When cancelling a medication NCIS.Med (BD CATO) behaves differently if there are medications that are already prepared or dispensed.

If a medication has not been prepared or dispensed, then cancelling medication(s) only requires a reason to be recorded. If a medication is prepared or dispensed but has not been administered, the system needs to know what to do with those medications if you no longer require them. This guide will explain how the system behaves in these different scenarios and what to do in each case.

Please note that all screenshots in this guide are taken from the training environment in NCIS and do not contain any real patient information.

1.1 Cancelling a medication that hasn't been prepared or dispensed

To cancel a medication that hasn't been prepared or dispensed select the medication to be cancelled, click the status/flag button and select cancelled from the dropdown menu.

1.2.1 Marking a product as returned

If the product is marked as returned it will appear in the returned products list and will automatically be quarantined. It is up to local workflow to decide whether to remove the product from quarantine and re-use it or whether the product should be discarded.

1.2.2 Re-ordering

Selecting re-order when cancelling a product will cancel the original medication and create an exact copy of the medication in a pharmacist verified status.

It is not possible make any changes to this medication i.e. the dose, vehicle etc. For this reason, the re-order function is ideally used when something has gone wrong with the preparation, e.g. the product is leaking or some particulate was found during release checks, and the exact same medication for the exact same patient needs to be prepared again.

1.3.2 Returning dispensed products to stock

For dispensed products selecting 'return dispensed products to stock' box triggers a warning indicating that the step can't be undone, click yes to continue.

	0	Cancel medication	x
		Cancel medication	
		Possible reasons	
		Cumulative life exposure level reached Not required Attention	Â
1 101		Reason Attention! This step cannot be undone for dispensed products. Yes No	
1			-
		□ Reorder 🗹 Return dispensed products to stock 🗸 Cance	2 1

The dose modification wizard will now ask if subsequent medications with the same active ingredient and route should also be cancelled.

Dose Modification Wizard							
Dose Modification Wizard							
Should subsequent medications with Fluorouracil and administration route by intravenous injection be canceled as well?							
● No							
O Adjust all subsequent medications: 7 more							
Note: There are subsequent medications with different administration routes that will not be modified.							
Authorization is missing for modification / cancellation of: 3 additional medications.							
✓ OK							

Once this step has been completed the product will be added back into stock in the lot management section and will be available for selection again.

1.4 Cancelling a medication that has been set-up or dispensed

If a medication has been set up i.e. lots have been assigned and the parts list is saved and then gets cancelled it will appear in the preparation sets screen with an 'X' in the preparation approval column.

Before cancellation:

				epa	rations 0	Prep	aration sets 1	
\$! ▼ 1				Prep. no.	Med. no.	Administration A	2 Product(s)
		~	v		6484	208734	02/05/2023 08:00	Oxaliplatin 5 mg/mL Accord Concentrate for solution for infusion

		·······		· · · ·
08:00	120min	Oxaliplatin 5 mg/mL Accord Concentrate for solution for	130mg + 96.93% (82.39mg/m ² BSA Dubois)	SET UP COMPLETE (P)

	Û	
Barcode verification	Undo setup	Edit parts list

Medications that are pharmacist verified in the orders screen will disappear if they are cancelled.

1.5 Cancelling a cycle

There may be situations where a cycle must be omitted rather than postponed in NCIS. It is not possible to cancel a cycle in NCIS, it is possible however to select all the medications within a cycle and cancel them all at once.

To cancel all the medications within a cycle right click on the cycle banner and click 'select all medications and appointments'.

Cancelling a therapy plan will apply the 'cancelled' flag to all medications in that therapy plan with the exception of those that have already been prepared, dispensed or administered, these medications would have to be cancelled on an individual basis. Record a reason for the cancellation of the therapy plan before confirming the cancellation.
