

Diabetes Mellitus: Illness Code F

“List F” specifically and automatically covers the following:-

- Insulins and Analogues (GMS Reimbursable Items - *WHO ATC Classification – A10A*)
- Blood Glucose Lowering Drugs excl. Insulins (GMS Reimbursable Items - *WHO ATC Classification – A10B*)
 - Acarbose
 - Exenatide
 - Glibenclamide
 - Gliclazide
 - Glimepiride
 - Glimepiride and Rosiglitazone
 - Glipizide
 - Liraglutide
 - Metformin
 - Metformin and Rosiglitazone
 - Metformin and Sitagliptin
 - Metformin and Vildagliptin
 - Nateglinide
 - Pioglitazone
 - Pioglitazone and Metformin
 - Repaglinide
 - Rosiglitazone
 - Saxagliptin
 - Sitagliptin
 - Vildagliptin
- Glucagon Kit
- Blood glucose test strips and urinalysis test strips
- Insulin syringes and needles
- Insulin Infusion sets and associated appliances required for use with Insulin pumps
- Lancets and Lancing Devices
- Injection swabs
- Control solutions for use with meters

Department of Health & Children decision in respect of treatment of hypertension and hypercholesterolaemia in diabetic patients (Ref Circular PB 312)

- Antihypertensives (GMS Reimbursable Items - *WHO ATC Classification - C02*)
- Diuretics (GMS Reimbursable Items - *WHO ATC Classification - C03*)
- Beta Blocking Agents (GMS Reimbursable Items - *WHO ATC Classification - C07*)
- Calcium Channel Blockers (GMS Reimbursable Items - *WHO ATC Classification - C08*)
- Agents acting on the Renin-Angiotensin System (*GMS Reimbursable Items - WHO ATC Class C09*)
- Lipid Modifying Agents – (GMS Reimbursable Items - *WHO ATC Classification - C10*)

Department of Health & Children decision in respect of Aspirin 75mg. for diabetic patients (Ref Circular PB 407)

- Aspirin 75 mg. (GMS Reimbursable Items – *WHO ATC Classification - B01AC06*)

Any new GMS Reimbursable Item detailed on the Monthly Update and classified under the following *WHO ATC Classifications A10A - A10B - C02 - C03 - C07 - C08 - C09 - C10 - B01AC06* will also be automatically covered.
