The 'Start date' is 02.06.2025. The 'Diagnosis' is C56. The 'Performance Status' is ECOG. The 'Height and Weight Assessment Date' is 11.07.2025. The 'Therapy Plan from NCIS med' is Bevacizumab 7.5mg/kg - 21 days - Version 2. The 'Therapy intent' is Curative. The 'Therapy setting' is Neo-adjuvant. The 'Start date' is 21.07.2025.

Worklists – New Functionality

Improvements have been made to the worklist functionality. Users can now complete entries directly from the “my work list entries” section in my workspace.

The screenshot shows the 'My Worklist' section with a table of worklist entries. The table has columns for Date, Name, and Subject. The entries are: 20.09.2025 Mrs NewCrtix, NCIS; 09.09.2025 Mrs NewCrtix, NCIS; 11.09.2025 Mr ZTTEST, SLHTONP; 11.09.2025 Mr ZTTEST, test personal 2.

If there are work list entries, the worklist entry box now appears above all forms not just in the tumour case tab. Users can complete entries from any form by clicking on edit button first and then checking the complete box.

The screenshot shows a confirmation dialog box asking 'Do you want to mark the worklist item as done?'. The 'OK' button is highlighted.

Further details in the NCIS Guide- Worklists available in HSEland Discovery Zone.

Fix for Conference Output – Patient List

An Issue where the Patient list was providing details for patients splitting over 2 pages has been fixed. Where the next patient appears on the list, and the details require more space than is available on the current page, the entry begins on a subsequent page.

The screenshot shows the 'Conference Output' section with a patient list. The list includes patient details such as Name, Date of Birth, and Primary diagnosis. The patient list is split across two pages, with the second page showing the continuation of the list.

New Assessment Form – Pre SACT

The Pre SACT Assessment form is available in the Assessment Tab.

This form includes the following sections:

- A Treatment Section
- Toxicity Checks
- Pre SACT Treatment Checks
- PIVC Record
- Pre SACT Bloods and Urinalysis
- SACT Administration
- MDT Referrals Made
- Details of Next Appointment

The screenshot shows the 'Pre SACT Assessment' form. It includes sections for Patient Information, Treatment, Toxicity Checks, and Next Appointment details. The 'Toxicity Checks' section is highlighted, showing a grid of checkboxes for various symptoms and signs.

New Flowchart for Toxicities

A flowchart feature has been included to display the Toxicities entered in the Toxicity checks section of the Pre SACT Assessment Form.

The screenshot shows the 'Toxicity Checks' section of the Pre SACT Assessment form. It includes a grid of checkboxes for various symptoms and signs. A flowchart icon is visible in the top right corner.

A flowchart feature has been included to display the Toxicities entered in the Toxicity checks section of the Pre SACT Assessment Form. This is available in the Clinical History Tab and the link in the Therapy Form
