PART A: OUTLINE OF GUIDELINE STEPS

1.0 INITIATION OF QUALITY CARE-METRICS AT SERVICE LEVEL

1.1 GLOSSARY OF TERMS AND DEFINITIONS

Clinical Governance:
“The system through which healthcare teams are accountable for the quality, safety and satisfaction of patients in the care they have delivered. For healthcare staff, this means specifying the clinical standards you are going to deliver and showing everyone the measurements you have made to demonstrate that you have done what you set out to do” (HSE 2014).

Documented:
The process of writing or electronically generating information that describes the care or service provided to the service user. Through documentation, nurses communicate to other health care professionals their observations, decisions, actions and outcomes of care (HSE 2018a).

Evidence Based Practice:
Evidence based practice is the integration of best research evidence with clinical expertise and patient values in order to improve healthcare outcomes (Steevens 2013).

Inter-rater Reliability:
Measurement of the extent to which data collectors (raters) assign the same score to the same variable (indicator) is called inter-rater reliability (McHugh 2012). (Two data collectors collect the same sample data independently and then compare scores).

Nursing Metrics:
Nursing metrics are agreed standards of measurement for nursing and midwifery care, where care can be monitored against agreed standards and benchmarks (Foulkes 2011).

Policy:
A policy is a written statement that clearly indicates the position and values of the organisation on a given subject (HSE 2016).
Procedure:
A procedure is a written set of instructions that describe the approved and recommended steps for a particular act or sequence of events (HSE 2016).

Nursing and Midwifery Quality-Care Metrics:
Nursing and Midwifery Quality-Care Metrics assist healthcare organisations to assess the extent to which nursing and midwifery interventions have an impact on patient safety, quality and professional work environments. Nursing and Midwifery Quality-Care Metrics provide a measurement of the quality of nursing and midwifery clinical care processes (HSE 2018).

Quality Care Process Metric:
Is a quantifiable measure that captures quality in terms of how (or to what extent) nursing care is being done in relation to an agreed standard (HSE 2018).

Quality Care Process Indicator:
Is a quantifiable measure that captures what nurses and midwives are doing to provide that care in relation to a specific tool or method (HSE 2018).

Quality Care-Metric Data Collectors:
Quality Care-Metric data collectors are individuals within the organisation who are responsible for collecting data and data entry on a monthly basis to Test Your Care HSE (TYC HSE) (HSE 2018).
1.2 Abbreviations

AAPT  Acttion-American Pain Society pain Taxonomy
ABA  An Bord Altranais
ADoN/ADoM  Assistant Director of Nursing/Assistant Director of Midwifery

RPHN  Registered Public Health Nurse
TYC  Test Your Care
TYC HSE  Test Your Care Health Service Executive
WHO  World Health Organisation
1.3 INTRODUCTION

1.3.1 Patient safety is one of the most critical issues facing healthcare today. The delivery of care that is safe, patient-centred, compassionate, effective and efficient is the responsibility of all health care professionals. As nurses and midwives are at the centre of the care delivery continuum delivering clinical care around the clock, their contribution to influence high quality, safe care is immense. Research suggests that errors and patient harm are caused by system and process failures (Institute of Medicine 1999).

1.3.2 Nurses and midwives are a well-educated, highly skilled and experienced and a valuable resource to the health service, their contribution makes a significant impact to optimise patient care delivery and outcomes. Quality Care-Metrics provide nurses and midwives with a framework and a measurement tool to engage in continuous quality improvement at the point of care delivery in order to positively influence the care experience for patients, clients and families.

1.3.3 This National Guideline outlines the essential criteria that need to be in place by the health service provider in order to participate in Quality Care-Metrics and to ensure fidelity of data quality. The ONMSD is responsible for leading the national implementation of nursing and midwifery Quality Care-Metrics in Ireland. A suite of documents to support this initiative is available at the following link: www.hse.ie/eng/about/who/onmsd/safecare/qcm

1.3.4 Clinical care processes delivered by nurses and midwives are based on scientific evidence, standards and/or professional consensus. Measuring the degree to which nurses and midwives adhere to care processes plays an important role in assuring, sustaining and improving the safety and quality of care delivered to patient and clients.

1.3.5 Nursing and Midwifery Quality Care-Metrics present ways of measuring the quality of nursing and midwifery care utilising care process quality indicators, which provide a framework for how the fundamentals of nursing care can be measured (Foulkes 2011).

1.3.6 Measurements of clinical care and outcomes have, in the past, proved to be complex and were not always nurse or midwife specific. Many healthcare providers and organisations lack basic information on the quality of nursing and midwifery care. Anecdotal evidence was often used as an indicator of concerns in relation to care delivery. Feedback in a systematic way to the individual nurse/midwife or organisation was not always available.

1.3.7 Nursing and Midwifery Quality Care-Metrics aim to illuminate the contribution of nursing and midwifery to safe and effective care and provide the evidence and assurance to managers, governance structures and regulators that care quality is a priority for the professions of nursing and midwifery.

1.3.8 Nursing and Midwifery Quality Care-Metrics are fundamentally a continuous quality improvement journey highlighting areas of practice that require improvement and measuring for tangible evidence that improvement efforts are impacting in the delivery of care.
1.4 BACKGROUND

1.4.1 The concept arose from work undertaken in the United Kingdom by the Heart of England NHS Foundation Trust (HEFT). The Chief Nurse at HEFT developed a web based tool entitled Test Your Care (TYC) to monitor patient safety and promote care quality following an increase in complaints, falls, pressure ulcers and medication management errors.

1.4.2 In 2011, through Nursing & Midwifery Planning & Development Units (NMPDU), Nursing and Midwifery Quality Care-Metrics were developed and implemented in over 100 clinical areas across the North West, North East & Dublin North and endorsed by the Office of the Nursing & Midwifery Services Director (ONMSD) Health Service Executive (HSE).

1.4.3 In the Republic of Ireland, a small number of acute hospitals had also commenced measuring nursing and midwifery care processes. These sites either employed external agencies to develop a system to meet their single site requirements or used the Microsoft excel application.

1.4.4 In 2014, the ONMSD entered into a service level agreement with HEFT to provide access to the TYC System nationally to HSE organisations across the Republic of Ireland. The online web based measurement system TYC HSE is now widely available to all Directors of Nursing/Midwifery who wish to embed Nursing and Midwifery Quality Care-Metrics within their local quality governance frameworks.

1.5 WHAT ARE QUALITY CARE-METRICS?

1.5.1 Nursing and Midwifery Quality Care-Metrics are a measure of the quality of nursing and midwifery clinical care processes aligned to evidenced based standards and agreed through national consensus in healthcare settings in Ireland. The process of national consensus is achieved through workstream working groups (HSE 2018).

1.5.2 The Donabedian (1966) conceptual framework (Figure 1) is one of the most commonly used measurement framework to estimate care quality and broadly falls into the categories of structure, process and outcome. Healthcare quality as defined by Donabedian, has been universally accepted and is widely used in the empirical literature in the development of quality standards (Haj et al 2013).
1.5.3 **Structural** indicators describe all the factors that affect the context in which care is delivered to include the physical facility, equipment, human resources as well as organisational characteristics such as staff training and qualifications.

1.5.4 **Process** indicators relate to the transactions between patients and care providers. It examines how care is provided in terms of its appropriateness, acceptability, completeness and competency. It includes dimensions such as communication, patient knowledge and the quality of the care intervention, the technical delivery of care and the interpersonal aspect of the clinician – patient relationship. Nursing and Midwifery Quality Care-Metrics examine indicators which measure the process components of care.

1.5.5 **Outcome** indicators refer to the end points of care such as improvement in function, recovery or survival and seek to capture whether the goals of care were achieved. They include measures such as immunisation rate, failure to rescue rate, falls incidence, hospital acquired pressure ulcers.
1.5.6 Nursing and Midwifery Quality Care-Metrics currently consist of a core suite of quality indicators across seven care groups; Public Health Nursing services, Acute, Older Persons, Mental Health, Intellectual Disability, Midwifery and Children’s services (Figure 2). Figure 3 demonstrates the updated metrics which are available for measurement and monitoring across the regions utilising the Quality Care-Metrics TYC HSE system.

1.6 RATIONALE FOR MEASURING NURSING AND MIDWIFERY CARE

1.6.1 The quality of healthcare is a national and international concern. Increasing reports of patient harm and poor quality care has created the requirement for healthcare professionals to question what is known about the quality of care being delivered in the clinical environment. In most organisations there is a wealth of data but no systematic means to collate, analyse and interpret data that will track the quality of care delivery.

1.6.2 For Nursing and Midwifery Quality Care-Metrics provide a standardised system to measure the fundamentals of care where care can be monitored and improved against evidenced based standards, and professional consensus. In a climate of greater fiscal controls on health budgets, focused attention is needed to maintain high-quality care delivery. There is an increased onus on healthcare providers to provide tangible evidence that they are assessing, monitoring and measuring the quality of care delivery.

1.6.3 Nursing and Midwifery Quality Care-Metrics provide a framework to identify gaps in care delivery, enabling action planning for quality improvement and provide the mechanism by which care providers can be accountable for the quality of their care delivery.

1.7 CLINICAL GOVERNANCE

1.7.1 HSE (2014) defines clinical governance as: “The system through which healthcare teams are accountable for the quality, safety and satisfaction of patients in the care they have delivered. For healthcare staff, this means specifying the clinical standards you are going to deliver and showing everyone the measurements you have made to demonstrate that you have done what you set out to do”.

1.7.2 Nursing and Midwifery Quality Care-Metrics supports Directors of Nursing/Midwifery to provide an accountability system that enables assessing, monitoring, reporting and feedback to teams about performance and identifies areas for improvement (HSE 2014; Donaldson et al 2005); using “real time” information regarding the quality of care patients/ clients are receiving.
1.8 Benefits

1.8.1 Nursing and Midwifery Quality Care-Metrics provide a measuring system for individual nurses and midwives and their managers that:

• Monitors and assesses performance against evidenced based standards
• Quantifies trends and characteristics
• Highlights exceptional care and areas of risk which require immediate attention
• Provides a standardised system to track and benchmark the quality of care
• Offers direction on educational needs for healthcare staff
• Promotes staff engagement and accountability for the quality of care

1.8.2 In addition to providing real time information to nurses and midwives about how patients are benefiting from quality care delivery, metric data enables managers to monitor individual ward performance and organisational progress in delivering safer, quality focused patient care.

1.9 Purpose

1.9.1 The purpose of this guideline is to ensure a consistent approach to the implementation of Nursing and Midwifery Quality Care-Metrics by the Public Health Nursing services.

1.9.2 This guideline provides a standardised approach which will guide Nursing and Midwifery Quality Care-Metrics data collectors to interpret individual metric questions consistently thereby providing reliability and validity in the data collection process across all Public Health Nursing services nationally. The quality of data is very important as it may be used to inform the delivery of care. In this regard, it is vital that services know how reliable their data actually is.

1.10 Scope

1.10.1 This guideline applies to all registered PHN's/registered nurses and midwives within Public Health Nursing services, who are engaged with Nursing and Midwifery Quality Care-Metrics in nursing and midwifery practice.

1.10.2 This guideline does not apply to other disciplines outside of nursing and midwifery.
1.10.3 Application of the guideline in individual HSE and HSE funded facilities is subject to local agreement, the development and application of a local supporting PPPG and the establishment of local governance structures.

1.10.4 The application of this guideline is aligned to the Nursing and Quality Care-Metrics Public Health Nursing Research Report (HSE 2018).

1.10.5 All nurses and midwives within Public Health Nursing services, who are engaged with Nursing and Midwifery Quality Care-Metrics in nursing and midwifery practice, should complete Appendix 1, Signature Sheet to indicate that they have read, understood and agree to the guideline. The completed signature sheet should be retained at service level.

1.11 Objective

1.11.1 The objective of this guideline is to enable nurses and midwives to engage with and implement Quality Care-Metrics using a consistent and standardised approach.

1.12 Outcomes

1.12.1 The guideline provides a framework for nurses and midwives to engage in care measurements for continuous quality improvement.

1.12.2 Application of this guideline will enable consistency in the reliability and validity of the data collection to support a standardised approach in Public Health Nursing services nationally.

1.12.3 Measurement of the quality of care delivered provides an assurance mechanism that captures the contribution and performance of nurses and midwives in a way that is transparent and focuses on improvement.
2.0 METRICS, INDICATORS & ADVICE FOR PUBLIC HEALTH NURSING SERVICES

The following Nursing and Midwifery Quality Care-Metrics are available for Public Health Nursing services as outlined in Figure 4.

**Figure 4: Public Health Nursing Services Quality Care-Metrics**
<table>
<thead>
<tr>
<th>Indicator</th>
<th>Data Collectors Advice</th>
<th>Not Applicable</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Pressure Ulcer Prevention and Management Quality Care-Metric</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1</td>
<td>A pressure ulcer risk assessment was recorded using a validated tool</td>
<td>Mark Yes if pressure ulcers risk assessment was completed using a validated tool. Mark No if a pressure ulcer risk assessment was not completed, or if not dated, timed or signed by the assessing nurse. Recommended validated tool as per National Guideline for Wound Management 2018. Mark N/A if not applicable.</td>
</tr>
<tr>
<td>2</td>
<td>There is evidence that the client’s pressure ulcer risk was re-assessed and documented using a validated tool</td>
<td>Mark Yes if re-assessment has taken place within a 3 month period or more frequently if change in condition. Mark No if re-assessment has not taken place using a validated tool or is outside the three month period. Mark N/A if individual is not due to have re-assessment of pressure ulcer risk within the time frame. <strong>Note:</strong> Please see 6.7 (6) regarding NMBI Guidelines on the inclusion of date/time (using a 24-hour clock) and signature on all nursing documentation and assessments.</td>
</tr>
<tr>
<td>3</td>
<td>If a pressure ulcer is present, the grade has been recorded on the relevant documentation</td>
<td>Mark Yes if clearly graded using the Pressure Ulcer Advisory Panel Classification system/Pressure Ulcer Prevention Point Chart. Mark No if pressure ulcer is not clearly graded. Mark N/A if no pressure ulcer is present.</td>
</tr>
<tr>
<td>4</td>
<td>There is evidence that evaluations of the pressure ulcer has been recorded with the client’s response to interventions documented</td>
<td>Mark Yes if the care plan has been re-evaluated within the agreed timeframe and there is documented evidence of the client’s response to interventions i.e. what the client articulates. Mark No if there is no documented evidence of re-evaluation of pressure ulcer in the care plan or if there is no documented evidence of client’s response to interventions in the care plan. Mark N/A if no pressure ulcer is present or if the date for evaluation is not yet due.</td>
</tr>
<tr>
<td>5</td>
<td>There is documented evidence of the use of pressure distributing devices and/or alternative pressure therapies based on skin assessment</td>
<td>Mark Yes if there is documented evidence of the use of pressure distributing devices and/or alternative pressure therapies based on skin assessment. Mark No if there is no documented evidence of pressure distributing devices and/or alternative pressure therapies being used based on skin assessment. Mark N/A if there is no documented evidence of pressure distributing devices and/or alternative pressure therapies being used based on skin assessment required.</td>

1. **There is documented evidence that an immediate plan of care has been developed if a client has been identified as a vulnerable adult or where there are safeguarding concerns**

   - **Mark Yes** if there is documented evidence that an immediate plan of care has been developed if a client has been identified as a vulnerable adult or where there are safeguarding concerns.
   - **Mark No** if there is no documented evidence that an immediate plan of care has been developed if a client has been identified as a vulnerable adult or where there are safeguarding concerns.
   - **N/A** if the client is not identified as a vulnerable adult or where there are no safeguarding concerns.

   **Note:** Please see 6.7 (6) regarding NMBI Guidelines on the inclusion of date/time (using a 24-hour clock) and signature on all nursing documentation and assessments.

2. **There is documented evidence that the required interventions are recorded**

   - **Mark Yes** if there is documented evidence that the required interventions are recorded.
   - **Mark No** if there is no documented evidence that the required interventions were recorded or if the documentation is not dated/timed or signed.
   - **Mark N/A** if intervention/s is not required.

3. **If a client has been identified as at risk of abuse or has suffered abuse/harm, there is documented evidence that a referral has been sent to the appropriate services according to local and national Policy**

   - **Mark Yes** if there is documented evidence that a client who has been identified as at risk of abuse or has suffered abuse/harm, that a referral has been sent to the appropriate services according to local and national Policy.
   - **Mark No** if there is no documented evidence that a client who has been identified as at risk of abuse or has suffered abuse/harm, that a referral has not been sent to the appropriate services according to local and national Policy or if the documentation has not dated/timed or signed.
   - **Mark N/A** if referral is not required.
3.0 IMPLEMENTATION FRAMEWORK

3.1 PURPOSE

The purpose of this implementation framework is to provide support and guidance to nursing and midwifery organisations within the HSE, who wish to implement the Nursing and Midwifery Quality Care-Metrics initiative. A standardised approach to implementation of Nursing and Midwifery Quality Care-Metrics across HSE and voluntary organisations will ensure consistency in the measurement of the standard of care across all services.

3.2 FOUNDATIONS OF THE FRAMEWORK

This framework was developed to support the implementation of Nursing and Midwifery Quality Care-Metrics to ensure a systematic, cohesive and sustainable approach. The framework is based on a clear vision statement, a set of core principles and a step-by-step guide (see Figure 5: Framework for Implementation).

Figure 5: Framework for Implementation of Quality Care-Metrics

3.2.1 Vision Statement: The vision statement outlines the purpose and ambition in the introduction of Nursing and Midwifery Quality Care-Metrics to HSE and Voluntary healthcare organisations in Ireland.
3.2.2 Core Principles: The ten core principles in Figure 6 replicate the clinical governance principles developed by the HSE (2012) and provide the foundations for patient safety and quality improvement. A descriptor for each of the 10 Guiding Principles is provided (Figure 7), which outlines in more detail, information relating to the each of the principles and their relationship with clinical governance in order to improve patient outcomes.

![Diagram of Guiding Principles for Clinical Governance](image)

Figure 6: Guiding Principles for Clinical Governance (HSE 2012)
GUIDING PRINCIPLES DESCRIPTOR
(Source: HSE (2012a) Quality and Patient Safety, Clinical Governance Information Leaflet)

<table>
<thead>
<tr>
<th>GUIDING PRINCIPLES DESCRIPTOR</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>PATIENT FIRST</td>
<td>Based on a partnership of care between patients, families, carers and healthcare providers in achieving safe, easily accessible, timely and high quality service across the continuum of care.</td>
</tr>
<tr>
<td>SAFETY</td>
<td>Identification and control of risks to achieve effective, efficient and positive outcomes for patients and staff.</td>
</tr>
<tr>
<td>PERSONAL RESPONSIBILITY</td>
<td>Where individuals, whether members of healthcare teams, patients or members of the public, take responsibility for their own and others healthcare needs.</td>
</tr>
<tr>
<td>DEFINED AUTHORITY</td>
<td>The scope given to staff at each level of the organisation to carry out their responsibilities. The individual’s authority to act, the resources available and the boundaries of the role are confirmed by their direct line manager.</td>
</tr>
<tr>
<td>CLEAR ACCOUNTABILITY</td>
<td>A system whereby individuals, functions or committees agree accountability to a single individual.</td>
</tr>
<tr>
<td>LEADERSHIP</td>
<td>Motivating people towards a common goal and driving sustainable change to ensure safe high quality delivery of clinical and social care.</td>
</tr>
<tr>
<td>INTER-DISCIPLINARY WORKING</td>
<td>Work processes that respect and support the unique contribution of each individual member of a team in the provision of clinical and social care. Interdisciplinary working focuses on the interdependence between individuals and groups in delivering services. This requires proactive collaboration between all members.</td>
</tr>
<tr>
<td>SUPPORTING PERFORMANCE</td>
<td>In a continuous process, managing performance in a supportive way, taking account of clinical professionalism and autonomy in the organisational setting. Supporting a director/manager in managing the service thereby contributing to the capability and the capacity of the individual and organisation. Measurement of the patients and staff experience being central in performance measurement (as set out in the National Charter 2010).</td>
</tr>
<tr>
<td>OPEN CULTURE</td>
<td>A culture of trust, openness, respect and caring where achievements are recognised. Open discussion of adverse events are embedded in everyday practice and communicated openly to patients. Staff willingly report adverse events and errors, so there can be a focus on learning, research, improvement, and appropriate action taken where there have been failings in the delivery of care.</td>
</tr>
<tr>
<td>CONTINUOUS QUALITY IMPROVEMENT</td>
<td>A learning environment and a system that seeks to improve the provision of services with an emphasis on maintaining quality in the future and not just controlling processes. Once specific expectations and the means to measure them have been established, implementation aims at preventing future failures and involves setting goals, education and the measurement of results so that improvement is on-going.</td>
</tr>
</tbody>
</table>

Figure 7: Guiding Principles Descriptor

3.2.3 Implementation Phases
The introduction of Nursing & Midwifery Quality Care-Metrics is based on the four stages of the project management lifecycle which are:

- **Initiation**
- **Planning**
- **Implementation**
- **Mainstreaming**

The steps to support implementation are outlined in Figure 8.
### Figure 8: 15 Steps to Support Implementation of Quality Care-Metrics

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Initiation</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>STEP 01</strong></td>
<td>NMPDU invite expressions of interest from services</td>
<td>Services contact their regional NMPD</td>
</tr>
<tr>
<td><strong>STEP 02</strong></td>
<td>NMPDU provide information sessions</td>
<td>Services are invited to send key managers and staff</td>
</tr>
<tr>
<td><strong>STEP 03</strong></td>
<td>Services prepare, complete and submit State of Readiness Checklist to NMPDU</td>
<td>Services need to have systems and processes in place to implement Quality Care-Metrics</td>
</tr>
<tr>
<td><strong>STEP 04</strong></td>
<td>Director of Nursing/Midwifery enables an appropriate Governance structure to oversee the implementation and maintenance of the Quality Care-Metrics Initiative</td>
<td>This involves identification of: service lead and data collectors, agreement on set of monthly metrics and establishment of membership of governance group with terms of reference</td>
</tr>
<tr>
<td><strong>Planning</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>STEP 05</strong></td>
<td>Director of Nursing/Midwifery informs NMPDU of Service Lead</td>
<td>Local implementation plan is developed</td>
</tr>
<tr>
<td><strong>STEP 06</strong></td>
<td>Director of Nursing/Midwifery agrees the number of sites, data sharing and order of priority</td>
<td>Service lead informs NMPDU Quality Care-Metrics Project Officer of site names &amp; prefix for TYC HSE</td>
</tr>
<tr>
<td><strong>STEP 07</strong></td>
<td>Sites go live on TYC HSE</td>
<td>NMPDU Quality Care-Metrics Project Officer arranges site set up on TYC HSE</td>
</tr>
<tr>
<td><strong>STEP 08</strong></td>
<td>Director of Nursing/Midwifery agrees and identifies data collectors to undertake Quality Care-Metrics monthly</td>
<td>Service Lead requests usernames and passwords from NMPDU Quality Care-Metrics Project Officer for all authorised staff to access TYC HSE</td>
</tr>
<tr>
<td><strong>STEP 09</strong></td>
<td>Data collectors, managers and staff undertake Quality Care-Metrics education session</td>
<td>NMPDU Quality Care-Metrics Project Officer provides initial education session to relevant staff followed by Train the Trainer approach thereafter</td>
</tr>
<tr>
<td><strong>Implementation</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>STEP 10</strong></td>
<td>Data collectors undertake collection of Quality Care-Metrics in agreed sites monthly as per implementation plan</td>
<td>Immediate Risk/Safety Forms and brief feedback are provided to ADPHN/RPHN/RPHN Practice Development co-ordinator onsite. Data is entered onto TYC HSE</td>
</tr>
<tr>
<td><strong>STEP 11</strong></td>
<td>ADPHN/RPHN/RPHN Practice Development Co-Ordinator or designate views results and prints same for team</td>
<td>ADPHN/RPHN/RPHN Practice Development Co-Ordinator enables team discussion on achieving quality standards</td>
</tr>
<tr>
<td><strong>STEP 12</strong></td>
<td>ADPHN/RPHN/RPHN Practice Development Co-Ordinator or designate draws up action plans for any amber or red indicators</td>
<td>Service Lead and ADPHN/RPHN/RPHN Practice Development Co-Ordinator liaise re action plans each month</td>
</tr>
<tr>
<td><strong>STEP 13</strong></td>
<td>Results, action plans and interventions presented at relevant governance and management meetings</td>
<td>Service lead provides reports and findings at appropriate governance meetings</td>
</tr>
<tr>
<td><strong>Mainstreaming</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>STEP 14</strong></td>
<td>Communicate and disseminate results and findings</td>
<td>Choose dissemination routes</td>
</tr>
<tr>
<td><strong>STEP 15</strong></td>
<td>Monitor, review and evaluate local implementation plan at set intervals</td>
<td>Update local implementation plan, introduce further sites. Provide training for new members of staff</td>
</tr>
</tbody>
</table>
3.3 Governance

3.3.1 The ONMSD provides the overarching national governance that enables the development of a robust system and infrastructure for the introduction of Nursing and Midwifery Quality Care-Metrics in clinical organisations.

3.3.2 The initiative is managed and co-ordinated by a national lead and is supported by project officers from each NMPDU.

3.3.3 In addition, the ONMSD provides the leadership to enable the development of a suite of Nursing and Midwifery Quality Care-Metrics that are sensitive to nursing and midwifery care processes. The development of new nurse/midwife-sensitive Nursing and Midwifery Quality-Care Metrics were organised through seven work-streams (see Figure 9).

---

Figure 9: Nursing and Midwifery Quality Care-Metrics Governance Flow Chart
3.3.4 The ONMSD is not responsible for the data and evidence generated from the data collection system on http://www.testyourcarehse.com. Directors of Nursing & Midwifery are the accountable officers for all data generated on the TYC HSE system.

3.3.5 NMPDU Directors play a key role in supporting and advising on the implementation and management of Nursing and Midwifery Quality Care-Metrics in clinical organisations.

3.3.6 Each NMPDU Director has identified a project officer to support nominated service leads, to establish and embed Nursing and Midwifery Quality Care-Metrics in practice.

3.3.7 Governance for the implementation of Nursing and Midwifery Quality Care-Metrics in clinical organisations is the responsibility of Directors of Nursing & Midwifery.

3.3.8 Directors of Nursing & Midwifery are accountable for the quality of nursing and midwifery care delivery and to ensure appropriate governance and leadership structures are in place to assess, monitor and review care standards to include:

- Development of a plan for the monitoring, audit and evaluation of Nursing and Midwifery Quality Care-Metrics including timelines and identification of the lead person(s) responsible for these processes.
- Identification of the specific outcomes which the implementation of Nursing and Midwifery Quality Care-Metrics aims to achieve and processes to measure these outcomes
- Development of a communication plan for the dissemination of the Nursing and Midwifery Quality Care-Metrics results/findings to the relevant stakeholders (as appropriate) at ward/unit or management level
- Implementation of processes to support continuous improvement in the development, implementation, monitoring, auditing and evaluation of Nursing and Midwifery Quality Care-Metrics data measurement in Public Health Nursing services such as PPPG Development Groups, project sponsors or appropriate governance group, quality and safety groups/committees etc.
3.4 State of Readiness and Capacity Checklist

3.4.1 If a nursing or midwifery service has interest in implementing Nursing and Midwifery Quality-Care Metrics, this service can self-assess their organisation in relation to key factors on how ready they are to begin the implementation process using the State of Readiness and Capacity Checklist as outlined in Figure 10.

<table>
<thead>
<tr>
<th>Areas for Consideration</th>
<th>READING</th>
<th>CAPACITY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rate your organisation from the perspectives of capacity and readiness to implement the Quality Care-Metrics</td>
<td>High</td>
<td>Medium</td>
</tr>
<tr>
<td>The Management team are fully supportive of the implementation of Nursing and Midwifery Quality Care-Metrics</td>
<td></td>
<td></td>
</tr>
<tr>
<td>There is a level of shared understanding among nursing and midwifery staff with regards to Quality Care-Metrics.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A Quality Care-Metrics Implementation and Governance Plan is in place or in development e.g. phased roll-out, selection of specific metrics to be collected</td>
<td></td>
<td></td>
</tr>
<tr>
<td>There is a level of resources available to support the Quality Care-Metrics implementation. Consider:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• A Quality Care-Metrics Project Lead/Champion with allocated time &amp; responsibility</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Identified Quality Care-Metrics Data Collectors</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• ICT resources and support e.g. Laptops, printers, tablets etc</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Internet and Wi-fi availability: online or offline collection will both be possible</td>
<td></td>
<td></td>
</tr>
<tr>
<td>There is a defined reporting process to feedback and disseminate findings from the Quality Care-Metrics e.g. ward communication boards, monthly staff meetings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>There is an action plan review process and governance system to escalate and action on any risks or poor performance identified in Quality Care-Metrics measurement.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>There is a Whole Systems Approach on how findings can be disseminated and utilised in conjunction with key nursing and midwifery data to improve care delivery</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Figure 10: State of Readiness and Capacity Checklist

3.4.2 Providing this information assists the Nursing and Midwifery Quality-Care Metrics Project Officers in developing a regional and national plan for implementation. It also assists the service in identifying what is required in order to increase their organisation’s readiness to successfully implement the Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics.
4.0 IMPLEMENTATION AT SERVICE LEVEL

4.1 IMPLEMENTATION PLAN

4.1.1 The implementation framework as set out in Figure 5 should be used at local level to support the implementation of Nursing and Midwifery Quality Care-Metrics in order to support a systematic, cohesive and sustainable approach to the implementation process.

4.1.2 As part of the development of an implementation plan, due consideration should be given to the identification of required actions, facilitators and the determined timelines for implementation in addition to any possible barriers which may impede the implementation process.

4.1.3 To determine the readiness of the organisation to commence the implementation process, the State of Readiness and Capacity Checklist (Figure 10) must be completed and submitted to the Nursing and Midwifery Quality Care-Metrics Project Officer prior to commencement of the implementation process.

4.2 EDUCATION/TRAINING PLANS FOR IMPLEMENTATION

4.2.1 Education/training plans should be developed by the nominated service lead at service level to meet local requirements. This can be completed in collaboration with the relevant NMPDU, Nursing and Midwifery Quality Care-Metrics Project Officer who may provide information/education sessions to individual healthcare organisations with a view to the services undertaking a Train the Trainer approach for on-going education.

4.2.2 The Nursing and Midwifery Quality Care-Metrics hub on HSELanD is also available to support education/training plans as it is an online resource that provides relevant information and learning resources on Nursing and Midwifery Quality-Care Metrics for nurses and midwives.
4.3 Identification of Lead Person(s) Responsible for Implementation

4.3.1 As part of the governance structure at service level to support the implementation of Nursing and Midwifery Quality Care-Metrics, the Director of Nursing and Midwifery is required to nominate a Service Lead who will co-ordinate the implementation process through the development of local implementation plan.

4.4 Specific Roles and Responsibilities

4.4.1 Nursing & Midwifery Planning and Development Unit Director

- Advise and support the development and implementation of Nursing and Midwifery Quality Care-Metrics in healthcare organisations within their region
- Provide resources to implement Nursing and Midwifery Quality Care-Metrics
- Establish, monitor and evaluate progress aligned to NMPDU regional implementation plans
- Make recommendations as required to the National Lead

4.4.2 NMPDU Quality Care-Metrics Project Officer

- Each NMPDU has identified a Project Officer within their region to enable implementation at local and regional level and to support the development of new Quality Care-Metrics in the established work-streams.
- Work collaboratively under the direction of the National Lead in order to ensure consistency of approach and that the goals and targets agreed on behalf of the ONMSD are achieved
- Contribute to local implementation plans developed and agreed with their respective NMPDU Director
- Lead on the development of new metrics through the established care group work streams
- Work collaboratively with Nursing and Midwifery Quality Care-Metrics Service Leads in individual healthcare organisations to support implementation of agreed Nursing and Midwifery Quality Care-Metrics
- Provide information/education sessions to individual healthcare organisations with a view to the services undertaking a Train the Trainer approach for on-going education
- Arrange the issue of usernames and passwords to new users on the TYC HSE system
- Liaise with Nominated Service Lead in relation to new site setup on the TYC HSE system and any technical issues experienced by users which may require escalation to the TYC HSE IT support person
• Monitor and track the uptake and usage of Nursing and Midwifery Quality Care-Metrics within clinical services
• Participate in Nursing and Midwifery Quality Care-Metrics National Group meetings
• Support the National Lead in the promotion, marketing and evaluation of Nursing and Midwifery Quality Care-Metrics to include conference presentations and journal publications

4.4.3 DIRECTOR OF NURSING AND MIDWIFERY

• Liaise with Regional NMPDU Director and/or Regional NMPDU Nursing and Midwifery Quality Care-Metrics Project Officer in order to introduce Nursing and Midwifery Quality Care-Metrics within their organisation
• Approve the implementation of Nursing and Midwifery Quality Care-Metrics within their organisation
• Nominate a Nursing and Midwifery Quality Care-Metrics Service Lead and delegate responsibility for implementation in agreed locations
• Agree the governance structure for the management of Nursing and Midwifery Quality Care-Metrics data internally to include data collection methods, monitoring of results, action planning and follow-up
• Create a vision for how Nursing and Midwifery Quality Care-Metrics data contribute to the hospital and/or services quality governance framework

4.4.4 NOMINATED SERVICE LEAD

• Coordinate and manage the implementation of Nursing and Midwifery Quality Care-Metrics within the organisation
• Agree Nursing and Midwifery Quality Care-Metrics for implementation with the Director of Nursing/Midwifery
• Facilitate training sessions for Nursing/Midwifery Nursing and Midwifery Quality Care-Metrics data collectors on the TYC HSE system and establish a train the trainer approach for future education
• Participate in the Nursing and Midwifery Quality Care-Metrics local governance committee
• In conjunction with the Director of Nursing/Midwifery, identify data collectors with senior Nurse/Midwifery management experience
• Establish a monthly process for data collection
• Liaise with RPHN/CNM on action plans where performance improvement is required at ward/unit level
• In conjunction with RPHN/CNM and RPHN Practice Development Coordinator, contribute to practice issues highlighted as part of this process and take remedial action as appropriate
• Attend required meetings with Director of Nursing/Midwifery to report on Nursing and Midwifery Quality Care-Metrics data results

• Liaise with NMPDU Nursing and Midwifery Quality Care-Metrics Project Officer on Nursing and Midwifery Quality Care-Metrics data collected and reports as required

• Escalate risk incidents identified during Nursing and Midwifery Quality Care-Metrics data collection as appropriate

### 4.4.5 Clinical Nurse/Midwife Manager

• Liaise and support the Nursing and Midwifery Quality Care-Metrics data collectors to undertake data collection in their area of responsibility

• Receive and act on feedback from Nursing and Midwifery Quality Care-Metrics data collectors

• Review online reports on the TYC HSE System

• Devise responsive action plans consistent with Nursing and Midwifery Quality Care-Metrics results as required in consultation with line manager

• Provide feedback to ward/unit healthcare staff on Quality Care-Metrics results, acknowledging the achievement of standards and leading on improvement action plans as required

• Display and share Nursing and Midwifery Quality Care-Metrics reports on unit/ward notice board

• Present evidence of Nursing and Midwifery Quality Care-Metrics results to appropriate Nursing/Midwifery governance structures

### 4.4.6 Quality Care-Metrics Data Collector

The Nursing and Midwifery Quality Care-Metrics Data collector should not be directly employed within the collection area. He/she should:

• Have a working knowledge of the guideline as appropriate to each metric, to ensure accuracy, standardisation and consistency in the interpretation of the metric

• Attend the required training session(s) on Nursing and Midwifery Quality Care-Metrics

• Have a working knowledge of the TYC HSE system prior to conducting data collection

• Liaise with ADPHN’s/RPHN’s/CNM’s/CMM’s to arrange suitable time for data collection

• Undertake data collection on a monthly basis and enter into the TYC HSE system using allocated username and password

• Provide feedback as appropriate to ADPHN’s/RPHN’s/CNM’s/CMM’s

• Provide information to ADPHN’s/RPHN’s/CNM’s/CMM’s and appropriate action taken where areas of risk are identified
5.0 PROCESS FOR QUALITY CARE- METRICS DATA COLLECTION

5.1 Process

5.1.1 The process for data collection should ensure that collection is peer to peer and that staff ADPHN/RPHN/RN/CNMs do not collect in the area in which they are working. Including procedures such as “inter-rater reliability” checks will support data quality.

5.1.2 Data collectors are selected within each organisation by their Director of Nursing/Midwifery. Authorisation is given to enter data on the TYC HSE System using an individualised username and password.

5.1.3 The data collector is required to confirm that they have a working knowledge of the guideline as appropriate to each metric, to ensure accuracy, standardisation and consistency in the interpretation of the metric – as outlined in Section 2 Part A.

5.1.4 Data collectors should be mindful of the clinical area they are attending, following protocols for that service, to include: obtaining permission as required entering the clinical area, dress code as per policy and adherence to infection prevention and control procedures in the clinical area.

5.1.5 At all times, individuals should be treated with respect and dignity and afforded the necessary confidentiality and anonymity.

Figure 11 outlines the process for undertaking Nursing and Midwifery Nursing and Midwifery Quality Care-Metrics

Figure 11: Undertaking Quality Care-Metrics at Service Level
5.2 Sample Size

5.2.1 Sample Size Selection in Ward/Unit Based Areas

• Based on total bed capacity, samples of 25% of patient/service user records are randomly selected per month from each ward/unit/location/network. Following guidance from the HSE Quality Improvement Division, it is recommended that a minimum of 5 data collections per month for each ward/unit/location/network are conducted.

• Where the bed capacity or occupancy for a particular ward/unit/location/network is fewer than 5, it is recommended that Nursing and Midwifery Quality-Care Metrics data is collected from all patient/service user records per month.

• Where a sample of 25% of patients/service users exceeds 10, it is recommended that the number of data collections per month should equal 10.

5.2.2 Sample Size Selection in Caseload Based Services

• In services such as operating theatres, procedure areas, labour suites or day service areas the monthly sample recommended is 10 cases per month. Similarly in Public Health Nursing Areas, the sample caseload should be 10 cases per network each month.

5.3 Timing of Monthly Data Collections

5.3.1 Data may be collected anytime between the first and the last day of each month. Data entered will automatically be entered in the current month.

5.3.2 Best practice requires that all data is entered on the day of measurement which will give immediate and efficient access to the results.

5.3.3 Data collectors are only required to examine the care records for the 72 hours preceding data collection.

5.4 Accessing Test Your Case HSE system

5.4.1 The TYC HSE System is available nationally to agreed services implementing of Nursing and Midwifery Quality Care-Metrics. The level of access users will have to the TYC HSE system is authorised by the Nursing and Midwifery Quality Care-Metrics Service Lead within organisations. Names of individuals who may access the data entry field and the reporting fields are determined by the Nominated Service Lead and supplied to the Nursing and Midwifery Quality Care-Metrics Project Officer who arranges the issuing of passwords.
5.4.2 To access the TYC HSE System, users log on to the Internet browser and open the website [http://www.testyourcarehse.com](http://www.testyourcarehse.com). Users enter a username and password and click the login button. The TYC HSE system disseminates the initial username and password to the user via two emails. Passwords can then be changed by the user by going to the Settings options on the TYC HSE toolbar and entering a password of choice. Username and passwords should not be shared as they are unique to users and allow access to either data entry or reporting or both. The home page of the TYC HSE System is illustrated in Figure 12.

5.4.3 Users will only have access to the locations in their own hospital/service or as agreed by the relevant Director of Nursing/Midwifery. Options available on the system are:

- **Collect:** Data Entry (to enter the Nursing and Midwifery Quality Care-Metric responses for each clinical area)
- **Report:** Reporting on the results of the Nursing and Midwifery Care-Metric responses per clinical area
- **Action Plans:** This section gives access to an online action plan to address scores under 100% as deemed appropriate by each manager
- **Documents:** This section contains supporting documentation including the National Guidelines for each Quality Care-Metric and the templates for data collection

5.4.4 Access to Collecting: ADPHN/RPHN/Nurses/Midwives are given permission for collecting at 2 levels within TYC HSE and access should be given for the required level only:

- Collect only
- Collect and Report

If the user only has access to reporting, the data entry option will not be accessible. The screen will automatically open in the Data Entry section if the user has both data entry and reporting entitlements.
5.5 **Data Entry**

5.5.1 The TYC HSE System will open automatically on the data entry screen (Collect). If this does not occur, the data collector/user should click the **Collect** link in the middle of the toolbar on the top right of screen.

5.5.2 A drop down menu (Figure 13) is utilised to select the questionnaire of choice and also the location where it is being undertaken. To undertake data entry:

- Select the relevant questionnaire
- Select the relevant location
- Select “Begin”; once selected, the number of times data has been accessed and saved this month will be displayed

![Figure 13: Data Entry: TYC HSE System](image)

5.5.3 Data entry occurs through the selection of the predetermined answers ‘Yes/No/Not Applicable’ (Figure 14 and 15)

![Figure 14: Data Entry: TYC HSE System (1)](image)
• Select the appropriate response for each question, on completing a section the user should click the Next button
• Yes answer has a score of 10/10
• No answer has a score of 0/10
• N/A answer does not have a score and doesn’t affect the overall result
• Once all questions have been answered, click the Finish button to save and the data entered for that patient/service user will be uploaded to the server
• At any time the user can abandon the current collection; however abandoned collections are not saved or included in the reports

Figure 15: Data Entry: TYC HSE System (2)
6.0 QUALITY CARE-METRICS DATA ANALYSIS

6.1 SCORING SYSTEM

6.1.1 Scores are illustrated easily using a Traffic Lights Scoring System which highlights areas of improvement, areas of risk and areas of excellence (Figure 16). Areas of good practice are demonstrated using green lights. Areas requiring some improvement are displayed with amber lights and areas requiring immediate attention and action plans are shown using red lights.

![Traffic Light Scoring System](image)

<table>
<thead>
<tr>
<th>Score Range</th>
<th>Color</th>
</tr>
</thead>
<tbody>
<tr>
<td>90% - 100%</td>
<td>Green</td>
</tr>
<tr>
<td>80% - 89%</td>
<td>Amber</td>
</tr>
<tr>
<td>79% - 0%</td>
<td>Red</td>
</tr>
</tbody>
</table>

Figure 16: Traffic Light Scoring System

6.1.2 The highlighted score will be colour coded as illustrated in Figure 16 and is shown in three ways (Figure 17):

![Score System Diagram](image)

Figure 17: Scoring System
6.2 REPORTING

6.2.1 Reports are created to assist in the systematic measuring of quality of Nursing and Midwifery clinical care processes. Reports identify and acknowledge services that are delivering safe, quality care and agreed standards and identify opportunity for quality improvements.

6.2.2 Reporting in TYC HSE provides a visual real-time summary of Care Indicator or Patient Experience collections.

6.2.3 When new services are being configured, it is important ‘Location Groupings’ are discussed with the Nominated Service Lead. This option facilitates collective reporting for senior managers if required, however, individual locations may be adequate for reporting requirements.

6.2.4 To access reporting click the Report tab in the top right hand corner (Figure 18)

6.2.5 Summary Report: A common report is the ‘Summary Report’ which gives an overall score for each metric and the results can be exported into excel/word etc. if needed. This report can also provide details on the specific metrics by drilling into the relevant month in addition to identifying trends.

- **Questionnaire** – Select the relevant questionnaire e.g. Public Health Nursing, Acute, Theatre, Children’s,
- **Location Groups** – Select groupings such as medical, surgical, or if a particular group is not required, select all
- **Location** – Select the name of the ward, unit or theatre or all locations to get an overall hospital/care facility/network score
- **Type** – Select Summary
6.2.6 Collection Summary Report: A common report is the ‘Collection Summary Report’ which gives an overall view of collections and the results can be exported into excel/word etc. if needed. This report can also provide details on the specific metrics by drilling into either the number of collections or the relevant month.

- **Questionnaire** – Select the relevant questionnaire e.g. Public Health Nursing, Acute, Theatre, Children’s,

- **Location Groups** – Select groupings such as antenatal, labour, postnatal or if a particular group is not required, select all

- **Location** – Select the name of the ward, unit or theatre or all locations to get an overall hospital/care facility/network score

- **Type** – Select Summary

6.2.7 Create your own Report (1): if a more detailed report is required to ascertain precisely which indicators within a metric scored low, the ‘Create your own report’ option may be used (Figure 19 and 20).

- Once in Report tab click on **Create your own report**

- **Questionnaire** – Select the relevant questionnaire e.g. HSE PHN, HSE Children's, HSE Theatre etc.

- Select the **start and end date**

- **Location** – select network/area from the list

- **Column Heading** – select ‘month’(this puts the month(s) across the top of the page for viewing)

- **Row Heading** – select **Section and question** to show results for each question (indicator) within a metric

- Click **submit** button

- A print friendly version of the report is available by clicking the ‘print’

---

**Figure 19: Create your own Report**
6.2.8 Create your own Report (2): if a more detailed report is required to compare locations (wards / units) across a service the ‘Create your own report’ option may also be used (Figure 19 and 22).

- Once in Report tab click on Create your own report
- Questionnaire – Select the relevant questionnaire for the relevant service
- Select the start and end date
- Location – select network/area from the list
- Column Heading – select ‘location’ or ‘location grouping’ (this puts the location(s) or the location grouping(s) across the top of the page for viewing)
- Row Heading – select Section and question to show results for each question (indicator) within a metric
- Click submit button
- A print friendly version of the report is available by clicking the ‘print’
Figure 22: Create your own Report; Results; Column Heading: Location and Row Heading: Section and Question

- This selection, ‘Column heading: Location and Row Heading: Section and Question’ supports the RPHN/CNM to compare indicators in each area for shared learning (Figure 22).

6.2.9 Create your own Report (3): if a more detailed report is required the ‘Create your own report’ option may be used (Figure 19 and 23).

- Once in Report tab click on Create your own report
- Questionnaire – Select the relevant questionnaire e.g. Public Health Nursing, Mental Health, Acute, Children’s
- Select the start and end date
- Location – Select network/area or select all from the list
- Column Heading – select month (this puts the month(s) across the top of the page for viewing)
- Row Heading – select location grouping to show overall results for location grouping
- Click submit button
- A print friendly version of the report is available by clicking the ‘print’
Figure 23: Create your own Report; Results; Column Heading: Month and Row Heading: Location Grouping

- This selection, ‘Column Heading: Month and Row Heading: Location Grouping’ supports the ADPHN to compare groupings/divisions per month if set up (Figure 23).

Alternatively, for more detail in relation to each metric, select section in the Column Heading – (this puts the metrics across the top of the page for viewing) (Figure 24).
7.0 QUALITY CARE-METRICS ACTION PLANNING

7.1 ACCESSING ACTION PLANNING ON TEST YOUR CARE HSE

7.1.1 Action Plan Reporting is available for each location to keep an electronic record of action plans arising from measurement of the metrics. Action plans are completed by going to the top right hand corner and selecting the Action Plans Link. Click "Action Plans" and complete the data fields as per example below in Figure 25.

![Figure 25: Accessing Action Planning on Test Your Care HSE](image)

7.1.2 Users can also generate or print an “Action Plan Report” through the report option and then by selecting Action Plan from the drop down menu. This report is available to managers in order to oversee, highlight issues, or provide recommendations on the actions arising from the Nursing and Midwifery Quality-Care Metrics measurement.

7.2 SEVEN STEPS OF ACTION PLANNING

- Understanding Quality Care-Metrics results
- Communicating and discussing Quality Care-Metrics results
- Developing focused Action Plans in response to Quality Care-Metrics results
- Communicating Action Plans and deliverables
- Implementing Action Plans
- Accessing progress and evaluating the impact
- Sharing what works
### 7.2.1 Step 1: Understanding Nursing and Midwifery Quality-Care Metrics Results

- Review Nursing and Midwifery Quality-Care Metrics results and interpret them before developing the action plan. Need a detailed report? – ‘Create Your Own Report’ on TYC HSE
- Identify and prioritise with the team a manageable number of areas for improvement
- Use clinical judgement – choose the indicators/questions which require the most urgent action to keep the patient safe

### 7.2.2 Step 2: Communicating and Discussing Results - Holding Team Meeting/Huddle

- Bring the detailed report to the team meeting/huddle
- Choose what to tackle first - There may be several questions/indicators that require attention, however the team will need to determine priority areas first
- Be specific - Identify specific tasks and activities that are required to address the area requiring improvement
- Extra resources – Identify external resources (outside my unit) required to tackle this e.g. expertise, education, equipment
- Timeframes: Assign realistic timeframes to each specific task or activity
- Be collaborative – ask staff to highlight issues which may be causing low scores/poor care on this issue. Ask - What makes it difficult for staff to do it this way/ carry out this check…?
- Lead person - Identify who on the team will be responsible for leading on the Action Plan and encouraging the team
- What might block this plan? - Identify potential obstacles that may be encountered when trying to implement change and try to understand resistance
7.2.3 Step 3: Writing the Action Plan

- Having identified what areas (metric/indicator) to tackle - be SMART as guided by Figure 26
- Use plain English
- Address one issue per action plan otherwise the action plan can become unfocussed and confusing to follow
- State clearly what the team is expected to do - the identified actions should be precise in what needs to be done and the changes that need to be made
- Write a plan that relates directly to the individual workplace and that is under the team’s area of influence
- Be realistic with identified target dates

7.2.4 Step 4: Communicate the Action Plan

- Make sure the nursing team are informed about the action plan
- Print off current Action Plans and display on notice board or communication board or Quality Improvement board
- Discuss after all hand-overs one day per week (…each Tuesday discuss what action plans are on-going – 5 minutes) to keep it on the ward/unit agenda
7.2.5 **Step 5: Implement the Action Plan**

- Vital - taking *action* makes the real difference.
- Changes do not have to be major or require significant resources
- Make Action Plans small and manageable

7.2.6 **Step 6: Assess Your Progress**

- Ask staff how they are getting on with this change
- Don’t wait for the next metric result …. Keep an eye to see if the change is being carried out
- Fill in the progress part of the action plan
- If the change has worked, tell staff
- If the change has not worked – ask why?
- Were the changes outlined in the action plan not carried out?
- Were the ‘wrong changes’ planned - was there something different that could have done?

7.2.7 **Step 7: Share What Works**

- Share with ADPHN/RPHN/RN colleagues at meetings
- Be honest about the parts that were hard/didn’t work
- Get ideas from action plans from other areas already completed
8.0 QUALITY CARE-METRICS HUB

8.1 The Nursing and Midwifery Quality-Care Metrics hub on HSEland is located within the ONMSD Nursing and Midwifery Hub at http://qcmhub.hseland.ie/using-tyc/

8.2 The aim of the hub is to create an online resource that provides relevant information and learning resources on Nursing and Midwifery Quality-Care Metrics for nurses and midwives.

8.3 The hub guides ‘Test Your Care’ users and potential users through
- ‘QCM Explained’
- ‘Implementing QCM’
- Using ‘Test Your Care’
- ‘Improving Practice’ section focused on action planning
- ‘News’ to keep users and those with an interest in QCM up to date in QCM project developments
- ‘Help and Resources’ to support implementation processes

Testimony from expert users from around the country is also featured to encourage those starting their journey.
Figure 27: Quality Care-Metrics Hub

8.4 To access the Quality Care-Metrics hub on HSELand:

- Log in to www.HSELand.ie
- Go to - All hubs
- Go to - Nursing and Midwifery
- Go to - Quality Improvement
- Go to - Quality Care-Metrics
PART B: Guideline Development Cycle

1.0 INITIATION

1.1 Purpose

Please refer to Part A, 1.9

1.2 Scope

Please refer to Part A, 1.10

1.3 Objective

Please refer to Part A, 1.11

1.4 Outcomes

Please refer to Part A, 1.12

1.5 Guideline Development Group

1.5.1 This guideline has been developed by the National Quality Care-Metrics Project Lead and team (NMPDU Quality Care-Metrics Project Officers) under the guidance of the ONMSD. Refer to Appendix III for Membership of the Guideline Development Group.

1.5.2 Guideline Conflict of Interest Declaration Forms have been completed by each member of the Guideline Development Group as per Appendix IV and are retained with the master copy of this guideline.

1.5.3 Additional contributors and reviewers of this guideline are identified within Appendix V.
1.6 Guideline Governance Group

1.6.1 The ONMSD Governance Group has provided governance for the project and guideline development. Refer to Appendix V for Membership of the Guideline Governance Group.

1.7 Supporting Evidence

1.7.1 Legislation and regulation publications, which are relevant to the Public Health Nursing Services Quality Care-Metrics development were reviewed and are incorporated in the development of this guideline and are listed below. In addition, existing policy and standards were reviewed and incorporated into the development of the guideline.

Metric: Pressure Ulcer Prevention and Management

- National Wound Management Guidelines (HSE, 2018)
- Pressure Ulcers: Prevention and Management. NICE Guideline CG17, (NICE, 2014a)
- International Guideline; Pressure Ulcer Treatment Technical Report, (National Pressure Ulcer Advisory Panel (NPUAP) & European Pressure Ulcer Advisory Panel, 2009)
- Position Statement on Staging, (National Pressure Ulcer Advisory Panel, 2017)
- EPUAP Classification System for Pressure Ulcers: European Reliability Study, (Beeckman et al, 2007)
- National Standards for Safer Better Healthcare, (HIQA 2012a)
- A Nursing Information Model Process for Interoperability, (Chow et al, 2015)
- Developing a Pressure Ulcer Risk Factor Minimum Data Set and Risk Assessment Framework, (Coleman et al, 2014)
- The Effect of a Patient Centred Care Bundle Intervention on Pressure Ulcer Incidence (INTACT): A Cluster Randomised Trial, (Chaboyer et al, 2016)
- Changes in Patient Health Outcomes from Admission to Discharge in Acute Care, (Hall et al, 2013)
- The Design of the SAFE or SORRY?; A Clustered Randomised Trial on the Development and Testing of an Evidence Based Inpatient Safety Program for the Prevention of Adverse Events, (Van Gaal et al, 2009)
- Adverse Risk: A Dynamic Interaction Model of Patient Moving and Handling, (Griffiths, 2012)
- Quality of Care of Nurse-Led and Allied Health Personnel-Led Primary Care Clinics, (Chin et al, 2011)
• Quality Indicators in Community Care, (Bowers, 2014)
• Guide to the Health Information and Quality Authority’s Review of Nutrition and Hydration in Public Acute Hospitals, (HIQA, 2016a)
• Differences in Nutritional Care in Pressure Ulcer Patients Whether or Not Using Nutritional Guidelines, (Meijers et al, 2008)
• Pressure Ulcer Prevention and Management for Adults, (HSE, 2014a)

**Metric: Wound Care Management**

• National Wound Management Guidelines (HSE, 2018)
• National Best Practice and Evidence Based Guidelines for Wound Management. Dublin, (HSE, 2009)
• Quality of Care of Nurse-Led and Allied Health Personnel-Led Primary Care Clinics, (Chin et al, 2011)
• Wound Management by Registered Nurses in the Community, Ireland: (HSE, 2014b)

**Metric: Health Care Associated Infection Prevention and Control**

• Prevention and Control Methicillin-Resistant Staphylococcus Aureus (MRSA) National Clinical Guideline No.2, (Department of Health, 2013)
• Guidelines for the Prevention and Control of Multi-Drug Resistant Organisms (MDRO) Excluding MRSA in the Healthcare Setting, (Royal College of Physicians & HSE, 2012)
• Guiding Framework for the Education, Training and Competence Validation in Venepuncture and Peripheral Intravenous Cannulation for Nurses and Midwives, (HSE, 2017a)
• Central Venous Access Device (CVAD) Assessment, Care and Monitoring, (HSE, 2017b)
• Nursing Quality Indicators: The Next Steps in Enhancing Quality in Emergency Care, (Bennett, 2012)
• Vital Improvement, (Bucsit, 2012)
• Guideline on the use of Standard and Transmission Based Precautions in the Prevention and Control of Infection, (HSE, 2016a)
• Guideline for the Control of MRSA PHN Department Dublin West, (HSE, 2016b)
• Guideline for the Care and Management of a Central Venous Access Device (CVAD) when Used for a Child in the Community, (HSE, 2012a)
• National Patient Safety Goals; Effective January 2018, (The Joint Commission, 2017)
**Metric: Continence Assessment and Management: Continence Control**

- *Urinary Incontinence in Women, NICE Quality Standard QS77*, (NICE, 2015)
- *Urinary Incontinence in Women: Management. NICE Guideline CG171*, (NICE, 2013a)
- *Changes in Patient Health Outcomes from Admission to Discharge in Acute Care*, (Hall et al, 2013)
- *Quality of Care of Nurse-Led and Allied Health Personnel-Led Primary Care Clinics*, (Chin et al, 2011)

**Metric: Continence Assessment and Management: Catheter Care**

- *Quality Indicators in Community Care*, (Bowers, 2014)

**Metric: Continence Assessment and Management: Bowel Care**

- *Guidelines for Management of Neurogenic Bowel Dysfunction in Individuals with Central Neurological Conditions*, (Multidisciplinary Association of Spinal Cord Injured Professionals, 2012)
- *The Management of Diarrhoea in Adults; RCN Guidance for Nursing Staff*, (RCN, 2013)
- *Faecal Incontinence in Adults. NICE Guideline CG49*, (NICE, 2014b)
- *Management of Constipation in Adult Patients Receiving Palliative Care: National Clinical Guideline No. 10*, (DOH, 2015a)
- *Validity and Reliability of the Bristol Stool Form Scale in Healthy Adults and Patients with Diarrhoea-Predominant Irritable Bowel Syndrome*, (Blake et al, 2016)

**Metric: Client/Family/Carer Experience**

- *National Consent Policy*, (HSE, 2014c)
- *Family Caregiver Satisfaction with Home-based Nursing and Physician Care Over the Palliative Care Trajectory*, (Guerriere et al, 2013)
• Measuring What Matters: Top-Ranked Quality Indicators For Hospice and Palliative Care from the American Academy of Hospice and Palliative Medicine and Hospice and Palliative Nurses Association, (Dy et al, 2015)

• Undertaking a Family Carer Needs Assessment, (HSE, 2013a)

**Metric: Health Promotion**

• Implementation of Clinical Guidelines for Adults with Asthma and Diabetes: A Three-Year Follow-Up Evaluation of Nursing Care, (Higuchi et al, 2011)

• Quality of Care of Nurse-Led and Allied Health Personnel-Led Primary Care Clinics, (Chin et al, 2011)

• Implementing the Scottish Recovery Indicator: A Community Nursing Service Perspective, (Armstrong, 2012)

• Distinguishing Between Task and Contextual Performance for Nurses: Development of a Job Performance Scale, (Greenslade & Jimmieson, 2007)

**Metric: Care Plan Development and Evaluation**

• Requirements and Standards for Nurse Registration Education Programmes, 3rd Edition, (ABA, 2005)

• Developing a Community Nursing and Midwifery Response to an Integrated Model of Care (DRAFT) (DOH, 2017)

• Changes in Patient Health Outcomes from Admission to Discharge in Acute Care, (Hall et al, 2013)

• National Standards for Safer Better Healthcare, (HIQA 2012)

• Guideline for the assessment of adults referred to the PHN service by RPHNs/RGNs/Locum PHN/Locum RGN, (HSE, 2016c)

• Family Caregiver Satisfaction with Home-based Nursing and Physician Care Over the Palliative Care Trajectory, (Guerriere et al, 2013)

• Distinguishing Between Task and Contextual Performance for Nurses: Development of a Job Performance Scale, (Greenslade & Jimmieson, 2007)

• Measuring What Matters: Top-Ranked Quality Indicators For Hospice and Palliative Care from the American Academy of Hospice and Palliative Medicine and Hospice and Palliative Nurses Association, (Dy et al, 2015)

**Metric: Care Plan Development and Evaluation: Discharge Planning**

• Integrated Care Guidance: A Practical Guide to Discharge and Transfer from Hospital (v.2), (HSE, 2014d)
- Discharge of a Client from Public Health Nursing Active Caseload, DRAFT, HSE, 2017c)
- Discharge of a Client from Public Health Nursing Active Caseload, (HSE, 2013b)

**Metric: Care Plan Development and Evaluation: Falls Management**

- Falls in Older People: Assessing Risk and Prevention, NICE Guideline CG161, (NICE, 2013)
- Strategy to Prevent Falls and Fractures in Ireland’s Ageing Population, (HSE, 2008)
- National Standards for Safer Better Healthcare, (HIQA 2012)
- Quality of Care of Nurse-Led and Allied Health Personnel-Led Primary Care Clinics, (Chin et al, 2011)
- Fall and Injury Prevention, (Currie, 2006)
- Quality Indicators in Community Care, (Bowers, 2014)
- Adverse Risk: A Dynamic Interaction Model of Patient Moving and Handling, (Griffiths, 2012)
- The Design of the SAFE or SORRY?: A Clustered Randomised Trial on the Development and Testing of an Evidence Based Inpatient Safety Program for the Prevention of Adverse Events, (Van Gaal et al, 2009)
- Fit for Frailty: Consensus Best Practice Guidelines, (BGS, 2017)
- A Global Clinical Measure of Fitness and Frailty in Elderly People, (Rockwood et al, 2005)
- Guideline on Falls Risk For Older People in the Community (FROP-Com) Screen, (HSE, 2013c)
### Metric: Care Plan Development and Evaluation: Falls Risk Assessment Tools

- **Usefulness of the Berg Balance Scale in Stroke Rehabilitation: A Systematic Review**, (Blum & Korner-Bitensky, 2008)
- **The Berg Balance Scale has High Intra- and Inter-Rater Reliability but Absolute Reliability Varies Across the Scale: A Systematic Review**, (Downs et al, 2013)
- **The Dynamic Gait Index in Healthy Older Adults: The Role of Stair Climbing, Fear of Falling and Gender**, (Herman et al, 2009)
- **Validity of the Dynamic Gait Index in People With Multiple Sclerosis**, (Forsberg et al, 2013)
- **Minimal Detectable Change of the Timed “Up & Go” Test and the Dynamic Gait Index in People With Parkinson Disease**, (Huang et al, 2011)
- **Timed Up and Go Test and Risk of Falls in Older Adults: A Systematic Review**, (Beauchet et al, 2011)
- **Validity of the Timed Up and Go Test as a Measure of Functional Mobility in Persons With Multiple Sclerosis**, (Sebastiao et al, 2016)
- **Reliability and Validity of the Timed Up and Go Test With a Motor Task in People With Chronic Stroke**, (Chan et al, 2017)

### Metric: Care Plan Development and Evaluation: Nutrition

- **Nutrition Support in Adult, Quality Standard QS24**, (NICE, 2012)
- **Identifying Patient-Centred Quality Indicators for the Care of Adult Home Parenteral Nutrition (HPN) Patients**, (Dressen et al, 2014)
- **Guideline on Nutritional Screening of adults by community nurses using the ‘Malnutrition Universal Screening Tool’ ('MUST') and first line dietary management including the use of Oral Nutritional Supplements**, (HSE, 2017d)
- **Guideline on the Management of Clients on Home Enteral Feeding**, (HSE, 2009a)

### Metric: Care Plan Development and Evaluation: Pain

- **Pharmacological Management of Cancer Pain in Adults: National Clinical Guideline No.9**, (DOH, 2015b)
- **Neuropathic Pain in Adults: Pharmacological Management in Nonspecialist Settings. NICE Guideline CG173**, (NICE 2013b)
- **Management of Chronic Pain**, (SIGN Guideline 136, SIGN, 2013)
- **Joint Commission Enhances Pain Assessment and Management Requirements for Accredited Hospitals**, (The Joint Commission, 2017a)

• The ACTTION-American Pain Society Pain Taxonomy (AAPT): An Evidence-Based and Multi-Dimensional Approach to Classifying Chronic Pain Conditions, (Fillingam et al, 2014)

• AAPT Diagnostic Criteria for Chronic Cancer Pain Conditions, (Paice et al, 2017)

• Adverse Risk: A Dynamic Interaction Model of Patient Moving and Handling, (Griffiths, 2012)

• Vital Improvement, (Bucsit, 2012)

• Changes in Patient Health Outcomes from Admission to Discharge in Acute Care, (Hall et al, 2013)

• Measurement of Pain, (Huskisson, 1974)

• Pain: Understanding of Assessment Management and Treatments, (National Pharmaceutical Council and Joint Commission on Accreditation of Healthcare organisations, 2001)

**METRIC: CARE PLAN DEVELOPMENT AND EVALUATION: PAIN ASSESSMENT TOOLS**

• The Brief Pain Inventory: User Guide, (Cleeland, 2009)

• The Edmonton Symptom Assessment System (ESAS): A Simple Method for the Assessment of Palliative Care Patients, (Bruera et al, 1991)

• Validation of the Edmonton Symptom Assessment Scale, (Chang et al, 2000)

• Clinical Practice Guidelines for the Management of Pain, Agitation, and Delirium in Adult Patients in the Intensive Care Unit, (Barr et al, 2013)

• Measuring Pain in Non-Verbal Critically Ill Patients: Which Pain Instrument? (Payen & Gelinas, 2014)

• Validity of Four Pain Intensity Rating Scales, (Ferreira-Valente et al, 2011)

• The Behaviour Pain Assessment Tool for Critically Ill Adults: A Validation Study in 28 Countries, (Gelinas et al, 2017)

• Effectiveness and Safety of the Awakening and Breathing Coordination, Delirium Monitoring/Management, and Early Exercise/Mobility (ABCDE) Bundle, (Balas et al, 2014)

• Reliability of the Sedation-Agitation Scale between Nurses and Doctors, (Ryder-Lewis & Nelson, 2008)

• Patterns of Pain and Interference in Patients with Painful Bone Metastases: A Brief Pain Inventory Validation Study, (Wu et al, 2010)

• Brief Pain Inventory Review, (Stanhope, 2016)
• The LANSS Pain Scale: the Leeds Assessment of Neuropathic Symptoms and Signs, (Bennett, 2001)
• Development of a Neuropathic Pain Questionnaire, (Krause, 2003)
• Comparison of Pain Syndromes Associated with Nervous or Somatic Lesions and Development of a New Neuropathic Pain Diagnostic Questionnaire (DN4), (Bouhassira et al, 2005)
• Validation and Reliability of the Neuropathic Pain Scale (NPS) in Multiple Sclerosis, (Rog et al, 2007)
• Management of Postoperative Pain: A Clinical Practice Guideline From the American Pain Society, the American Society of Regional Anesthesia and Pain Medicine, and the American Society of Anesthesiologists’ Committee on Regional Anesthesia, Executive Committee, and Administrative Council Guidelines, (Chou et al, 2016)
• Implementing the ABCDE Bundle into Everyday Care: Opportunities, Challenges and Lessons Learned for Implementing the ICU Pain, Agitation and Delirium (PAD) Guideline, (Balas et al, 2013)
• Short Form McGill Pain Questionnaire, (Melzack, 1987)
• Can the Neuropathic Pain Scale Discriminate Between Non-Neuropathic and Neuropathic Pain? (Fishbain et al, 2008)

**METRIC: MEDICATION SAFETY**

• Guidance to Nurses and Midwives on Medication Management, (ABA, 2007)
• Medicines Management Guidance, (HIQA, 2015)
• Standards for Medicines Management for Nurses and Midwives (DRAFT), (NMBI, 2015)
• Multimorbidity and Polypharmacy. Key Therapeutic Topic KTT18, (NICE, 2017)
• Polypharmacy Guidance (NHS, 2015)
• Guide to the Health Information and Quality Authority’s Medication Safety Monitoring Programme in Public Acute Hospitals, (HIQA, 2016b)
• Medicines Optimisation, NICE Guideline NG5, (NICE, 2016)
• Opioids for Cancer Pain - An Overview of Cochrane Reviews, (Wiffen et al, 2017)
• Fall and Injury Prevention, (Currie, 2006)
• Quality of Care of Nurse-Led and Allied Health Personnel-Led Primary Care Clinics, (Chin et al, 2011)
• Discharge Documentation of Patients Discharged to Subacute Facilities: A Three Year Quality Improvement Process Across an Integrated Health Care System, (Gandara et al, 2010)
• National Patient Safety Goals; Effective January 2018, (The Joint Commission, 2017)
• Assessment of the Clients’ Ability to Self-administer Medication and Provision of Supportive Measures for Self-administration of Medication, (HSE, 2009b)
• Procedure on the Role of the Registered Nurse in Medication Management in the Community Palliative Care Setting, (HSE, 2014f)

• Medication Administration in the Public Health Nursing Service, (HSE, 2009C)

• Management of a Client who is Non-compliant with Prescribed Treatments/Recommended Supports, (HSE, 2016)

**Metric: Maternal Health**

• Postnatal Care Up-to-8 Weeks After Birth. NICE guideline CG37, (NICE, 2015b)

• Perinatal Mental Health Care: Best Practice Principles for Midwives, Public Health Nurses and Practice Nurses, (Higgins et al, 2017)

• WHO Recommendations on Postnatal Care of the Mother and Newborn, (WHO, 2014a)

• Standard Operating Procedure for Public Health Nursing Service Primary Visit (First Newborn and Postnatal Visit), (HSE, 2011b)

• Guideline on Routine Postnatal Care, (HSE, 2011c)

• Procedure for Screening for Depression in Women in the Antenatal and Postnatal Period and the Provision of Appropriate Interventions by Registered Public Health Nurses and Registered Midwives working in the Public Health Nursing Services, (HSE, 2016e)

**Metric: Infant Nutrition**

• Breastfeeding in a Healthy Ireland: Health Service Breastfeeding Action Plan 2016-2021, (HSE, 2016f)

• Standard Operating Procedure for Public Health Nursing Service Primary Visit (First Newborn and Postnatal Visit, (HSE, 2011d)

• Breastfeeding Policy for Primary Care Teams and Community Healthcare Settings, (HSE, 2015b)

• Guideline for the Observation of a Breastfeed & the Breastfeeding Observation Assessment Tool (B.O.A.T), (HSE, 2014)

• Supporting New Mothers with Breastfeeding, (HSE, 2013d)

• Initiating Breastfeeding after Birth, (HSE, 2013e)

• Informing All Pregnant Women of the Benefits of and Management of Breastfeeding, (HSE, 2013f)

• Guideline on the Management of Breast Feeding in the Community, (HSE, 2016g)

• Formula Feeding in the Community, (HSE, 2016h)

• Communicating the Infant Feeding Policy at Midland Regional Hospital Portlaoise, (HSE, 2016i)
• Promoting Infant Feeding and Lactation Management through Evidence Informed Practice, Education and Training at Midland Regional Hospital Portlaoise, (HSE, 2016j)

• Considerations when Deciding on Treatment and/or Medication for a Breastfeeding Mother, and where to Source Information at Midlands Regional Hospital Portlaoise, (HSE, 2016k)

• Hospital Discharge of the Breastfeeding Baby and Mother and Supports Available to her in the Community Midland Regional Hospital Portlaoise, (HSE, 2016l)

**Metric: Child Development Assessment**

• Core Child Health Surveillance Programme: Birth to 3.5 years, (HSE, 2012b)

• Management of The Core Child Health Developmental Visits for Children Referred to the Early Intervention Services, (HSE, 2011e)

• Guideline on Defaulted Core Health Check Visits, (HSE, 2016m)

• Procedure for Public Health Nurses when Examining Infants and Children, (HSE, 2016n)

• Policy on the Nursing Management of Children with Complex or Special Healthcare Needs Referred to the Public Health Nursing Services, (HSE, 2014g)

**Metric: Child and Family Health Needs Assessment**

**Metric: Child Welfare and Protection**

• Children First: National Guidance for the Protection and Welfare of Children, (Department of Children and Youth Affairs, 2011)

• National Standards for the Protection and Welfare of Children For Health Service Executive Children and Family Services, (HIQA, 2012b)

• Child Protection Reports: Key Issues Arising for Public Health Nurses, (Hanafin, 2013)

• Child Protection Reporting Guideline for Public Health Nurses and Registered General Nurses, (HSE, 2016o)

**Metric: Safeguarding Vulnerable Adult**

• Safeguarding Vulnerable Adults, (Department of Social Protection, 2017)

• Safeguarding Vulnerable Persons at Risk of Abuse National Policy & Procedures, (HSE, 2014h)

• Global Status Report on Violence Prevention, (WHO, 2014b)
• *Elder Abuse and Legislation in Ireland*, (National Centre for the Protection of Older People, 2007)

• *Guidelines for Responding to Allegations of Elder Abuse: HSE Elder Abuse Policy*, (HSE, 2012c)

• *HSE Policy and Procedures for Responding to Allegations of Extreme Self-Neglect*. (HSE, 2012d)

1.7.2 PPPGs being replaced by this PPPG:

• *Guiding Framework for the implementation of Nursing and Midwifery Quality Care-Metrics in the Health Service Executive Ireland*. (HSE 2015)

• *National Guideline for Nursing and Midwifery Quality Care Metrics Data Measurement in Public Health Nursing Services*. HSE, (2018d)

1.7.3 Related PPPGs:

• *National Guideline for Nursing and Midwifery Quality Care Metrics Data Measurement in Acute Health Services*. HSE, (2018a)

• *National Guideline for Nursing and Midwifery Quality Care Metrics Data Measurement in Midwifery Services*. HSE, (2018b)

• *National Guideline for Nursing and Midwifery Quality Care Metrics Data Measurement in Intellectual Disability Services*. HSE, (2018c)

• *Standard Operating Procedure for Nursing and Midwifery QCM Data Collection in Mental Health Services*. (HSE 2015a)

• *National Guideline for Nursing and Midwifery Quality Care Metrics Data Measurement in Older Person Services*. HSE, (2018e)

• *National Guideline for Nursing and Midwifery Quality Care Metrics Data Measurement in Children’s Services*. HSE, (2018f)

1.8 Glossary of Terms and Definitions

Please refer to Part A, 1.1

1.9 Abbreviations

Please refer to Part A, 1.2
2.0 DEVELOPMENT OF GUIDELINE

2.1 DEVELOPMENT

2.1.1 The development of this guideline is to support implementation of the Public Health Nurses Services Nursing and Midwifery Quality Care-Metrics (2018)

2.1.2 This guideline has been developed following a robust research project which aimed to (a) critically review the scope of existing Nursing and Midwifery Quality Care Process Metrics and relative indicators and (b) identify additional metrics and indicators relevant to the Public Health Nursing Services. This was undertaken through the completion of a systematic review and consensus methodology.

2.1.3 The development and content of this document has been informed in part by the Nursing and Midwifery Quality Care-Metrics Public Health Nurses Research Report (HSE 2018). This report outlines the research process undertaken as a collaborative between the ONMSD National Nursing and Midwifery Quality Care-Metrics Project Team and University College Dublin (UCD) School of Nursing, Midwifery and Health Systems. It includes the final suite of Public Health Nursing Process Metrics and Indicators developed from the research.

2.1.4 The Public Health Nursing Process Metrics and Indicators are adapted from national and international evidence based practice including PPPGs and reflect what mental health nurses nationally felt was important to measure.

2.1.5 Evidence of the sources for Nursing and Midwifery Quality Care-Metrics generated from this robust research is available in the Nursing and Midwifery Quality Care-Metrics Public Health Nursing Research Report (HSE 2018) and as listed in 1.7 above.

2.2 RESEARCH DESIGN

The study design had four phases as follows:

Phase 1: A systematic literature review to identify metrics that have been used in the respective fields and the indicators for same.

Phase 2: A two-round online Delphi survey of midwives to develop consensus on metrics to be measured.

Phase 3: A two-round online Delphi survey of midwives to develop consensus on indicators for prioritised metrics.

Phase 4: A face-to-face consensus interviews with key stakeholders to review the findings and build consensus on metrics and indicators.
### 2.3 Literature Search Strategy

#### 2.3.1 Aim: The systematic review sought to identify reported quality care process metrics and associated indicators across across 7 workstreams i.e., Public Health Nursing, Midwifery, Acute, Older People, Mental Health, Children’s and Intellectual Disability.

#### 2.3.2 Databases Searched: Eight electronic databases were searched, each from January 1st 2007 to December 31st 2017: PubMed, Embase, Applied Social Sciences Index and Abstracts (ASSIA), PsychINFO, Cumulative Index to Nursing and Allied Health Literature (CINAHL), Cochrane Database of Systematic Reviews (CDSR), Cochrane Central Register of Controlled Trials (CENTRAL) and Database of Abstracts of Reviews of Effects (DARE). To identify additional studies that were not retrieved from the primary database search, the grey literature was appraised. Figure 28: Outlines the complete process flow diagram for the systemic literature review.

#### 2.3.3 Study Selection: Studies were included if participants were registered nurses or midwives, as well as education programmes using nursing and midwifery metric systems in acute, children, intellectual disability, mental health, midwifery, older person, or public health nursing services or where participants were persons in receipt of nursing or midwifery care and services. An additional inclusion criterion was that studies should make a clear reference to nursing or midwifery care processes and identify a specific quality process in use or proposed use.

### 2.4 Method of Evidence Appraisal

#### 2.4.1 Data Extraction: Work stream specific data extraction was conducted by two reviewers using a purposefully designed data extraction tool.

### 2.5 Summary of the evidence from the literature

#### 2.5.1 Results: For the Public Health Nursing (PHN) setting, the review comprised of 9 eligible academic studies and 231 eligible grey literature documents. Following full text review, 70 of these documents were included and 43 existing PHN quality care process metrics were identified. Due to heterogeneity in the literature in relation to study design, meta-analysis was not possible, and a narrative synthesis was undertaken.
Reasons for Exclusion:

- Not related to process metrics
- Conference abstracts/posters/dissertation previews only that do not provide sufficient information
- Not accessible
- Not in English
- Outcome measure
- Duplication
- Audit
- Original publication >10 years

Figure 28: Study Selection Process Flow Diagram for Public Health Nursing Work Stream
2.6 Consensus Process

2.6.1 Delphi Process: Two two-round Delphi surveys (Phase 2 & 3) were conducted consisting of four rounds of data collection and analysis in each to condense the opinions of participants into group consensus on what (a) metrics and (b) their indicators should be used. Responses to each round were collated, analysed, and redistributed to participants for further comment in successive rounds (HSE 2018).

2.6.2 Consensus Meeting: A face-to-face consensus meeting between the research team, the NMPD director, NMPD Project Officers and the PHN Work-stream Working Group members was held on November 30th 2017. The purpose of this Consensus Meeting was to review the findings from the Delphi process and build consensus on the prioritised quality care process metrics and respective indicators. Participants at this meeting were representative of PHN Work-stream key stakeholders with regards to grade and geographical representation. In addition to the PHN Work-stream Working Group members and the NMPD team, additional specialist experts from the field of community nursing were present to add further clarity and validity pertinent to their respective suite of quality care process metrics and indicators. Participants were provided with a Nursing and Midwifery Judgement Framework Tool adapted from Flenady et al. (2016) to use as guide in determining if the process metric/indicator was appropriate for inclusion in the final suite of metrics (Figure 29).

Figure 29: Nursing and Midwifery Quality Care-Metrics Judgement Framework Tool
2.6.3 Consensus Findings: Following the Public Health Nursing Nursing and Midwifery Quality-Care Metrics consensus meeting, 14 nursing quality care process metrics and 67 associated indicators were agreed for the public health nursing services new suite of Nursing and Midwifery Quality-Care Metrics as included in Part A, 2.0.

2.7 **Resources necessary to implement the Guideline Recommendations**

2.7.1 The resources required for the implementation of the guideline recommendations e.g. Quality Care-Metrics at service level, are outlined within 3.2.3 Implementation Phases; 15 Steps to Support Implementation and 3.4, *State of Readiness and Capacity Checklist*.

2.7.2 Consideration of each Implementation Phase and Completion of the State of Readiness and Capacity Checklist will provide services with the opportunity to identify what resources may be required locally.

2.7.3 Directors of Nursing and Midwifery should be cognisant of local structures and/or requirements when completing the *State of Readiness and Capacity Checklist*.

2.8 **Outline of Guideline Steps/Recommendations**

Refer to Part A
3.0 GOVERNANCE AND APPROVAL

3.1 Formal Governance Arrangements

3.1.1 The National Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics Approval Governance Group (Appendix VI) provided formal governance for the project, the Director of the ONMSD is the designated chairperson for this group.

3.1.2 The National Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics Approval Governance Group worked to an agreed scope and terms of reference. Roles and responsibilities of this advisory group membership along with the process of meeting were clearly outlined and agreed.

3.1.3 The National Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics Project Lead reported to the National Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics Approval Governance Group and the ONMSD. The national project plan and work of the National Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics Project Officer Group was presented by the National Project Lead at all governance meetings.

3.2 Guideline Development Standards

3.2.1 The guideline was developed within the HSE National Framework for Developing PPPGs (2016) and has adhered to the NCEC standards as set out within.

3.3 Copyright/Permission Sought

3.3.1 Not required.

3.4 Guideline Checklist

3.4.1 The approved checklist has been completed as per Section 4 of the HSE National Framework for developing PPPGs (2016) and is retained with the master copy of this guideline.
4.0 COMMUNICATION AND DISSEMINATION

4.1 Staff will be made aware of this guideline through HSE Directorate communication mechanisms, nursing forums and the ONMSD communication process. This guideline will be available on [http://www.hse.ie/eng/about/Who/ONMSD/](http://www.hse.ie/eng/about/Who/ONMSD/)

5.0 IMPLEMENTATION

5.1 Implementation Plan: Refer to Part A, 4.1
5.2 Education/Training plans required for Implementation: Refer to Part A, 4.2
5.3 Identification of Lead Person(s) responsible for Implementation: Refer to Part A, 4.3
5.4 Specific Roles and Responsibilities: Refer to Part A, 4.4

6.0 MONITORING, AUDIT AND EVALUATION

6.1 The ONMSD provides the overarching governance and leadership to support structures for monitoring, audit and evaluation of PPPGs related to Nursing and Midwifery Quality-Care Metrics through the ONMSD Governance Group.

6.2 The National Nursing and Midwifery Quality-Care Metrics Project team is responsible for the development and dissemination of this guideline to support services in the implementation process for Nursing and Midwifery Nursing and Midwifery Quality-Care Metrics Data Measurement within the Public Health Nursing Services.

7.0 REVISION/UPDATE

7.1 This guideline will be due for revision three years from approval. The procedure for this revision will be in alignment with the HSE National Framework for developing PPPGs (2016).

7.2 In the event of new evidence emerging which relates directly to this guideline, a working group will be convened to revise and amend the guideline if warranted.

APPENDIX II
IMMEDIATE SAFETY/RISK IDENTIFICATION FORM FOR NURSING AND MIDWIFERY METRICS

The data collector has identified the following immediate safety or risk issues (Example Safety Issue Identified: cupboard unsecured) which requires attention by the ADPHN/RPHN in charge on the day of the metric being undertaken.

This Immediate Safety/Risk Identification Form is to highlight an issue that may need to be addressed immediately by the ADPHN/RPHN in charge prior to the formal report findings of the Metric. It is the responsibility of the clinical nurse/midwife manager or nurse/midwife in charge to act immediately on the issues outlined in line with the safety/risk identified. It is their responsibility to inform their relevant ADPHN of the issue in a timely fashion and outline to the ADPHN the action they took to alleviate or eliminate safety/risk identified.

During the conduction of metrics in the ward today, the following safety/risk concerns are identified.
# National Guideline for Nursing and Midwifery Quality Care - Metrics Data Measurement in Public Health Nursing Services 2018

## To be Completed by the Data Collector Undertaking Metric

<table>
<thead>
<tr>
<th>Name of Hospital/Service Location:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Name of Network/Area:</td>
<td></td>
</tr>
<tr>
<td>Name of Auditor:</td>
<td></td>
</tr>
<tr>
<td>Metric Title:</td>
<td></td>
</tr>
<tr>
<td>Date:</td>
<td></td>
</tr>
<tr>
<td>Safety/Risk Issue Identified:</td>
<td></td>
</tr>
<tr>
<td>Name of ADPHN or RPHN / RPHN Practice Development coordinator in charge informed of Safety/Risk Issue:</td>
<td></td>
</tr>
</tbody>
</table>

## To be Completed by CNM or Nurse in Charge

<table>
<thead>
<tr>
<th>Name of ADPHN informed of Safety/Risk Issue</th>
<th>Date:</th>
<th>Signature of ADPHN or RPHN in Charge</th>
</tr>
</thead>
<tbody>
<tr>
<td>Please sign to confirm the relevant ADPHN/RPHN/RPHN Practice Development Coordinator has been informed and record date informed.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Please retain this Form for reference on your ward for a period of one year.
### Appendix III

**Membership of the Guideline Development Group (National Quality Care-Metrics Project Team)**

<table>
