

# FADA\* Survey

## Life after COVID-19, how are you now?

HSE Public Health is launching the **\*Follow-up After Disease Acquisition (FADA) survey**

### Recovery from COVID-19

- ❖ If you get a text invitation to take part in our online survey, please click the link and take part!
- ❖ This is your chance to make your voice heard to help shape the health services in Ireland as we recover from COVID-19.
- ❖ If your patients or service users receive an invitation, please reassure them that the FADA survey is a genuine and important survey and we would encourage them to participate.
- ❖ The survey will not ask for personal details like your name, address, date of birth, contact details or PPS number.

### This is your chance to help shape our health service

- ❖ The results of the FADA survey will be used to help make decisions on Long COVID care that reflect the needs of those with the illness.
- ❖ We look forward to sharing our results with all our colleagues - participants will not be identified.

How are you now?

How have you recovered from COVID-19?

Are there risk factors that make Long COVID more likely?

What health services do people living with Long COVID need?

Scan for details about FADA

### What is the FADA survey?

- ❖ In mid-March 2023 we launched the online FADA survey. This survey will help us to understand more about how people are recovering from COVID-19.
  - ❖ We will be inviting some people who have tested positive for COVID-19 during the pandemic, and who are living in Public Health Area B, to complete our FADA survey.
  - ❖ Public Health Area B is made up of counties Longford, Westmeath, Laois, Offaly, Kildare, West Wicklow and South Dublin.
  - ❖ We will be contacting people under the:
    - [Health Research Regulations 2018 and amendments](#), and
    - [Infectious Disease Regulations 1981](#)
- This ensures compliance with GDPR (General Data Protection Regulation).

### Feeling good? We still need to hear from you!

- ❖ **Even if you are fully better after COVID-19 we still want to hear from you.**
- ❖ We want to know how many people who get COVID-19 make a full recovery, and if there are any reasons why some people take longer to recover.
- ❖ Visit [www.hse.ie/fadasurvey](http://www.hse.ie/fadasurvey) for more information.
