Mr. Michael & Mrs. Anne Maloney,
Blackrocks Nursing Home,
The Green,
Foxyford,
County Mayo.

12th January 2006

Inspection Report

Dear Mr. & Mrs. Maloney,

A Health Service Executive Senior Environmental Health Officer visited Blackrocks Nursing Home, on the afternoon of 13th December 2006 to carry out an inspection under the above legislation. There were 35 residents accommodated in the home at the time of this visit. The nursing home is currently fully registered for up to 50 residents.

Issues identified in the previous Environmental Health report dated 3rd July 2006 were seen to have been satisfactorily addressed.

The inconvenience posed by the current state of flood of the adjacent River Moy is of concern. The difficulty in accessing the home seems to be fairly well covered by your plans in place. I would advise that in the event of further flooding of the roadway, that you proactively contact the emergency services to advise them of the situation, in addition to your current plans in place. Discussions should also take place with the Local Authority with a view to raising the road level, thereby allowing access to the home even when the river bursts its banks.

Yours sincerely,

Senior Environmental Health Officer
