

January 2025

National Performance Report

January 2025 Reporting Period

Approved by the HSE Board – 28 March 2025

Introduction

This is the new National Performance Report for the January 2025 performance reporting period.

It covers metrics included in the revised national Balanced Scorecard

Note:

- Data used in this report refers to the latest performance information available at the time of preparation for HSE Board approval.

Red, Amber, Green (RAG) Rating

The table below provides details on the rulesets in place for the Red, Amber, Green (RAG) rating.
Note: RAG ratings are based on unrounded results.

Performance RAG Rating		Finance RAG Rating		Workforce Absence RAG Rating	
Red	> 10% of target	Red	≥ 0.75% of target	Red	> 4.2% of target
Amber	> 5% ≤ 10% of target	Amber	≥ 0.10% < 0.75% of target	Amber	> 4% ≤ 4.2% of target
Green	≤ 5% of target	Green	< 0.10% of target	Green	≤ 4% of target

Key Messages | January 2025

Current limits are for DOH funded services only i.e. excluding disability services (DECDIY)

Pay and Numbers Strategy

- The 2025 Pay and Numbers Strategy for DoH funded services is set at a maximum WTE Limit of 133,305 WTE. A report issues to all services monthly.
- For this month the variance to the maximum December Limit for current allocations is -6,882 WTE versus the variance to the Current YTD limit of -1,573 WTE. This significant variance is expected owing to the year-end variance against the WTE limit of December 2024 (due to the late agreement of the PNS 2024) and the additional 3,553 WTE new developments arriving under NSP 2025.

At Regional Level

- All Regions are currently reporting under the WTE Maximum Limit.

At Staff Category level

- With the exception of Medical & Dental all staff categories are below the December maximum limit.
- Medical & Dental are +166 WTE above the December 2025 maximum limit - however the bulk of NSP 2025 (2,952 posts remain to be commissioned).

A red flag denotes an area where an excess is recorded in WTE limits.

Red, Amber, Green (RAG) Rating

Appendix

Glossary of Terms

Glossary		Explainer
Quality & Access		
KPI No.		Unique metric identifier
KPI Title		Full KPI Title
KPI Short Title		Short title used for KPI
Target/Expected Activity		<p>Targets/Expected Activity reflect the National Service Plan where available.</p> <p>Depending on the metric, this may breakdown further into the current reporting period and year to date target/expected activity.</p> <p>I.e. A metric that is point in time will have the same target /expected activity for both current reporting period and current YTD</p> <p>A cumulative metric, e.g. Home Help Hours has a current reporting period expected activity and an YTD expected activity, both RAG rated accordingly.</p> <p>Where a metric has current reporting period target/expected activity and an YTD target/expected activity, the YTD target/expected activity is displayed in the target column.</p>
Reporting Frequency		Identifies the metric reporting timeline, e.g. M, M-1M, Q, Q-1Q etc. This may or may not be the same as data collection frequency.
Current		This includes the most recent information available for the metric. For example if a metric is reported monthly and it is a July report then current = July. However if a metric is reported M-1M the current period would be June.
Current YTD		This includes the most recent information available for the metric and depends on the metric. Year to date can be cumulative, point time, rolling 12 months etc.
SPLY YTD		This is the result for the same period in the previous year and as for current year to date the same rules apply
SPLY % Change		The is the % change between results calculated as $((\text{Current YTD} - \text{SPLY YTD})/\text{SPLY YTD}) \times 100\%$
Breakdown by Region		These are regional results for the metrics current reporting period.
CAMHS		Child and Adolescent Mental Health Services renamed to Child and Youth Mental Health
Point in time		Implies that the activity at the end of the year or at any time point is the activity for the month in question.
Cumulative		Cumulative implies that the activity at any point in time or at the end of the year is the activity for all of the months added together.
Primary Metric		A key measurement used to assess the quality, effectiveness, safety, and efficiency of healthcare services and patient outcomes, which is not in the National Service Plan
N/A		Not Applicable
NR		No Return
Zero Tolerance RAG Rating		<p>Where a target is 'less than or equal to' then below or equal target is green and above target is red.</p> <p>Where a target is 'greater than or equal to' then below target is red and greater than or equal to target is green. There is no amber rag rating</p>
Small Volumes		Where there are less than 20 people waiting in a particular specialty/hospital, the numbers have been aggregated under a 'Small Volume' heading.

People			
Baseline	WTE Baseline is the opening 2024 limit for an Entity and Region by staff category. It includes a credit for the small number of Pre-registration Nurses & Midwives (PRN&M) on clinical placement at 31/12/2023 but not included in the latest WTE. The rationale for this is that the clinical placement for these staff is unavoidable growth. Upon graduation it is expected that these personnel will fill 2024 vacancies arising, approved developments or agency conversion. WTE Baseline is adjusted upwards for specific community S39 agencies whose status moved to S38 or HSE as approved by the Minister.		
Dec 2024 WTE Variance	This is the year-end headroom for an entity by staff category provided all service development objectives are achieved. A minus indicates that an entity is below the WTE limit.		
WTE Dec Limit	December 2024 Limits: is the maximum allowable 2024 WTE. It is calculated as Baseline plus the Total developments Allowance. This figure will increase as new developments are approved and Primary Notifications issue.		
Developments & Agency Conversion	Developments & Agency Conversion are approved increases where a primary notification is in place. These figures are sourced from HR Sharepoint 2024 Developments database and are the only permitted staffing increases for 2024 (ref: HR Circular 36/2004).		
Onboarded Posts	Details the number of posts where it has been confirmed through HR Sharepoint by an entity/ region development posts are onboarded. This figure is added to baseline to show the latest (YTD 2024 limits).		
Finance			
Variance	Is the difference between the Spend and the Spend Limit in 2024		
Expenditure Limit	Is the Cap on Spend, set on behalf of the CEO in July 2024		
Control Limit	The term “Control Limit” is no longer in use and has been replaced by the term “Expenditure Limit”. Both have the same meaning.		
Budget	Is the amount of funding that has been allocated. However, all previously notified 2024 Budgets have been withdrawn. Budget has no standing for the remainder of 2024 & has been replaced in all cases by the Expenditure Limit.		
Pay Variance	Is the difference between the Actual Pay Spend and the Pay Spend Limit in 2024		
Non Pay Variance	Is the difference between the Actual Non-Pay Spend and the Non-Pay Spend Limit in 2024
