Removal of expired Influenza batches

Dear Doctor,

I refer to communication DNHP 0374 dated 7th May 2024, detailing the end of the 2023/24 Influenza (flu) Campaign on 30th April 2024.

In order to maintain the GP IT system configuration, vaccine products which are no longer in use are periodically removed. This supports improved user interface and workflow, providing currently available options only when choosing the vaccine type.

Removal of Influenza batches from 2023/24

All influenza batches from the 2023/24 season will be removed from GP IT Systems effective from 1st July 2024.

Any outstanding vaccine records and claims relating to these batches must be entered by **5pm 30th June 2024** as it will not be possible to submit after this date.

To date, GP practices have recorded over 727,000 flu vaccines for the 2023/24 season, which is 62% of the total flu vaccines given. We would once again like to thank you for all your assistance and cooperation in the delivery of a successful seasonal flu vaccine programme.

Yours sincerely,

Geraldine Crowley
Assistant National Director
