There is an illness called COVID-19 that can make me sick. Sometimes it’s called coronavirus.

It can make me miss school and seeing my friends.

Lots of children like me are having their COVID-19 vaccine. Lots of grown-ups have theirs already.

My COVID-19 vaccine can help to protect me from getting really sick.

Vaccines may help to stop COVID-19 spreading - keeping more of us safe.

I go to a vaccination centre to get my COVID-19 vaccine.

A grown-up will bring me to the centre and stay with me the whole time.

I can bring my favourite book, teddy or toy with me. I can also bring my ear defenders or headphones.

When it’s my turn, the grown-up who brought me sits in a chair and I can sit on their lap, if I like.
