| 1  | <b>KPI Title</b>                         | MH10 - Rate of admissions to adult acute inpatient units per 100,000 population in mental health catchment per quarter.  |
| 2  | <b>KPI Description</b>                   | This metric is designed to measure the rate of admission per 100,000 population in mental health catchment to adult mental health acute inpatient units.   |
| 3  | <b>KPI Rationale</b>                     | Reduced admissions could be used as a proxy measure for provision of community alternatives.   |
| 3a | <b>Indicator Classification</b>          | National Scorecard Quadrant b) Access  |
| 4  | <b>National Target</b>                   | 2023 National 60.2 This target is reported cumulatively  |
| 4a | <b>Target Trajectory</b>                 | a) Performance targets constant over the full year   |
| 4b | <b>Volume Metrics</b>                    | n/a  |
| 5  | <b>KPI Calculation</b>                   | Total number of admissions to acute inpatient units divided by population aged 18 or over in mental health catchment * 100,000. Rates are currently collected and calculated by HRB using existing MH catchment area populations rather than LHO area populations. This is particularly relevant given that rates are calculated per 100,000 population. More info available from HRB. |

| 1  | <b>KPI Title</b>                         | MH13 - Inpatient readmission rates to adult acute units per 100,000 population in mental health catchment area per quarter   |
| 2  | <b>KPI Description</b>                   | Re-admissions are admissions of persons who were either previously admitted to the receiving hospital or unit or to any other psychiatric in-patient facility. The relevant number is calculated by subtracting the number of first admissions from total admissions and expressed as a rate per 100,000 head of population in mental health catchment area. |
| 3  | <b>KPI Rationale</b>                     | This metric is designed to measure readmission rates to acute units, per 100,000 population. Readmission rates can be an indicator of the effectiveness of interventions and/or an indicator of the prevalence of severe and enduring mental illness requiring episodic inpatient interventions.   |

| 1a | <b>KPI Short Title</b>                   | Number of admissions to adult acute inpatient units  |
| 2  | <b>KPI Description</b>                   | This metric is designed to measure the total number admitted to adult mental health acute inpatient units.   |
| 3  | <b>KPI Rationale</b>                     | This metric is used to support the preparation of indicators based on rates of admission. Reduced admissions could be used as a proxy measure for provision of community alternatives. Similarly, a trend of increasing admission rates could alert the Area Mental Health Management Team to a lack of capacity in community settings and/or increased demand for secondary care mental health services |

| 1a | <b>KPI Short Title</b>                   | Median length of stay   |
| 2  | <b>KPI Description</b>                   | Median length of stay is the middle number in the sequence of numbers created by listing all of the figures for length of stay during the period of less than one year. Where such a sequence has an even amount of numbers, the median is the average of the two middle numbers. |
| 3  | <b>KPI Rationale</b>                     | Measurement of length of stay can be used as a comparator of service provision in conjunction with other data having regard to evidence base for addressing certain diagnosis. It can also act as a proxy for effective community secondary care provision.                       |

| 2  | <b>KPI Description</b>                   | The General Adult Community Mental Health Teams coordinates a range of interventions for individuals in a variety of locations, including home care treatment, day hospital, outpatient facilities and in-patient units, and interacts and liaises with specialist catchment or regional services to coordinate the care of individuals who require special consideration. A Vision for Change recommends that there should be one General Adult Community Mental Health Team per 50,000 population |
| 3  | <b>KPI Rationale</b>                     | The General Adult Community Mental Health Team is the core mechanism for the delivery of secondary care mental health services to adults and the KPI is to monitor the provision of community mental health services  |

First or re-referrals to General Adult Services generally take place in an outpatient clinic or may occasionally be seen in the patient's home. The patients are for the most part home-based. Homes include :<br>- a private house ( owned or rented etc ) - a private or public residential setting e.g. a nursing home - transitory accommodation e.g. hostel for the homeless , refugee centre or B&B Referrals do not include:i. Referrals between members of the community mental health team.ii. Specialist clinics such as for adults with ADHD.iii. Referrals seen in hospital settings ( whether general , maternity , geriatric etc ) |

| 2  | <b>KPI Description</b>                   | Refers to General Adult Community Mental Health Team. Re-referred case: A re-referral is the referral of a patient to a health professional of a specific profession, when the patient has been previously referred to the same profession for the same condition at the same location. A re-referral always marks the start of a new episode. Wait time: The number of weeks from the point at which the referral is received by a member of the General Adult MH team to the day the assessment takes place (less any delay due to client postponement of assessment) excluding both of those days. Sub Definitions: Wait Time is day referral received in the office when it is date stamped by admin staff. (Triage in each service should be efficient and mechanisms put in place it occurs as close as possible to day received ). A DNA if an appointment is offered and the patient fails to attend or make contact in sufficient time as to allow the service to reschedule or re-offer appointment this would then be constituted as a DNA |
| 3  | <b>KPI Rationale</b>                     | Wait times to General Adult MH team for mental health assessment provide a measure of service access in the community and the timeliness of that access.  |

Re-referred case: A re-referral is the referral of a patient to a health professional of a specific profession, when the patient has been previously referred to the same profession for the same condition at the same location. A re-referral always marks the start of a new episode. Wait time: The number of Weeks from the point at which the referral is received by a member of the General Adult MH team to the day the assessment takes place (less any delay due to client postponement of assessment) excluding both of those days. Sub Definitions: Wait Time is day referral received in the office when it is date stamped by admin staff. (Triage in each service should be efficient and mechanisms put in place it occurs as close as possible to day received )A DNA if an appointment is offered and the patient fails to attend or make contact in sufficient time as to allow the service to reschedule or re-offer appointment this would then be constituted as a DNA |

| 2  | <b>KPI Description</b>                   | <p>The metric is designed to capture the number of appointments (both new &amp; existing), by Attended, DNA or Cancelled, by the location in which the appointment is offered in the reporting month. (Definition below).</p> <p>An Attended appointment is the event a service user is offered and attends the location of appointment, regardless of how many clinicians are there present during the appointment.</p> <p>DNA – a planned appointment not attended by the service user, this does not include appointments cancelled by the clinician.</p> <p>Cancelled- a planned appointment cancelled by the service user within sufficient time as to allow appointment to be offered to another service user.</p> <p>Group Therapies - can be recorded but should only be recorded once and not as clinical contacts i.e. 15 service users attending group therapy and delivered by 3 clinicians should be recorded as 15 attended appointments and not as 45 appointments.</p> <p><u>Location of Appointment:</u></p> <p>Clinic - an establishment or hospital department where Mental Health outpatients routinely occur</p> <p>Home - Service users normal place of residence</p> <p>Hospital - CAMHS only where no service offered or available by a liaison team</p> <p>School - CAMHS only Service user normal place of learning</p> <p>Online Video or Telephone consultation- Appointment which has been scheduled and is conducted via telephone or online video platform</p> <p>Other - not in categories above</p> |                       |           |

| 1a | <b>KPI Short Title</b>                   | General Adult % DNA in current month.   |
| 2  | <b>KPI Description</b>                   | Percentage of new (including re-referred) cases offered first appointment and that did not attend (DNA) appointment when referred to General Adult Mental Health Team during the reporting period, by (i) over 16y and less than 18 years old (ii) over 18th birthday. A DNA: if an appointment is offered and the patient fails to attend or make contact in sufficient time as to allow the service to reschedule or re-offer appointment this would then be constituted as a DNA |
| 3  | <b>KPI Rationale</b>                     | The focus is to reduce the DNA rates for new and re-referrals to Community Mental Health Teams in CAMHS, General Adult and Psychiatry of Old Age. The aim to introduce a standard response to DNAs in each service and identify areas that have a significant DNA problem.  |

| 1a | <b>KPI Short Title</b>                   | No. of PLL MH referrals received  |
| 2  | <b>KPI Description</b>                   | This metric is designed to measure the number of referrals received by the Psychiatry of Later Life Service team during the reporting period for patients over their 65th birthday. First or re/referrals to the Psychiatry of Old Age Service consist mostly of those whom will be seen on domiciliary assessment but some may be seen in OPD settings. The patients are for the most part home-based. Homes include :<br>- a private house ( owned or rented etc ) - a private or public residential setting e.g. a nursing home - transitory accommodation e.g. hostel for the homeless , refugee centre or B&B Referrals do not include:i. Referrals between different members of the team.ii. Referrals to specialist clinics such as memory clinics.iii. Referrals seen in hospital settings. ( whether general , maternity , geriatric etc ) |
| 3  | <b>KPI Rationale</b>                     | The purpose of this metric is to gain information over time on the numbers of referrals accepted to support the monitoring and evaluating of trends over time per area/ region and across the service nationally.   |

| 2  | <b>KPI Description</b>                   | This metric is designed to measure the number of cases closed/discharged to other service or Primary Care or through case of death by the Psychiatry of Later Life Team during the reporting period for patients over their 65th birthday.(include in cases closed/discharged those cases that were seen and discharged from service in initial assessment) |
| 3  | <b>KPI Rationale</b>                     | The purpose of this metric is to gain information over time on the numbers of cases closed/discharged and monitoring and evaluating the trends over time per area/ region and across the service nationally.  |

| 2  | <b>KPI Description</b>                   | <p>The metric is designed to capture the number of appointments (both new &amp; existing), by Attended, DNA or Cancelled, by the location in which the appointment is offered in the reporting month. (Definition below).<br/> An Attended appointment is the event a service user is offered and attends the location of appointment, regardless of how many clinicians are there present during the appointment.<br/> DNA – a planned appointment not attended by the service user, this does not include appointments cancelled by the clinician.<br/> Cancelled- a planned appointment cancelled by the service user within sufficient time as to allow appointment to be offered to another service user.<br/> Group Therapies - can be recorded but should only be recorded once and not as clinical contacts i.e. 15 service users attending group therapy and delivered by 3 clinicians should be recorded as 15 attended appointments and not as 45 appointments.</p> <p><u>Location of Appointment:</u><br/> Clinic - an establishment or hospital department where Mental Health outpatients routinely occur<br/> Home - Service users normal place of residence<br/> Hospital - CAMHS only where no service offered or available by a liaison team<br/> School - CAMHS only Service user normal place of learning<br/> Online Video or Telephone consultation- Appointment which has been scheduled and is conducted via telephone or online video platform<br/> Other - not in categories above</p> |                       |           |
| 3  | <b>KPI Rationale</b>                     | The purpose of this metric is to gain information over time on the numbers of appointments offered by the POLL team in that particular reporting period and monitoring and evaluating the trends over time per HSE region and across the service nationally.   |                       |           |

| 1a | <b>KPI Short Title</b>                   | PLL % of DNA in Current Month   |
| 2  | <b>KPI Description</b>                   | Number of new (including re-referred) cases offered first appointment and that did not attend (DNA) appointment in the Psychiatry of Later Life Mental Health Team during the reporting period for patients over their 65th birthday. A DNA: if an appointment is offered and the patient fails to attend or make contact in sufficient time as to allow the service to reschedule or re-offer appointment this would then be constituted as a DNA. A domiciliary DNA is defined as a confirmed appointment for the domiciliary but the person not being present in the house when the clinician arrives to carry out the assessment. |
| 3  | <b>KPI Rationale</b>                     | The focus is to reduce the DNA rates for new and re-referrals to Community Mental Health Teams in CAMHS, General Adult and Psychiatry of Later Life. The aim to introduce a standard response to DNAs in each service and identify areas that have a significant DNA problem.   |

| 8  | <b>Tracer Conditions</b>                 | Inpatient psychiatric treatment is usually indicated for children and adolescents with severe psychiatric disorders such as schizophrenia, depression, and mania. Other presentations include severe complex medical-psychiatric disorders such as anorexia / bulimia. Admission may also be required for clarification of diagnosis and appropriate treatment or for the commencement and monitoring of medication. The increasing incidence of the more severe mental health disorders in later adolescence increases the need for inpatient admission. |

| 2  | <b>KPI Description</b>                   | Wait time: The number of weeks from the point at which the referral is received by a member of the CAMHS Community Mental Health Team to the day the assessment takes place (less any delay due to client postponement of assessment) and excluding both of those days.   |
| 3  | <b>KPI Rationale</b>                     | Wait times to access CAMHS Community Mental Health Teams for a mental health assessment provides a measure of service availability in the community and the timeliness of that access. Monitoring the number of new (including re-referred) cases seen overall from referral and evaluating the trends over time per HSE region and across the service nationally as it relates to target. Monitor trends in relation to referrals. |
