1.0 Policy Statement

The Health and Wellbeing Division was supported in the development of this policy by the HSE National Expert Group on Vending & Calorie Posting who have come together as a multidisciplinary, cross divisional group to deliver this policy; the Health Promotion Unit of the Dept. of Health for ongoing advice and support. The published work undertaken in the USA, Australia, Canada, Wales and New Zealand was utilised in the development of the Policy.

The Health Service Executive (HSE) policy is that all cold soft drinks, confectionery and snack vending machines will carry greater provision of clearly labeled ‘Better Choice’ than ‘Other Choice’ food and drink products to make the healthy choice the easier choice in all HSE facilities.

2.0 Purpose

The purpose of this policy is to promote healthy vended food and drink options to the public and HSE staff using HSE facilities by:

a) Providing greater availability of healthy food and beverage options at HSE premises
b) Ensuring that the organisation reflects best practice in relation to Healthy Eating options
c) Using Vending as a forum to promote and provide health education

The HSE is committed to maintaining and promoting the good health of the population of Ireland. This policy aims to ensure that this commitment is reflected in the food and drinks vended to patients, staff and visitors in HSE facilities.

3.0 Scope

* This policy applies to all Vending on HSE premises.
* Fundraising charity boxes are also covered under this policy

3.1 Caveats

1. The proportion of healthy product (Better Choice) Vs the proportion of traditional vended products (Other Choice) may be adjusted upwards only in favour of a higher proportion or 100% of healthy (Better Choice) products, at the discretion of local management. For example; there could be 100% of healthy (Better Choice) product available
through vending machines in paediatric hospitals or paediatric clinics and wards and their associated waiting areas.

2. Following the introduction of this policy and, in conjunction with Procurement, a National Contract for Vending 2015-2020 was awarded. It is envisaged that in high usage areas that locally produced fresh product i.e. fruit, may be used.

4.0 Roles and Responsibilities

4.1 Roles and Responsibility
• It is the responsibility of the General Manager on each site to ensure that those involved in the vending process comply with this Policy through monitoring, audit and review. See Appendix IV Audit of Vending Machines

• It should be recognised that this policy reflects an expected standard in relation to healthy vending but there may be occasions when it is acceptable to deviate from the Policy. A decision to deviate from the policy must be clearly documented and accounted for by the Expert Group.

• The public may request access to policies, procedures, protocols and guidelines (PPPG) and public bodies may be called on to publish such documents under Freedom of Information Act (1997) and appropriate legislation. It will be the responsibility of the Expert Group to ensure that the policy and subsequent revisions are available on the following websites www.hse.ie, HSE intranet, INDI, DOH, Environmental Health, Dental Health and HSE Green Group.

5.0 Procedure

5.1 Plan/setting the agenda
In Ireland, the proportion of adults and children who are not maintaining a healthy body weight is increasing.

Six out of every 10 Irish adults were found to be either overweight (37.5%) or Obese (23.5%) in the National Adult Nutrition Survey (NANS) 2011. Studies reveal that as a population we are becoming obese at an earlier age. Between 1990 and 2007 there has been a 6% increase in overweight
and obesity in 13 – 17 year old Irish boys (IUNA, 2007). Alarmingly 1 in every 4 of 3, 7 and 9 year olds in this country are either overweight or obese (COSI, 2008, 2010). The cost implication of obesity is estimated at 1.13 billion (SafeFood, 2013).

Diet has an important role to play in the prevention of obesity and chronic diseases such as coronary heart disease, diabetes and certain cancers. The Special Action Group on Obesity (2011) has set out priorities to be addressed, including introducing a tax on sugary drinks and improving nutritional labelling. These types of measures have been ranked highly in terms of cost-effectiveness.

The HSE is involved in numerous partnerships, both internally and with external partners plus Government departments, to address the increasing trend towards weight gain in Ireland. However as a major employer and purchaser of food products there is a lot the HSE can do to lead by example. Vending is one such area that allows scope for improvement. Currently the contents of many vending machines in HSE facilities do not provide healthy alternatives to snack products. In general snack products are nutritionally poor, being high in fat, sugar and salt (HFSS). The balance between healthy options and HFSS on offer should be positively weighted so that the healthy choice becomes the easier choice.

Vending machines can provide a source of income for the HSE. This income has the potential to increase through providing more healthy offerings, vending of non food items, better governance and the development of a national contract. A Healthy Vending Policy project is in keeping with the priorities of the Ministerial Special Action Group on Obesity (SAGO).

The introduction of a Healthy Vending Policy provides the opportunity to improve nutrition and promote knowledge of healthy eating across the population that use the services of the HSE. A Healthy Vending Policy also supports the directive from Minister for Health James Reilly, in June 2013 to commence calorie posting in all HSE facilities targeting staff, patients and visitors to help them to make the healthy choice the easier choice.

All future and existing contracts for Vending Services must comply with this policy. A service provider who does not comply with this policy may be removed from contract.
5.2 Review the available evidence/analysis
As part of developing this document the following similar policies and projects were reviewed:

- Healthy Vending Machine Policy.(2006) County of San Diego
- A Better Choice Tool Kit, Queensland Health.(2008)
- Alabama Healthy Vending Machine Program Project Summary.(2012)
- Framework Policy on Healthy Eating and Active Living. Going the Healthy Route at School. Pamphlet 2 Healthy Vending Machines. Quebec
- Review of the Implementation of Health Promoting Hospital Vending Guidance. NHS Wales
- Healthier Vending in workplaces, both possible and effective. New Zealand 2010

The decision to follow the model from the New Zealand Medical Association integrating the Department of Health ‘Healthy Eating Guidelines for Ireland’ was deemed to be the most compatible with our needs.

6.0 Policy

The policy comprises six elements:

6.1 Food and beverage provision
6.2 Communications, Advertising
6.3 HACCP compliant
6.4 Product Placement
6.5 Calorie posting pre-purchase
6.6 Vending of non food items

6.1 Food and beverages
There are two levels of classification of products ‘Better Choice’ and ‘Other Choice’.

<table>
<thead>
<tr>
<th>Better Choice Item</th>
<th>Other Choice Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Energy</td>
<td>≤150kcal per packet</td>
</tr>
<tr>
<td>Total Fat</td>
<td>≤20g/100g</td>
</tr>
<tr>
<td>Saturated Fat</td>
<td>≤5g/100g</td>
</tr>
<tr>
<td>Sugar</td>
<td>≤15g/100g</td>
</tr>
<tr>
<td>Salt/ sodium</td>
<td>≤1.5g/0.6g/100g</td>
</tr>
</tbody>
</table>
* With regard to vended drinks; all soft drinks, energy drinks, sports drinks and fruit/vegetable drinks with added sugars (or sugar products) can not be included in the ‘Better Choice’ selection.

**Note: As of February 2016** in the interest of dental health; milk and water will be the only drinks that can be included in the “Better Choice” items.

*Packets of unprocessed nuts and dried fruit are exempt from fat and sugar criteria. Items containing nuts and dried fruit as an ingredient must meet fat and sugar criteria.

- Products have to meet one of these classifications to be stocked in vending machines, and it was agreed that the ratio of ‘Better Choice’ to ‘Other Choice’ would be 60:40.

- This ratio of 60:40 mix of ‘Better Choice’ and ‘Other Choice’ choice products is the minimum requirements for vending and may be revised upwards e.g.80:20 if desired by a particular organisation. See 3.1 Caveats for examples

**Example of ‘Better Choice’ Items:**

<table>
<thead>
<tr>
<th>Hayes Farms Strawberry Low Fat Yogurt</th>
<th>Per 100g</th>
<th>Per 125g pot</th>
</tr>
</thead>
<tbody>
<tr>
<td>Energy</td>
<td>57.4 kcals</td>
<td>71.75 kcals</td>
</tr>
<tr>
<td>Fat</td>
<td>1.5g</td>
<td>4.3</td>
</tr>
<tr>
<td>Saturated Fat</td>
<td>0.91g</td>
<td>1.14</td>
</tr>
<tr>
<td>Sugar</td>
<td>6.9</td>
<td>8.63</td>
</tr>
<tr>
<td>Sodium</td>
<td>0.061g</td>
<td>0.2</td>
</tr>
</tbody>
</table>

All figures circled above meet the criteria for ‘Better Choice’
Example of ‘Other Choice’ Items:

<table>
<thead>
<tr>
<th>Item</th>
<th>Calories</th>
<th>Fat</th>
<th>Saturated Fat</th>
<th>Sugar</th>
<th>Sodium</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coca Cola Per 100ml</td>
<td>42 kcals</td>
<td>0</td>
<td>0</td>
<td>10.6g</td>
<td>n/a</td>
</tr>
<tr>
<td>Coca Cola Per 330ml can</td>
<td>138.6 kcals</td>
<td>0</td>
<td>0</td>
<td>35g</td>
<td>n/a</td>
</tr>
</tbody>
</table>

Soft drinks cannot be labelled as a ‘Better Choice’ items but this item meets the calorie criteria for ‘Other Choice’.

<table>
<thead>
<tr>
<th>Item</th>
<th>Calories</th>
<th>Fat</th>
<th>Saturated Fat</th>
<th>Sugar</th>
<th>Sodium</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tayto Salt &amp; Vinegar Per 100g</td>
<td>540 kcals</td>
<td>34.5</td>
<td>3.5</td>
<td>2.1</td>
<td>0.9g</td>
</tr>
<tr>
<td>Tayto Salt &amp; Vinegar Per 30g packet</td>
<td>200 kcals</td>
<td>10.35</td>
<td>1.05</td>
<td>0.63</td>
<td>0.27</td>
</tr>
</tbody>
</table>

The product above meets the calorie criteria for ‘Other Choice’ items.

Example of an Item that does not meet either criterion:

<table>
<thead>
<tr>
<th>Item</th>
<th>Calories</th>
<th>Fat</th>
<th>Saturated Fat</th>
<th>Sugar</th>
<th>Sodium</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rumblers Oat Clusters &amp; Natural Low Fat Yogurt – Scrummy Strawberries Per 100g</td>
<td>163 kcals</td>
<td>5.4 g</td>
<td>1.2 g</td>
<td>11.2 g</td>
<td>Trace</td>
</tr>
<tr>
<td>Rumblers Oat Clusters &amp; Natural Low Fat Yogurt – Scrummy Strawberries Per 170g pot</td>
<td>275 kcals</td>
<td>9.2 g</td>
<td>2.1 g</td>
<td>18.9 g</td>
<td>0.1 g</td>
</tr>
</tbody>
</table>

The calories per serving of this product would eliminate it from both criteria and therefore it is not a suitable option to stock in a vending machine.

6.2 Communication and advertising
- The HSE should have first priority in communicating their health messages via advertising on the side panels of vending machines in HSE facilities.
- Advertising of “Other Choice” products or products that do not qualify under either the “Better Choice OR
“Other Choice” categories are not permitted on the vending machine.

- The vending machine should not be encased in colours that utilise subliminal advertising to promote a product or brand
- Advertising of healthier “Better Choice” products is permitted and may produce extra revenue for the HSE.
- Explanation of ‘Better Choice’ and ‘Other Choice’ categories should be displayed on each machine.

### 6.3 Branding of Vending Machines and use of Key Health Messages

- In line with the HSE National Contract for Vending 2015 – 2020 contracted companies and any other companies with pre-existing contracts still in place must comply with the branding specifications for vending machines as in Appendix VIII.
- The newly designed vending machines will carry the following caption “It’s all about choice ... make yours a healthy one”. This will draw the customer’s attention to the presence of “Better Choice”/healthier options, identified by a lime green sticker/ring collar, and the calorie posting of all products in the machine to assist them to make a more informed product choice.
- To encourage the purchase of healthier options all machines must also display the following promotion information key messages in lime green info bubbles:

  1. Want a healthy snack? Choose the green option
  2. Save your smile, drink water
  3. Keep your snack to 150 calories

### 6.4 Food Safety

- All vending food and beverages must comply with relevant food safety legislation.

### 6.5 Product Placement

- Healthier “Better Choice” products should be placed in prime slots and at eye level to prompt their choice over “Other Choice” less healthy offerings.
- “Other” products may be positioned and/or priced to incentivise the choice of “Better” products.

### 6.6 Calorie posting pre-purchase

- All vended products should clearly display the amount of calories they contain alongside their price so that
purchasers can use this information to help them make an informed product choice.

6.7 Vending of non food items
• Vending is a source of income for the HSE and as such should maximise the potential from all vended products including the introduction of non food items.
• During the initial phase of the introduction of healthy vending a drop in sales is anticipated as has been experienced in other countries. The potential to regain sales revenue may occur through acquiring new customers interested in healthier options. The introduction of the vending of non food items would help to offset this initial projected fall in revenue.
• When contracts are being put in place the price of product must be agreed between the supplier, budget holder and Procurement (where applicable). Incentivising “Better Choice” products should be considered when setting pricing.

6.8 Charity boxes
On HSE premises charity boxes should not contain sweets/confectionary/fizzy drinks. Instead only non-food/drink items will be permitted for fundraising purposes.

7.0 Peer Review and key stakeholder review sign-off
• Representatives from the following internal HSE disciplines and groups will carry out a peer review in 2014:-
  - Dental Health
  - Environmental Health
  - Green Hospitals Group
  - Dietetic Managers Group
  - Health Promotion Managers
• Health Promotion & Improvement Management Team
• National Director Health & Wellbeing and SMT
• The Chair of the Expert Group on vending along with a member of Procurement presented the draft policy to the Senior Management Team for sign off in February 2014
8.0 Final Approval

- The Healthy Vending Policy was submitted to the Leadership team in February 2014 for final approval.

9.0 Implementation

When the policy was approved by the Leadership team:
- A communication broadcast was issued to all HSE email users informing them of the new policy.
- An article promoting the new policy was put up on the HSE intranet site and the HSE internet site.
- An article promoting the policy appeared in the spring 2015 issue of Health Matters.
- Procurement with the assistance of members of the Expert Group put a HSE National Contract for Vending 2015 – 2020 in place. Following awarding of the dual national contract no budget holder should enter into any contractual arrangements for Vending Services with any others outside the dual contract holders. Pre-existing contracts should be honoured and notified to HSE-Procurement.

10.0 Monitoring

- Implementation and monitoring to be devised at a local level. Minimum of annual audit required. See audit template in Appendix VI
- An annual feedback report is required by Procurement to feedback to the Expert Group.
- Income returned/commission to be used to cover the cost of implementation and monitoring at local level
- Ongoing monitoring will be built into the terms of the contract.
- The contracted company / companies to supply a quarterly report to Procurement on sales revenue and trends for analysis by the Expert Group.

11.0 Revision and Audit

- This is the initial review – Revision 1 HSE Healthier Vending Policy June 2015. This will be reviewed thereafter every 2 years or as warranted by the Expert Group. As vending historically has been arranged on an ad hoc basis with operation and terms differing across
regions and between facilities; the well documented current sales levels and product trend reports available from Cork University Hospital will serve as a baseline to track the initial effects of implementation of the policy.

Appendix VIII Branding Specification for Vending Machines (as per HSE National Contract for Vending 2015-2020)

PROVISION OF VENDING SERVICES
(Supply, Installation, Operation and Management of Vending Machines/Products, as per HSE Healthy Vending Policy)

Appendix 1

Branding Specification for Vending Machines

- Vending machines must be white in colour with a small HSE logo and Healthy Ireland (hi) logo at the bottom of the front and side panels.
- “Better Choice” products must be identified by lime green containers, collars etc.
- All products must have calories posted.

Main Caption: It’s all about choice… make yours a healthy one

3 Key messages in lime green bubbles:

1. Want a healthier snack? Choose the green options
2. Save your smile, drink water
3. Keep your snack to 150 calories

See next page for photos
