Notes:

1. 2014 sees the commencement of a new outpatient data reform programme. Data presented in 2014 includes data excluded under the previous reform programme, along with a number of additional hospitals. It is expected that as the data reform process progresses at hospital level, additional data will be added each month, both within specialties and with the addition of new specialties/services thus comparisons to previous years data will not be accurate
2. Number shown in the New: Return ratio column is the actual number of return attendances to every new attendance during the reporting period
3. 2014 / 2015 datasets do not include Midland regional Hospital Mullingar activity due to unavailability of data for March 2015.
